<p>Question 1: Detailed report of events. Rangers 7027940 and 1435697 were driving south to Waddy Point at approximately 1.45pm, when they observed a dingo loitering around a man and a woman whilst they were fishing. An untagged male dingo circled the man who was in a chair before coming in close to sniff his esky on the beach right next to him. The woman then walked over towards the dingo calmly, stooping down reaching out her closed hand. The dingo cautiously approached and sniffed the woman's hand as we were walking over quickly to intercept the interaction. At that moment the dingo was startled and ran away. The dingo hung around for a few minutes 10 metres away from where we were standing with the couple, before the dingo lost interest and trotted up the beach, disappearing behind the fore dune. Rangers 7027940 & 1435687 asked if they were trying to coax the dingo in for a feed of bait which the couple denied. The woman and the man claimed it was their first time on Fraser Island and were unaware of dingo issues on the island. The information was passed onto NRM Ranger who then briefed them thoroughly on Dingo Safety.</p>

<p>Question 1: Detailed report of events. At approximately 10:30 rangers 7028020 and 1423683 observed a dingo loitering around Garry's Anchorage day use area. The dingo was first observed on the beach, then made its way around the outside of the day use area and sat in the vegetation to the east of the picnic area. It did not approach visitors or staff any closer than 20-50m and was wary of people and the QG vehicle. Visitors present were briefed on dingo safety and food security.</p> <p>About 1 hour later, whilst servicing a wildlife camera about 1km north, 4 visitors were observed walking north along the Southern Road from Garry's Anchorage. The visitors mentioned that there was a dingo following them and had been since they started walking. The dingo did not come close enough to cause concern (when observed by QPWS staff was about 40m away). The visitors continued to walk and QPWS staff took some photos of the dingo, stopping it from following for about 10 minutes. The dingo moved into the vegetation, moved around QPWS staff and vehicle, and then continued walking up the track that the visitors had followed.</p>

<p>Question 1: At around 4.45pm, Ranger 7028773 was driving south along eastern beach in front of Marloo CZ when he saw a dingo loitering around some fishermen. As he approached the dingo with his vehicle the sub-adult male took off up the beach. Ranger 7028773 asked the fishermen if the dingo was trying to get into their bait bucket (situated in the boot of the wagon) and they said yes, however they were regulars to the island and vigilant about securing food/bait. They had chased the dingo away twice and it lost interest and hung back from the vehicle some 20 metres of so. Ranger 7028773 then left them with a Dingo Interaction Card so they could report any further interactions</p>

<p>Question 1: Detailed report of events. Whilst repairing grid wires on the Eurong front grid and knocking sand down, two men who were staying in a holiday rental approached us to report having seen a dingo within the fenceline the previous afternoon. They provided a vague description of the dingo which made it difficult to determine its age, but stated that they did not sight an ear tag but that the dingo was favouring its "rear right leg". On inspection along the fenceline this morning, there were no tracks near the (currently closed) cage behind the bus wash down area, but there were tracks through the drive access to the toilet block and approaching the front grid. It was difficult to establish how recent the prints were as it had rained this morning. The front grid wires seemingly aren't live at present, despite 14 volts showing on the regulator within the grid electrical box. Will check for tracks again tomorrow morning, but tracks were also present in Second Valley.</p>

<p>Question 1: Detailed report of events. On Monday night the electric fence stopped working at the Gabala camp CTO. Tuesday morning after the group left two pups got into the camp. It doesn't appear that they got into any food as the eskies were tied up. CTO leader fixed the fence asap next morning. It looked as though someone had been messing with the battery connection. The pups came back after the fence had been fixed and were zapped. The camp run checks the fence each day they are there and fixes any problems we may have. This is the first time we've had any problems with the fence not working since the heavy rain a while back.</p>

