Re: Application (No. MC006896) for development approval for assessable development to be carried out at 14 - 16 Brighton Road, Macleay Island 4184 (Lots [redacted] 192 and 193 on RP31201).

Pursuant to the following items of Schedule 2 of the *Integrated Planning Regulation 1998,* the Environmental Protection Agency is a concurrence agency for the development application:

☐ Item 3 of Schedule 2 of the *Integrated Planning Regulation 1998* (for Environmentally Relevant Activities)
☑ Item 6 of Schedule 2 of the *Integrated Planning Regulation 1998* (for contaminated land)

The Environmental Protection Agency (EPA), acting as a concurrence agency under the *Integrated Planning Act 1997*, provides its response to the application detailed above as attached.

It would be appreciated if Council could provide a signed hard copy of the final development approval issued by Council (which includes the Agency's concurrence conditions).

The EPA has not provided a notification to native title parties for this application. The State's Native Title Work Procedures indicate that responsibility for assessment of native title issues for an IDAS application rest with the Assessment Manager. It is recommended that you undertake an assessment using your own guidelines to determine if a native title notification is required for this application.

Should you require any further information please do not hesitate to contact the above officer on the telephone number or e-mail address provided .

Response to Development Application

The Environmental Protection Agency, acting as a concurrence agency under the *Integrated Planning Act 1997*, provides its response to the application detailed above.

The concurrence agency response is that

☐ conditions must attach to any development approval

☐ any approval must be for part only of the development

☐ any approval must be a preliminary approval only

☑ **there are no concurrence agency requirements;**

☐ the application must be refused

Release

Conditions of the development approval

The following concurrence agency condition(s) is/are to be attached to any development approval issued for this application:

Not applicable

Reasons for inclusion of development conditions or refusal

Not applicable

Additional comments or advice about the application

Not applicable

Additional information for applicants

This concurrence response pursuant to Chapter 7, Part 8 of the *Environmental Protection Act 1994* applies only to contaminated land issues and does not remove the need to obtain any further approval for this development which may be required by this or other legislation, State and/or Commonwealth. Applicants are advised to check with all relevant statutory authorities for such approvals as may be required.

RTI DL RELEASE - EHP

DUE 19/05/03.

Release

01/05/2003	**Lots 192 and 193 RP31201**	**PEER REVIEW by AP of KH File.**
BNE15864	**Cnr 14/16 Brighton Rd and 38-40 Scarborough Tce, Redland.**	**AEG Consultants Pty Ltd**

Goal: Remove Lot 193 RP 31201 from the EMR.

Report Content:

- The site was a Service Station and convenience store that is proposed to be redeveloped into offices. Lot 193 covers an area of 1012m^2. The service station building covers the eastern portion of the block with the balance of the property covered with grass and concrete.
- Residential properties are located to the East and North with Scarborough Terrace and Brighton Road being located to the West and South. Regional soil types and site soils were estuarine, flood plain, tidal delta deposits. Soil Types were heavy red clays typical of the mainland regions around Macleay Island. Investigations show that there is no fill located on the site, other than the bedding sand associated with the tank.
- Groundwater was not encountered during this investigation to a maximum depth of 2m. The site is approximately 300m from the Jetty (Moreton Bay). The direction and depth of groundwater is not known but would probably run south which is down slope towards the Bay Region. Surface runoff would follow a similar direction.
- At the time of investigation all infrastructure was still in place. The site began operation as a Service Station in the mid 1960's – early 1970's, the site had been the property of the sch4-(6) Personal information from 1946 until it's recent sale. Anecdotal information states that no other activities apart from those present at the time of the investigation were carried out on the site. It was also stated that the site only ever had one tank in place. No motor vehicle repair works were carried out on the site only fuel dispensing. No underground waste oil tank was located at the site. There are no documented spills, discharges to land or water and no earthworks. The current buildings are the only to have occupied the site. No F&C licences found.
- 13 samples were collected, 5 samples recovered from the tank pit excavation, 1 from the bowser base, 2 from the excavated backfill, 1 from the trench between bowser and tank and 4 samples taken across the yard as a total. 9 samples were analysed for TPH/BTEX and Lead, with the 4 yard samples being analysed for heavy metals. All final validation sampling was below the validation criteria (EIL or HIL(A), or levels of concern for TPH/BTEX) except for 1 sample taken from the yard that returned a lead level of 430mg/kg.

Recommendations:

- The recommendation made by AEG Consultants Pty Ltd is that the site has been cleaned up and all sources of contamination removed and as such the site should be removed from the EMR.
- The Review Officer has assessed the file and agrees with this recommendation.
- Given the investigation, remediation and validation works that have been carried out on this site, it is the recommendation of the Peer Reviewer that this site be removed from the EMR in accordance with the recommendations of the Consultants and the Review Officer.

