Dear Nadine

RE: CONTAMINATED SITES REGISTER

As discussed during our phone conversation today I understand there are currently 31 sites being queried with Council. If you cannot locate the queries for these sites, please contact me and I will have the original letters resent to you.

I have attached a copy of the notification of contaminated land form and I have also included a copy of the Prescribed Purpose Activity Interpretation Guide. This guide should be of assistance in notifying any future land parcels to the Department. Your assistance with this matter is appreciated. If you have any queries, please contact me on (07) 3227 6921.

Regards

CTPI 49-Sch 4

CONTAMINATED SITES SECTION
DEPARTMENT OF ENVIRONMENT & HERITAGE
PO BOX 155
NORTH QUAY QLD 4002

Dear Sir,

Re: Notification of Contaminated Land.

Attached to this letter is notification of contaminated sites in Noosa Shire, pursuant to Section 17 of the Contaminated Land Act.

The late submission of the information was unavoidable due to:-

- (1) The database requirements for the information was not forwarded to Council until the 1st December, 1992.
- (2) The need to adapt the database for the processing of property owner information for land included in the former Noosa-Peregian Beach Artillery Range. The exact boundaries of the artillery range were not confirmed by your Department until the 5th January, 1993.

The information is provided in a Q & A database. It is understood from discussions with staff at the Department that this meets your requirements.

The information is provided in the required fields. A disc and printout of the data is attached. Additional fields were added for Noosa Council use. These additional fields are:-

1. Local Authority Map No.

This refers to a series of location maps prepared under Map Info. A copy of the maps is attached to this letter. The LA Map No. corresponds to the numbers shown on the maps, to show the location of the contaminated sites.

2. Info Date

This is the date the information was included in the data base.

3. Contamination Source

This field provides a verbal description of the contamination source.

The information for land included in the former Noosa-Peregian Beach Artillery Range is not included with this data. A program which links the Q & A database with Council rate information is currently being run. It is anticipated that Council will forward this additional information within 3 weeks.

In addition, it is anticipated that Council will provide additional entries as it becomes aware of contaminated land within the Shire in the future.

I trust the attached information fulfils the Department's requirements. Please contact Shaun Walsh of the Town Planning Department if you have any queries concerning the information.

Yours faithfully,

CTPI 49-Sch 4

V.B. Davidson,
SHIRE CLERK
