Attention: Ms. A. Gunning-Davis

Dear Ms. Gunning-Davis,

94/13493

QEC CONTAMINATED LAND REGISTER NOTIFICATIONS

A recent enquiry by QEC staff regarding an entry which we believed should be on the Contaminated Land Register, and subsequent discussion with you, indicated that our previous submission of details of 58 land parcels owned by the Commission, which we believed required notification under the Contaminated Land Act 1991, may not have been incorporated into the Contaminated Land Register.

The original submission was made in late December 1992, and took the form of a computer disk containing a run-time module of the Clipper database (supplied by the Contaminated Land Section) containing the details of the land parcels, as well as a hard copy of each of the 58 submissions.

Enclosed please find information on land parcels owned by the QEC which, we believe, require notification under the Contaminated Land Act 1991, and which we suspect have not been included on the Contaminated Land Register. The enclosed forms contain the relevant details for the 59 land parcels currently owned. The details for these land holdings are also available on computer disk as dBase IV files which are compatible with your Clipper database, if required.

We would also like to take this opportunity to notify you of a change of ownership for a property which we believe is on the Register. On 26 February 1993, the Commission notified your section of the existence of contamination on the Howard Power Station site (Lot No. 1 / Reg. Plan No. 176847) which was at that time privately owned. In January 1994 the Commission purchased that site. Your Register should reflect that the current owner is the Queensland Electricity Commission, GPO Box 10, Brisbane, Queensland 4001.