RE: Lot 193 on RP 31201, Statutory Declaration

Dear Sir

Please find a copy of the above document.

Please be aware that this document was not submitted by AEG Environmental rather the town planners who were told that Fees and Statutory Declarations were to accompany all reports sent to the EPA.

I hope that this form and the fees to be forwarded by the owner will satisfy all requirements.

If you require any further information please contact our office rather than the town planner as this will only delay the entire process.

Yours faithfully

Dear Sir/Madam

RE: Site Investigation Report Commercial Premises & Educational Establishment at Lots 192 and 193 on RP 31201 and situated Brighton Street & Scarborough Terrace, Macleay Island for s.73 irrelevant information sch4p4(6) Personal information

Please find enclosed a copy of the report prepared by AEG Consulting addressing matters raised in an information request from Redland Shire Council dated 2 September 2002 (copy attached).

Please note that your Department was never identified as a referral agency in Council's original acknowledgement notice. However I have been asked to forward a copy of the report to your Department to act in its role as an advice agency by Nadine Cramp from Redland Shire Council.

I also wish for you to observe that Redland Shire Council incorrectly advised of your address in its acknowledgment notice and apparently the earlier material that I sent ten days ago to PO Box 2772 has gone astray.

If you have any further questions in relation to this, please do not hesitate to contact me on sch4p4(6) Personal information

idas INTEGRATED DEVELOPMENT ASSESSMENT SYSTEM

PART A

Common details for all applications

The completion of all questions on Part A is mandatory for all applications. For further information refer to the guide for completing the application form available from the assessment manager or on the IPA website at www.ipa.qld.gov.au

1. Description of land

The description must identify all land subject of the application including land/easements over which access is to be obtained.

The lot & plan details (eg. SP / RP) are shown on title documents or a rates notice.

If the plan is not registered by title, provide previous lot and plan details.

Street address *(include no., street, suburb / locality & postcode)*

s.73 irrelevant information and 14 Brighton Street, Macleay Island Postcode 4184

Lot & plan details *(Attach list if necessary)*

Lots s.73 irrelevant information & Lots 192 & 193 on RP 31201

Shop / tenancy no. *(if applicable)*: N/a | Storey / level *(if applicable)*: 1 | Total area of land *(m² / ha)*: 4044m²

In which local government area is the land situated?: Redland Shire

2. Proposal

Provide details of the proposal *(eg. new house / apartment building etc., demolition / removal of a house; extension to existing shop; new carport etc)*.

Details of the existing use of the land *(Attach proposal report if necessary)*: Residential

Details of the proposal *(Attach proposal report if necessary)*: Commercial Premises / Educational Establishment

3. Other parts of the form completed

Complete all other parts of the form applicable to your application.

What other parts of the form are attached *(E.g. Part B – if the application involves assessment against the Building Act, Part D – if the application involves assessment against the planning scheme for material change of use, Part F – if the application involves reconfiguring a lot)*: Part D

4. Applicant details

Clearly identify who is making the application. The applicant need not be the owner of the land.

In signing and lodging this application, the applicant is responsible for ensuring the information provided is true. The assessment manager, any referral agency and the Chief Executive (where applicable) will rely on this information when assessing the application.

If the applicant is a company, a contact person must be shown.

All correspondence will be mailed to this address.

Form 1 Development Application

idas INTEGRATED DEVELOPMENT ASSESSMENT SYSTEM

PART D

Complete if this application involves ***assessment against the***

Planning Scheme

For material change of use of premises

Completion of all questions on Part D of this form is *mandatory* for all applications for a material change of use of premises including conceptual design for any associated works that require approval under the planning scheme.

Nature of the application

A development permit authorises development to occur, while a preliminary approval is a step in the approval process and does not authorise development to occur.

1. This application is for: *(Tick one or more if applicable)*
   - ☐ **Preliminary approval** for a material change of use of premises including conceptual design for any associated works that require approval under the planning scheme *(ie consideration of the proposal concept)*

   AND/OR

   - ☑ **Development permit** for a material change of use of premises including conceptual design for any associated works that require approval under the planning scheme.

Referral triggers

This application may trigger referral to an IDAS referral agency. These questions help identify whether referral is required.
Referral coordination occurs - when an application involves 3 or more concurrence agencies; or under transitional arrangements.
Referral coordination is further explained in the Referrals Checklist.

