Attention: Environmental Health Officer(s)

Dear Mr Hooper,

Re: Review of sites listed on the Environmental Management Register for petroleum product or oil storage

I refer to previous correspondence dated 17 September 1998 which advised of a review of sites listed on the Environmental Management Register (EMR) for the notifiable activity of 'petroleum product or oil storage'.

This Section's records, including previous paperwork provided by Council, have been reviewed, and in some instances it has not been possible to make a determination about whether the sites should remain on the EMR. A schedule of these sites is attached to this letter.

In each instance, information is sought concerning whether the site falls within the definition of 'petroleum product or oil storage' in Schedule 3 of the *Environmental Protection Act 1994*:

29. Petroleum product or oil storage—storing petroleum products or oil—
 - (a) in underground tanks with more than 200 L capacity; or
 - (b) in above ground tanks with—
 - (i) for petroleum products or oil in class 3 in packaging groups 1 and 2 of the dangerous goods code—more than 2 500 L capacity; or
 - (ii) for petroleum products or oil in class 3 in packaging groups 3 of the dangerous goods code—more than 5 000 L capacity; or
 - (iii) for petroleum products that are combustible liquids in class C1 or C2 in Australian Standard AS 1940, 'The storage and handling of flammable and combustible liquids' published by Standards Australia—more than 25 000 L capacity.

If another notifiable activity has occurred on a particular site, please also provide these details. If you have any queries concerning this letter, please do not hesitate to contact myself on telephone (07) 3227 8143.

Yours Sincerely
