Date (of Interaction): 6/9/15 Time (of Interaction 24hrs): 0750 Location (of Interaction): Kingfisher Bay Resort, just sth of Jetty Hut Reporting Officer/s details: 7028728	Details of person(s) involved in dingo Interaction. Name: sch4p4(6) Personal information Address: Phone #: sch4p4(6) Personal information Visitor type: Resort staff
---	---

Question 1. Detailed report of events advised that on the 6/9/2015 at 07:50 am two elderly resort guests were walking down the beach just south of the Jetty Hut at Kingfisher Bay Resort. They were approached by a female dingo that came within 1 metre of the couple. The dingo was jumping from side to side and was snarling at the couple. While this was occurring a staff member at the jetty hut contacted the main office of the resort, from there 2 male staff members were sent down to assist the couple. When the male staff members approached the dingo it did back away a few metres but was still snarling and growling. This allowed the couple to continue their walk down the beach. After a short time the dingo lost interest, and the staff members followed the couple down the beach keeping a considerable distance. The dingo then followed the staff members at a distance for a while and then left up a sand dune.

Question 2: What were the actions/behaviours of the dingo(s) during the Interaction?

Code D - Threatening. – growling, snarling, dominant towards humans ☒ Growling/snarling ☒ Dominant/submissive testing ☐ Stalking ☐ Tent ripping (campers inside tent) ☐ Circling (distance) ☐ Dominant towards humans ☐ Stealing/damage to property (directly from person) ☐ Incorporate humans into pack behaviour ☐ Humans regarded as competitors for resources ☐ Bailing up/ambushing (walking alone or unsupervised) ☐ Hunting tactics (with intent to test a response) ☐ Lunging (dominance test)	Code E - High Risk. – nipping, biting, attacking ☐ Nipping/mouthing ☐ Biting ☐ Attacking ☐ Causing casualty ☐ Hunting tactics (intent to attack) ☐ Bailing up/ambushing (intent to attack) ☐ Lunging (attempting to nip or bite)

☒ SR ranger notified

Additional comments: The couple advised that they had food in a backpack. This interaction was also observed by the ferry captain who had also contacted the office. QPWS Ranger 1423322 spoke to the ferry captain who advised he observed the dingo pass a number of people on the beach showing little interest. He also stated that during the initial contact with the dingo it appeared as though the male person approached the dingo and initiated the incident. (6) Personal was asked as to whether she had been advised by guests or staff members of any dingoes inside the KBRV fence line recently, she replied that none had been seen.

Action taken: Thanked (6) Personal for advising of the interaction and the importance of further interactions being advised.

Proposed further action: Further patrols at the resort. Guests and staff members continue to be briefed in Dingo Safety messages. Distribute Dingo Interaction reporting cards to encourage timelier reporting of interactions.

Question 1. Detailed report of events. Sunday morning at approximately 0630, I was walking on the beach in front of carree camping zone. I turned around and noticed right behind her (within 1m). I yelled at the dingo "NO GO AWAY!" this did not deter the dingo. The dingo began to lower itself and pounce from side to side right beside (dominance testing), during this time the dingo was vocalising. I continued to yell at the dingo "go away" while slowly walking backwards but the dingo continued to dominance test and close the gap that was creating by backing away. During this time I took my jacket from around her waist and tried to deter the dingo by swinging it at it while yelling - again unsuccessful in deterring. Two 4wd vehicles arrived and two men got out of the vehicles 'shooing' the dingo away. The dingo lost interest and she was able to successfully walk back to her camp.

20RED14m continued to loiter in the area after this interaction.

I noticed that the dingo had a short tail and a red tag in its left ear. I showed rangers photographs of the dingo involved, this confirmed the identification of the dingo to be 20RED14m.

Question 2: What were the actions/behaviours of the dingo(s) during the Interaction?

Question 1. Detailed report of events. Details of interaction that occurred on Sunday 27-09-15 were relayed to Ranger 7028020 on the evening of 30-09-15.

sch4p4(6) Personal information and another Eurong resort staff member were on the beach fishing when they observed a dingo (identified from photos supplied (attached below) as 08Purple13f) heading south along the waterline just north of the entrance to Eurong.

2 female visitors that appeared to be part of an RBAC tag-along tour were at the water's edge and when they saw the dingo approaching they started to scream and run into the water. The dingo, which had not been paying any particular attention to the visitors, ran after them when they started to run and jumped around in the shallows for a few minutes.

2 cars passing by drove between the dingo and the girls and at this point the tag-along leader walked towards the water and escorted the girls up the beach.

The dingo walked around the car and then continued south along the beach. The dingo stopped to smell a few buckets, including sch4p4(6) Personal information before moving on.

The RBAC vehicles parked up followed the dingo down the beach taking photos out the windows.