2. Does the application trigger referral to an IDAS referral agency? *(Tick applicable box) (Use the Referrals Checklist to determine any possible referrals for this application).*
   - ☐ NO
   - ☐ YES *If yes, attach Referrals Checklist*
3. Does the application trigger referral coordination? *(Tick applicable box) (Use the Referrals Checklist to determine if this application triggers referral coordination).*
   - ☑ NO
   - ☐ YES *If yes, attach Referrals Checklist*

Details of the land

For the definition of "gross floor area" refer to the planning scheme against which the application will be assessed.

4. How is the subject land identified in the planning scheme? *(Name the zone, precinct etc.)* Comprehensive Development Zone
5. Existing gross floor area *(if applicable)* 130m²
6. Are there any existing easements on the land? *(Tick applicable box)*
   - ☑ NO
   - ☐ YES Attach plans of the location & purpose

Proposal details

For the definition of "site cover" refer to the planning scheme against which the application will be assessed.

7. If the application is for preliminary approval for the use of the land, provide conceptual plans and other details / reports in support of the proposal.
8. If the application is for development permit for a material change of use of premises, including conceptual design for any associated works that require approval under the planning scheme, provide the following particulars on this application form, or alternatively clearly indicate on plans or in documents accompanying this application.

   Site cover: 7%

   Proposed gross floor area: 130m²

   Number of on-site car parking spaces: 6

   Number of storeys / maximum height above natural ground: 1

   Number of employees: 3

   Hours and days the use will operate: Business hours.

Plans and documents

9. Is the application accompanied by: *(Tick applicable box/es)*
   - ☑ Plans
   - ☑ Proposal Report
   - ☐ Other *(Specify)*: _____

This application cannot be accepted by the assessment manager unless accompanied by Part A of the Development Application

RTI DL RELEASE - EHP

Re: Application for development approval.

Applicant:	Simon Clarke (Town Planner)
Council Application Number:	MC006896
EPA Application Number:	40351 Part 1
Date application received by EPA:	12/03/2003
Development Description:	Material Change of Use
Address of subject land:	14 - 16 Brighton Road, Macleay Island 4184 Lots [redacted] 192 and 193 on RP31201

s.[redacted]relevant information

This development application and supporting information have been reviewed. The Environmental Protection Agency (EPA), acting as a concurrence agency **for contaminated land issues**, requires the following further information for the application to be assessed fully.

1. Additional information provided in accordance with the *Environmental Protection Act 1994* and the *Draft Guidelines for the Assessment and Management of Contaminated Land in Queensland* (DEH, 1998) to enable a Suitability Statement to be issued for Lot 193 on RP31201, specifying that the land is suitable for the intended use.

In accordance *Section 383* of the *Environmental Protection Act 1994*, a site investigation report submitted to the administering authority must be accompanied by appropriate statutory declarations. Consequently, you are requested to provide the appropriate statutory declaration/s to facilitate the assessment of the submitted 'Stage 4' site investigation report.

The Draft Guidelines for the Assessment and Management of Contaminated Land in Queensland may be obtained from the Environmental Protection Agency's internet site at www.epa.qld.gov.au, or by contacting the EPA's Contaminated Land Unit. Please ensure that the appropriate statutory fee [currently $900.00] is included for the assessment of the site investigation and / validation reports. Contact Adam Marks, Environmental Officer on (07) 3227 7667.

Under the *Integrated Planning Act 1997* s3.3.8(1), an applicant receiving an information request from the assessment manager or a concurrence agency (the "**requesting authority**") must respond by giving the requesting authority-

(a) all of the information requested; or

(b) part of the information requested together with a notice asking the requesting authority to proceed with the assessment of the application; or

(c) **a notice**-

(i) stating that the applicant does not intend to supply any of the information requested; and

(ii) asking the requesting authority to proceed with the assessment of the application.

Under s3.2.12(2)(b), the application lapses if the applicant does not respond to the information request within 12 months.

As required by s3.3.6(5), the Agency is forwarding a copy of the information request to the assessment manager.

A response to this information request should be posted or facsimiled to:

Contaminated Land Unit
Southern Region (Brisbane)
Environmental Protection Agency
GPO Box 2771
BRISBANE QLD 4001

Should you require any additional information please do not hesitate to contact the above officer on the telephone number provided.

Attention : Adam Marks

Dear Sir

RE: Re-referral for Commercial Premises and Educational Establishment as a Concurerence Agency.

RTI DL RELEASE - EHP

Please find enclosed yet another referral to the EPA as requested by the Redland Shire Council. This is the third time I have been asked to refer the material due to errors on Council's part – firstly on 13 February 2003 the material was sent to the wrong address notified by Council and secondly on 23 February 2003 material was sent to the correct address but advising that the EPA was an Advisory Agency.