<p>Question 1: Detailed report of events. Reported via dingo.ranger. "We just finished our diner when this dingo walked to our campsite. First, it looked like he was just going to walk past us, but he came closer from behind some bushes. It started making half circles around the camp spot, coming closer and closer. We didn't spot other dingoes. My girlfriend put all the leftover food and dishes in the car whilst I kept an eye on the dingo. At one point he (she, 01Yellow16F) became too close and we decided to wait in the car as we felt quit intimidated, the dingo however didn't act aggressively, it just came really close (about 1 meter from me). After we went into the car, it walked through our campsite, saw there was no food anymore and disappeared."</p>

<p>Question 1: Detailed report of events.</p> <p>Ranger 7028773 had finished work for the day and was driving home for a swim, when he noticed 3 young juvenile dingoes loitering around a vehicle while the occupants were fishing some 20 metres away. The dingoes were trying to get at a bait bag used for beach worming that was hanging off the tow ball of the vehicle. Ranger 7028773 drove in between the bait bag and dingoes to chase them away. The dingoes immediately ran off north up the beach. Ranger 7028773 spoke to the fishermen and reminded them to secure their bait and food in their vehicle as it is a finable offence if dingoes were to have free access to this.</p>

<p>Question 1: Detailed report of events. On Thursday afternoon at approximately 16.30, Ranger 7028773 was doing a Dingo Patrol near Eli Creek. Ranger 7028773 noticed a dingo in the distance ahead of him near a group of fishermen that was 200 metres north of the creek mouth. As he drove towards the fishermen the dingo took off towards the creek and up over the dunes. Ranger 7028773 asked the fishermen how long the dingo had been loitering around and if it had taken any bait or food as the back of their wagon was open near where the dingo had been loitering. The fishermen said that the dingo had only been there for 2 minutes and all their bait was on them in their personal bait buckets. The fishermen didn't see a tag on the dingo's ear and thought it was a female but they weren't certain. Ranger 7028773 handed the fishermen Dingo Interaction cards and asked them to report any further interactions.</p>

<p>Question 1: Detailed report of events. Coming off the hook point barge we observed two male dingos laying on the beach approximately 100 to 200 meters from where the barge landed. We stopped 20 meters away from the animals to take a photo for identification purposes. As soon as we stopped, they approached the vehicle and came within 30cm of the car. A Nomad's tag along group then stopped behind us. Both dingos quickly moved to the lead car of the group which was towing a trailer. They sniffed around the trailer for around 30 seconds then one dingo put his paws up on the back tailgate of the trailer. At this point I got out of the vehicle and chased both dingos back into the bush. The TAG group drove away before I had a chance to speak with the driver.</p>

<p>Question 1: Detailed report of events. Two rangers were cleaning toilets at Wabby East and noticed a dingo trotting about 1 metre behind a couple, the dingo made its way around the people and continued to the carpark. After about 10 minutes 4 young backpackers were walking into Wabby and running - noticing the dingo wasn't far behind them (we told them not to run). The dingo has already turned around checking other people out. By the time we left about half an hour later, we could hear squeals coming from a group of people walking in. Once we approached the people we could see, dingo had just passed them. When we got to the carpark area she was approaching people at the back of a vehicle (not showing aggression - but not leaving on her own). Rangers yelled at the dingo clapping hands and it backed away but then pursued the RBAC tag cars, rangers then chased her again and she went into the dunes.</p>

<p>Question 1: Detailed report of events. On 25/04/18 whilst patrolling the Eli Creek DUA, two QPWS ranger were informed by a Commercial Tour Operator from Sunrover Tours that male visitor who was on tour indicated that he had just seen what he believed to be a young dingo loitering in the vicinity of the toilet block. Rangers went to investigate the dingo sighting. Approximately 50 metres along the boardwalk to the toilets, a male dingo was observed moving from the vegetation on the eastern side onto the boardwalk. The animal appeared to be fixated on the vegetation on the eastern side. A female dingo with a green tag (identified in a later photo as GGG13F) was present in the vegetation. The male then entered the vegetation to accompany the female. The two animals are thought to have left the area.</p>