Question 1. Detailed report of events reported a dingo interaction involving 2 tagged adults (one with a left tag possibly yellow) and 6 juveniles and his girlfriend were fishing at the front of their camp at Cornwells CZ, when they returned to camp to re-rig their rod. As he was attaching the lure, his girlfriend called to him and he looked up and saw a dingo about 1/2 a metre away from him. He believes they must have just been behind the car and moved in closer as and girlfriend were walking back to the beach. The dingoes moved in and seemed to want to push them into the ocean, the couple hit the sand with the rod, then threw sticks at them, and even hit them with their rods and a bucket, but the dingoes were not deterred. He said that the male seemed to lead the behaviour and the juveniles may have been taking cues. As they couldn't scare the animals away, partner waved at a vehicle down the beach and the vehicle came towards the pack, drove assertively towards the animals, who weren't scared, then honked and revved the engine, the dingoes moved further down the beach for 25 metres then up onto the dunes.

Question 1. Detailed report of events. Husband and Wife went for a walk at 11.00am on the 28th of December from Waddy Lodge accomadation to the Binngih Sandblow. They were at the precipice of the main sandblow when an untagged, male dingo approached them from front-on. It dominant tested the couple by crouching and howling/growling. The husband tried to yell and wave his hands/hat around to scare the dingo off, however this didn't work as the dingo lunged at them, coming within a couple of metres. The dingo then proceeded to back off and lunge from side to side, distracted the dingo by making a "cracking" noise with his hat as they slowly made their way down towards the beach, keeping eye contact and remaining calm. Friends had noticed their predicament and they joined together as a large group which made the dingo back-off. The male dingo followed the group to the Waddy Beachfront CZ and became disinterested where it headed north up the beach. The incident was reported to 7028773 on the 29.12.15.

Question 1. Detailed report of events. As I was crouching worming, a juvenile dingo with a Blue Tag came to the back and nipped my pants only, no contact made with skin, I flipped back and smacked it in the nose with my hand. The dingo retreated to a couple of metres as I was shouting at it and being threatening while walking up the beach 10 metres to where my dingo/pipi stick was. I gave the ground a few hard hits with the stick but the dingo still wasn't deterred easily, and it came back closer when I attempted to go back to worming in a crouching position. After it looked like it was going away, I gave up worming and walked back home with my stick, the dingo lost interest and walked North.

Question 1. Detailed report of events. Sunover tours leader was near his vehicle, parked on the beach in front of Lake Wabby walking track, waiting for his group to return from the lake.

He witnessed an orange tagged dingo move through and divide a Palace tag-along group.

As the dingo was about three metres past the last person in the group, a female, it turned back and ran straight back towards here.

At this point, sch4p4(6) Personal information yelled "lookout!" and ran over, throwing a stick towards the dingo. The dingo backed off temporarily but then started to come back.

sch4p4(6) Personal information picked up a larger stick and ran towards the dingo to chase it away. The dingo was deterred and left the area.

<p>Question 1. Detailed report of events and his 8 year old son were walking to the Lake Wabby lookout from the inland carpark, had passed an aggressive dingo sign and so he found a large stick to carry. Approximately 400-500 meters from the carpark three dingoes appeared out of the bush (one had a blue tag) and two came within 3-5 meters, one of the younger dingoes circled behind blocking their path back to the carpark. Person swung the stick at the juvenile dingo behind them and struck it in the head. The dingo backed off and circled back around to the other two dingoes. At this point the older dingo disappeared and his son started walking back towards the vehicle. The adult dingo reappeared behind them very soon after and all three dingoes followed and his son back to vehicle. During the return person feigned at the dingo with the stick and each time it jumped back and remained just out of striking range. The dingoes left when they arrived back at the vehicle.</p>

Question 1. Detailed report of events.

Report received via Eurong office phone 1220hrs from (Fraser Explorer Tours operations). A KBRV bus driver reported a dingo 'acting aggressively towards a young boy'. The interaction required a Fraser Explorer Tours (Kingfisher) bus to intervene between an unaccompanied boy and a dingo who was attempting to get to the boy. The driver said that the dingo had been identified as 'the blue tagged dingo with the collar'. Ranger 7026804 drove down to the beachfront to see if she could get a visual on 20Blue15f (consistent with identification, only dingo presently fitted with collar) and made radio contact with rangers 7026858 and 7028122 who had been tasked with patrolling Govi to Winnam camping areas, and they advised that they had a visual on 20Blue15f south of Eurong. 7026804 asked if there was a boy nearby and they said that no persons were in the immediate area.

Ranger 1427479 was approached by a Kingfisher bus driver at Mirri Creek, who identified himself as the bus driver involved. He confirmed that a boy of approximately 12 years of age was fishing in the surf at the beachfront of Eurong resort when a dingo was moving towards him into the water in a manner that the bus driver felt that he needed to intervene with the bus, by honking the horn and driving the bus into the water between the boy and the dingo. He stated that the dingo involved in the interaction was a 'tagged dingo with a collar'. The driver immediately radioed through to his base to pass the information on to QPWS for our response.

The driver reported that the bus was successful in redirecting the dingo north up the beach, and he left the scene with the dingo away from the boy at the time.