This letter re-acknowledges and corrects the errors advised by Council in the previous two acknowledgement notices sent. I trust the material I have sent to you here is sufficient and that you may reuse the information I have previously provided as I no longer have copies of the multiple AEG Consulting Reports previously in my possession as all have been distributed.

If you have any further questions in relation to this, please do not hesitate to contact me on sch4p4(6) Personal information

Yours faithfully

Release

8. Referral Co-ordination

Is referral co-ordination triggered? ☑ No ☐ Yes

1. a. an application for a material change of use involving a facility mentioned in schedule 6; ☐

   b. an application for a material change of use of land or the reconfiguration of a lot that is wholly or partly -

      i. in an area mentioned in schedule 7, part 1; or ☐

      ii. in, contains or shares a common boundary with an area mentioned in schedule 7, Part 2; or ☐

      iii. in, contains or shares a common boundary with or is within 100m of the boundary of an area mentioned in schedule 7, part 3. (Refer to attached Schedules 6 & 7) ☐

2. Three (3) or more Concurrence Agencies ☐

Please note for Referral Co-ordination you need to forward the application to the Chief Executive of Department of Local Government & Planning, PO Box 187, Brisbane Albert Street 4002.

S3.2.6(2) If referral coordination is required, the acknowledgment notice must state that the applicant is required to give the chief executive-

(a) a copy of the application; and
(b) a copy of the acknowledgment notice; and
(c) a fee prescribed under a regulation under this or another Act.

9. Will a further Information Request be made by the Assessment Manager?

☑ No ☐ Yes

10. Further Advice:

Public Scrutiny (S3.2.8)

The application and supporting information will be kept open for inspection and purchase from the date of receipt of this application, until the end of the last period during which an appeal may be made against the Decision of the Assessment Manager or alternatively the application is withdrawn or lapses.

If you wish to make any representations on the content of material considered to be 'sensitive security information', then this needs to be conveyed to the Assessment Manager as soon as possible for consideration.

Yours sincerely

Dear Simon,

Commercial Premises and Educational Establishment
14-16 Brighton Road, Macleay Island

Please find enclosed a recent e.mail which Council received from the Environmental Protection Agency regarding the above application. As you will note, after receiving the Site Investigation Report (contaminated land) from you, the Agency determined that due to the previous history of the land it should be a Concurrence agency rather than an Advice agency in the assessment of the application.

In accordance with the EPA's requirements, please find enclosed another Amended Acknowledgement Notice showing the EPA as a Concurrence Agency rather than as an Advisory Agency. You will be required to re-notify the EPA on the basis of this new Acknowledgement Notice. Council will determine whether or not public notification will need to be carried out again however you are advised to also seek your own advice in this respect.

Please contact Mr. Martin Hunt on 3829 8274 or myself if you have any questions.

Yours Faithfully,

From: Adam Marks [adam.marks@epa.qld.gov.au]
Sent: Wednesday, February 26, 2003 4:08 PM
To: martinh@redland.qld.gov.au
Subject: MCU without referral to EPA CLU

Martin,

Following from our discussion earlier today, this email is to confirm the EPA's requirement regarding a MCU for a parcel of land listed on the Environmental Management Register (EMR)for Fuel Storage.

Essentially, this MCU needs to be referred to the EPA for concurrence due to the site's previous land use. As such the EPA requests Redland Shire Council to re-issue an Acknowledgement Notice that identifies the EPA CLU as a referral concurrence agency. Despite the recent listing, schedule 2 of the IPA reg and provisions in the EPA act require referral of MCU's of this type.

I trust this info is sufficient.

Regards

Adam Marks

Form 1 Development Application

idas INTEGRATED DEVELOPMENT ASSESSMENT SYSTEM

PART A

Common details for all applications

The completion of all questions on Part A is mandatory for all applications. For further information refer to the guide for completing the application form available from the assessment manager or on the IPA website at www.ipa.qld.gov.au

1. Description of land

The description must identify all land subject of the application including land/easements over which access is to be obtained.

The lot & plan details (eg. SP / RP) are shown on title documents or a rates notice.

If the plan is not registered by title, provide previous lot and plan details.

Street address *(include no., street, suburb / locality & postcode)*

s.73 irrelevant information and 14 Brighton Street, Macleay Island Postcode 4184

Lot & plan details *(Attach list if necessary)*

Lots s.73 irrelevant information & Lots 192 & 193 on RP 31201

Shop / tenancy no. *(if applicable)*: N/a | Storey / level *(if applicable)*: 1 | Total area of land *(m² / ha)*: 4044m²

In which local government area is the land situated?

Redland Shire

2. Proposal

Provide details of the proposal *(eg. new house / apartment building etc, demolition / removal of a house, extension to existing shop, new carport, etc)*.

Details of the existing use of the land *(Attach proposal report if necessary)*

Residential

Details of the proposal *(Attach proposal report if necessary)*

Commercial Premises / Educational Establishment

3. Other parts of the form completed

Complete all other parts of the form applicable to your application.

What other parts of the form are attached *(E.g. Part B - if the application involves assessment against the Building Act, Part D — if the application involves assessment against the planning scheme for material change of use, Part F — if the application involves reconfiguring a lot)*

Part D

4. Applicant details

Clearly identify who is making the application. The applicant need not be the owner of the land.

In signing and lodging this application, the applicant is responsible for ensuring the information provided is true. The assessment manager, any referral agency and the Chief Executive (where applicable) will rely on this information when assessing the application.

If the applicant is a company, a contact person must be shown.

All correspondence will be mailed to this address.

Form 1 Development Application

idas INTEGRATED DEVELOPMENT ASSESSMENT SYSTEM

PART D

Complete if this application involves ***assessment against the***

Planning Scheme

For material change of use of premises

Completion of all questions on Part D of this form is *mandatory* for all applications for a material change of use of premises including conceptual design for any associated works that require approval under the planning scheme.

Nature of the application

A development permit authorises development to occur, while a preliminary approval is a step in the approval process and does not authorise development to occur.

1. This application is for: *(Tick one or more if applicable)*
   - ☐ **Preliminary approval** for a material change of use of premises including conceptual design for any associated works that require approval under the planning scheme *(ie consideration of the proposal concept)*

   AND / OR

   - ☑ **Development permit** for a material change of use of premises including conceptual design for any associated works that require approval under the planning scheme.

Referral triggers

This application may trigger referral to an IDAS referral agency. These questions help identify whether referral is required.
Referral coordination occurs - when an application involves 3 or more concurrence agencies; or under transitional arrangements.
Referral coordination is further explained in the Referrals Checklist.

2. Does the application trigger referral to an IDAS referral agency? *(Tick applicable box) (Use the Referrals Checklist to determine any possible referrals for this application).*
   ☐ NO ☐ YES *If yes, attach Referrals Checklist*
3. Does the application trigger referral coordination? *(Tick applicable box) (Use the Referrals Checklist to determine if this application triggers referral coordination).*
   ☑ NO ☐ YES *If yes, attach Referrals Checklist*

Details of the land

For the definition of "gross floor area" refer to the planning scheme against which the application will be assessed.

4. How is the subject land identified in the planning scheme? *(Name the zone, precinct etc.)*
   Comprehensive Development Zone
5. Existing gross floor area *(If applicable)* 130m²
6. Are there any existing easements on the land? *(Tick applicable box)*
   ☑ NO ☐ YES Attach plans of the location & purpose

Proposal details

For the definition of "site cover" refer to the planning scheme against which the application will be assessed.

7. If the application is for preliminary approval for the use of the land, provide conceptual plans and other details / reports in support of the proposal.
8. If the application is for development permit for a material change of use of premises, including conceptual design for any associated works that require approval under the planning scheme, provide the following particulars on this application form, or alternatively clearly indicate on plans or in documents accompanying this application.

   Site cover 7%

   Proposed gross floor area 130m²

   Number of on-site car parking spaces 6

   Number of storeys / maximum height above natural ground 1

   Number of employees 3

   Hours and days the use will operate Business hours.

RTI DL RELEASE - EHP

Information Request

Dear Sir

Proposed Development: Commercial Premises and Educational Establishment
Application Reference No: MC006896
Site Description: Lots 192 & 193 on RP31201
Site Location: 14 Brighton Street, Macleay Island QLD 4184

Upon review of the abovementioned Development Application and supporting information we require further information to satisfactorily assess the application. The information requested is set out below.

PLANNING REQUIREMENTS

Provide details of proposed carparking provision for visitors to the art gallery.
Provide details of signage proposed to be used in association with the commercial premises.

ENGINEERING REQUIREMENTS

Provide a preliminary stormwater drainage design in terms of both underground and overland flows.
Provide an indication the proposed surface treatment for the driveway and car parking areas.] Gravel road base. → rubble pit.

LANDSCAPING REQUIREMENTS

Provide a landscape concept plan which shows the integration of existing endemic vegetation with proposed planting themes using endemic plant species. The plan is to be conceptual and show preferred planting themes which enhance the site and contribute to the streetscape. A detailed design is not required.