<p>Question 1. Detailed report of events. Whilst driving and monitoring the collared (20Blue15F) dingo I observed her moving south along beachfront from outside the Eurong office driveway towards many visitors recreating on the beachfront outside the fenced township of Eurong. This dingo then made a beeline for one particular group (about 40m away), containing 2 adult males and 2 small children under 1 meter high (ages unknown). The males were fishing in about ankle deep water with the 2 children very close by (within arms reach). One of the males turned and noticed the dingo coming toward them so he started to walk towards his bucket that he had left further up the beach (about 15m away). The bucket had no lid but only contained an empty coke can. As the male adult was 'shooing' the dingo away from the bucket the dingo continued on her path out into the water towards the 2 small children and one adult. She was moving at a fast paced trot and fixated on the 2 small children. The adult with the 2 small children had them both behind him while the children held on to his legs, while he faced the dingo and yelled at her 'to go away'. The dingo got within about 10meters before the adult male that was with the bucket moved towards the children and the dingo, and chased the dingo away by moving towards her and waving his arms in her direction while yelling at her. The dingo moved back towards the bucket but still seemed to have a focus on the children. The adult male again moved away from the children and towards the bucket again to 'shoo' off the dingo and the dingo once again moved quickly towards the children again. This happened a total of 4 times before I intervended with the car. I moved the car close to the bucket and told the adult male to go and stay with the other adult male and 2 children. The dingo stayed between the bucket and the people for about 1 minute while still focussing on the children, before moving away and continuing south along the beach and to the next group of people. I continued to watch this dingo while she moved south along the beach as she approached nearly every group along the beach.</p>

Question 1. Detailed report of events.

From Danbear reported witnessing a significant incident involving 2 teenage girls and a collared dingo at the front of Second Valley. He said he responded to 2 girls screaming for help about 50metres out of Eurong second valley grid, he saw a dingo less than a metre from them and it looked like it was lunging and nipping at the legs.

Ladies involved in the incident were later located at the Honeyeater's lodge. They said they were about 50 metres out of the fenced area that morning when they noticed a dingo in the bushes, they started to run back towards the gate, and the dingo ran to them, panicked and pushed between her and the animal. The dingo snarled and bared teeth, the girls screamed for help as they saw a man in his car looking at the surf not far from them. The man drove his car between them and the dingo, got out and chased the dingo with his thong. The girls ran back to their accommodation in the fenced area. When asked if the dingo had bitten/nipped them, said no contact was made.

indicated that they had seen the dingo signs, but had not read any brochures. They were informed that running was not recommended when faced with a dingo as this only can trigger the animal's instinct to chase and bite. Girls were also explained that it was advisable to walk in groups and carry a stick.

Question 1. Detailed report of events. came into office around 1500hrs to report a dingo interaction that he had to intervene in. A dingo, identified as having a collar (20Blue15f) was noted on the foredunes (approximately 50m from water's edge) when it noticed that two young children (estimated at younger than 10 years) were approximately 20m away from a male adult, who was fishing. The activity of the children wasn't specified. The police noticed that the dingo 'made a beeline' for the children (tail up and ears pinned back, running at pace), so they drove towards the scene, with their siren sounding. The siren seemed to distract the dingo (and alert the male fisher) and the police were able to position their car between the children and the dingo. At this point, the dingo returned to the foredunes, and the police spoke to the man (described as larger in size) about needing to stay with his children at a closer distance.

Question 1. Detailed report of events. Rangers 1422562 & 1427479 were patrolling around the beachfront of Eurong Township, there were a significant amount of people on the beach. 15Green15M was present in the area, keeping a relative distance from people but moving group-to-group. Later 15Green15M proceeded to stalk/walk towards a child fishing who then walked over to an adult and two other children fishing in the water. 15Green15M then begun pressing forward towards the group, pushing them closer together in the water. The adult with the children used his fishing rod to keep the dingo from coming any closer. The dingo stayed within 5 metres for quite some time (Rangers began driving towards the incident to intervene) before moving away and then another nearby adult fisherman chased the dingo away.

Question 1. Detailed report of events: **was walking** along the beach heading south towards Eurong and had read the dingo safety signage upon leaving the fenced area and was carrying a stick. On his way back to Euron noticed a dingo (described as having a green tag in its left ear) within 3 metres following behind him. **waved the stick** towards the dingo which kept it from coming any closer. The dingo persisted to follow for approximately 10 minutes, occasionally getting to within arm's reach and at times growling. Eventually **got closer** to a group of people on the beach and the dingo seemed to lose interest. It backed away and moved down towards the waters edge. A QPWS Ranger arrived shortly after and saw 15Green15m hanging around a family of four, seperate Code C to follow.

Question 1. Detailed report of events. Report received via dingo ranger email on Sunday 17.04.2016.

On Thursday evening (6) Person was fishing 100m from the camp only on the beach for a few minutes when a dingo appeared behind me. It approached me howled at me lunged forward a few times I backed away. It kept coming forward it jumped at me few times at me growled or snarled, I continued to back up down the beach toward our vehicle and radioed for help from friends. This continued for about 20minutes it was quite frightening. It only stopped when a seagull landed about 100m up the beach and it took its attention away from me. Not sure if any of these dingoes were tagged or not. I did take some pictures of the dogs circling around the camp with a long lens