HEALTH AND ENVIRONMENT REQUIREMENTS

1. Provide details regarding proposed operating hours and activities to be carried out on site ie. opening hours and art classes to be held at the art gallery and operational hours of the commercial premises.

2. Provide a full assessment of the site history. This is to provide details of the previous uses of the property, time frames of activities and associated infrastructure. It has been indicated that this property has been previously used for the storage of flammable and combustible liquids. **Should this information be confirmed** in the site history assessment, you are to provide details of the following:
   (a) Type and quantity of fuel stored;
   (b) Location and storage method of fuel (ie. underground, above ground tanks and/or minor package store);
   (c) Other infrastructure (ie. bowsers etc) associated with the fuel storage;
   (d) Indication of one of the following options in relation to the fuel storage infrastructure (should any be located).

   I. Should there be no intention to store flammable or combustible liquids, then the necessary decommissioning works must involve one of the following:
   (a) Removal of the tank to an approved site, or
   (b) Fill the whole tank with an inert solid material (eg. sand, concrete, etc) and disconnect all pipe works from the tank.

   Note: The decision of the appropriate means of decommissioning should be based on the results of an Equipment Integrity Test for the tank. Where the tank is significantly deteriorated, the removal of the tank should be undertaken. The results of this test must be certified by a suitably qualified person. These test results must be provided to Council.

   II. Where the tank is not to be decommissioned, licensing under the *Dangerous Goods Safety Management Act 2001* must be achieved.

ARCHITECTURAL REQUIREMENTS

Provide a colour board of proposed external paint colours for approval by Council's architect.

Advice:

A truncation of the corner of Brighton Road and Southsea Terrace may be required to cater for future road works at this intersection.

Roadworks, such as kerb and channel, bitumen widening, concrete footpath, etc. shall be required along the frontages of the subject site.

This development proposal is concerned with minor alterations to existing demountable buildings. There are issues associated with building and fire regulations, and equitable access. It may be necessary for a building surveyor to provide advice in this regard.

Contact should be made with the Development Application Co-ordinator as identified should you need to clarify or discuss any matter further. I encourage you to undertake this as soon as possible so that no undue delays or misunderstanding can arise to cause delays in processing your application.

RTI DL RELEASE - EHP

Release

I am obliged to draw your attention to Section 3.3.8, which sets out that you as the Applicant have three (3) options available in response to this Information Request. That is you (the Applicant) must give the Assessment Manager (Redland Shire Council):

1) All of the information requested; or
2) Part of the information requested together with a notice asking the assessment manager and each referral agency to proceed with the assessment of the application.
3) A notice –

    (i) stating that the applicant does not intend to supply any of the information requested; and
    (ii) asking the assessment manager and each referral agency to proceed with the assessment of the application'.

Response to this Information Request should be forwarded to:

Andrew Kurbatoff

EXECUTIVE SUMMARY

The site, located at 39 Southsea Terrace, Macleay Island was an ex service station property with a convenience store that is being re-developed into the office of Ray White, Macleay Island.

The site therefore required a full site contamination assessment involving any necessary decontamination of site features including underground fuel storage facilities.

AEG Environmental has carried out a Stage 4 Site Remediation and Contamination Assessment of the ex service station and corner store site at 39 Southsea Terrace, Macleay Island.

Site history, site inspection, sampling, remediation and validation based on a strategic sampling program has revealed that there is no evidence of contamination at levels of health or environmental concern with respect heavy metal, TPH, BTEX, PAH or Heavy Metals.

It is recommended that the site be removed from the Environmental Management Register and be classified as suitable for any use.

RTI DL RELEASE - EHP

1. Scope of Work

The site, located at 39 Southsea Terrace, Macleay Island was an ex service station property with a convenience store that is being re-developed into the office of Ray White, Macleay Island. The site therefore requires a full site contamination assessment involving any necessary decontamination of site features including underground fuel storage facilities.

The detailed scope of works comprised the following:

- Prepare and document site history details by inspection, interview and aerial photograph studies.
- Identify all ex underground fuel storage facilities and then excavate and dispose of the fuel tank then sample and excavation base and walls, the bowser base(s) and line trenches.
- Design an appropriate sampling plan to assess possible contamination related to other site features.
- Identify and quantify any contamination present and carry out a remediation program.
- Use on site remediation to clear any pit spoil of contamination due to the storage of diesel or leaded/unleaded fuels.
- Prepare a Stage 4 Site Investigation Report for presentation to the EPA for removal of the site from the EMR.

2. Site Information

a) Site location and description

The site is located at 39 Southsea Terrace, Macleay Island and had been occupied by an Independent Service Station from approximately the 1970's that had fuel-dispensing facilties.

There is one Lot comprising the property (Lot 193 on RP31201), a rectangular shaped portion containing 1012 m^2 with frontage to Southsea Terrace and Brighton Road .

The ex service station building covers the eastern portion of the property with some grassed areas to the front and rear of the site.

At the time of sampling by AEG Environmental all structures and facilities were still in place.

A search carried out by AEG Environmental in December 2002 revealed that the Lot is listed on the EMR for "Petroleum Product or Oil Storage". A Copy of the listing is included in EMR Searches, Attachment 6.

A scaled plan showing the structures is provided as Site Layout Plan, Attachment 2.

Investigations have confirmed no site fill material.

Site photographs are unavailable in this report due to a robbery in the office.

RTI DL RELEASE - EHP

b) Proposed Use

The proposed use of the site will involve the refurbishment of the building for a Real Estate Sales Office and the construction of a car parking area outside the building.

c) Site history

A site history interview was conducted with sch4p4(6) Personal information (Manager, Ray White Macleay Island) on the 5th November 2002.

sch4p4(6) Personal information said that the service station had been operational from the mid 1960's or early 1970's and he had bought the property recently from the previous owners.

He maintained there were no other facilities on the site other than those currently there. He also confirmed that the underground tank in place at the time of excavation was the only one used on the site.

Further site history details were provided by the Department of Natural Resources, historical titles searches and are as follows:

- The property was originally owned by A sch4p4(6) Personal information prior to 1946. sch4p4(6) Personal information sch4p4(6) Personal information 12th March 1946 saw the property transferred to sch4p4(6) Personal information and sch4p4(6) Personal information
- It appears that the site remained the property of the sch4p4(6) Personal information until the transfer to sch4p4(6) Personal information the current owners. The sch4p4(6) Personal information operated the site as a fuel dispensing facility and a convenience store.
- These details were provided by the current owners.

Adjacent land use seems to be residential to the north and east, which can be seen in Aerial Photographs (Attachment 4). To the south and west are Scarbourough Terrace and Brighton Terrace respectively.

There were no industrial processes or manufactured goods produced on the site. The only uses were as a fuel dispensary and associated corner shop.

There was no vehicle servicing carried out on the site.

No underground waste oil tank was associated with this facility.

There are no documented records of spills or discharges to land or water and no earthworks have been associated with construction activities with no imported fill on site.

The current buildings are the only buildings to have occupied the site. No other buildings have been located on the site since the Service Station became operational.

No licenses were found with the local council (Redland Shire Council) for the site for the storage of flammable materials.

The following activities have not been carried out on, or affected, the site:

- Incineration

RTI DL RELEASE - EHP

- Creosote timber treatment
- Waste dumps or fill
- Pesticide, herbicide, paint and solvent storage
- Off site contamination migration

d) Site inspection

Site inspection appears to confirm the site history details provided with the topography of the site being essentially flat and covered with a building and grassed area to the rear.

The site is located approximately 300m north of the Transport Jetty for the island but the flood potential is minimal.

The site is covered with grass, concrete tarmac and buildings. There are garden beds on site surrounding the front of the property and the rear is grassed with couch.

Land on the eastern and northern boundary is residential housing, to the south is Southsea Terrace and to the west is Brighton Road.

Historical land use was a fuel dispensing and local store facility.

There was no oil or servicing carried out on the site and fuel dispensing was the only potentially contaminating activity carried out.

No sewer stormwater and underground service plans were available for the site but in the absence of any contamination they would not be relevant.

e) Geology and hydrogeology

Regional soil types and site soils were estuarine, flood plain, tidal delta deposits. Soil types were heavy red clays typical of the mainland regions around Macleay Island.

There is no evidence of off site fill other on the site fill other than the backfilling of the underground tank pit with bedding sand.

No ground water was encountered at a depth of 2.0 meters the maximum depth of investigation (base of the tank pit excavation), the direction and depth of ground water is not known but would probably run south which is down slope towards the Bay region. Surface run off would follow a similar direction.

3. Sampling

The objective of the sampling program was to test the excavated tank pit and fill material and to assess the broad yard for possible analytes of concern with the ultimate aim of removal of the site from the EMR.

Site history and inspection did not indicate the likely presence of contamination in the yard area so laboratory analysis was confined to the environmental screening for a wide range of possible analytes and selective analysis around the fuel tank and yard areas.

RTI DL RELEASE - EHP

Twelve samples were recovered from the:

- Five Samples recovered from the excavated tank pits (MI1-MI5),
- One sample recovered from the bowser base (MIBB1),
- Two samples from the excavated backfill (MITPS1-MITPS2),
- One sample from the line trench between the tank pit and the bowser base.
- Four broad yard samples (MIY1-MIY4).

This selection was chosen because it has been difficult to obtain site history details for this site that would satisfy EPA (in this particular case history would seem adequate).

All samples were taken by a stainless steel hand auger or a stainless steel hand trowell that were cleaned between samples, where indicated, with a brush and detergent.

Sample material was recovered into teflon sealed glass jars, transferred to a car Engles refrigerator and delivered under chain of custody documentation to Gribbles Analytical Laboratories in Victoria, a NATA registered laboratory.

4. Groundwater and/or Surface Waters

Ground water was not encountered in the tank pit that was excavated to a depth of 2.0 meters. Therefore no investigation was conducted into the ground water during this investigation.

5. Quality Assurance

All laboratory samples were transported under chain of custody to Gribbles Analytical Laboratories in Melbourne and all documentation related to quality assurance is included in Attachment 6 (Analytical Certificates).

RTI DL RELEASE - EHP

6. Results

All sample locations are shown in Site Sampling Plans (Attachment 3) and analytical data are presented in Tables 1 – 4 below.

6.1 Sampling (05 / 11 / 02)

AEG Environmental carried out a Site Remediation and validation sampling of the site as requested by Mr Edward A'Bear.

The purpose of this investigation was to check areas of likely contamination viz: the underground tank pit, and to provide a broad assessment of any other potential sources of contamination in the yard area associated with the underground storage of fuel.

The sampling included 13 sample locations (as detailed above) to assess potential contamination with respect to the storage of underground fuel and the operation of a service station.

- There were five Samples recovered from the excavated tank pits (MI1-MI5) assessed for TPH, BTEX and Lead,
- One sample recovered from the bowser base (MIBB1) assessed for TPH, BTEX and Lead,
- Two samples from the excavated backfill (MITPS1-MITPS2) assessed for TPH, BTEX and Lead,
- One sample from the line trench between the tank pit and the bowser base assessed for TPH, BTEX and Lead.
- Four broad yard samples (MIY1-MIY4) assessed for TPH and Heavy Metals.

Results are presented in Tables 1 & 2.

TABLE 2

Comment:

- There is no contamination with respect to TPH or BTEX at any of the locations tested.

7. Remediation Plan

A remediation plan was not required for this site.

8. Conclusions and Recommendations

AEG Environmental has carried out a Stage 4 Site Remediation and Contamination Assessment of the ex service station and corner store site at 39 Southsea Terrace, Macleay Island.

Site history, site inspection, sampling, remediation and validation based on a strategic sampling program has revealed that there is no evidence of contamination at levels of health or environmental concern with respect heavy metal, TPH, BTEX, PAH or Heavy Metals.

It is recommended that the site be removed from the Environmental Management Register and be classified as suitable for any use.

BTEX/MAH (PURGE & TRAP), DRY WEIGHT					
Method: 504P&T Units: mg/kg					
Benzene	<0.1	<0.1	<0.1	<0.1	-
Ethylbenzene	<0.1	<0.1	<0.1	<0.1	-
Toluene	<0.1	<0.1	<0.1	<0.1	-
Xylenes	<0.1	<0.1	<0.1	<0.1	-
ELEMENTS by ICP-MS, DRY WEIGHT					
Method: 406-MS Units: mg/kg					
Arsenic	-	-	-	-	7.9
Cadmium	-	-	-	-	<1.0
Chromium	-	-	-	-	25
Copper	-	-	-	-	9.9
Lead	6.1	5.6	31	36	430
Nickel	-	-	-	-	5.7
Zinc	-	-	-	-	1100
HYDROCARBONS (C6-C9), DRY WEIGHT					
Method: 513P&T Units: mg/kg					
TPH C6 - C9	<20	<20	<20	<20	<20
HYDROCARBONS (TPH), DRY WEIGHT					
Method: 501-FID Units: mg/kg					
TPH C10 - C14	<20	<20	<20	<20	<20
TPH C15 - C28	<20	<20	<20	42	<20
TPH C29 - C36	<20	<20	<20	130	<20
OVEN MOISTURE CONTENT					
Method: 100 Units: % w/w					
Moisture	3.8	6.9	10.3	2.6	2.0
VOLATILES (PURGE & TRAP), SURROGATE RECOVERIES					
Method: 504P&T Units: % Recovered					
Toluene-d8, Surrogate Rec.	103	109	99.0	101	-
