Yeah mate, if you can do that, it would be great.

I'll send them back to Lit, and it should be all good to close out I reckon.

Thanks again,
Rhys

If you want I'll do the same for the other draft map with the clearer background.

I was just thinking there's also probably no need for decimal places in the area – it's not that accurate anyway.

How's does this look? Gives a bit more sense of the size of the pads.

'Disurbance'

Well in my defence it was 530pm on a Friday ☺

Hey Craig,

Thanks again for the maps mate.

The only comment to come back was to correct 'Disurbance' in the legend.

There might be some other additions/changes required, so happy to sit tight for now, and ill touch base in the coming days, if anything else comes up.

Thanks again,
Rhys

Yep added those bits. The areas are of the polygons supplied by Adani – I also verified by doing the calculation again.

I've added a second map, this shows the area with much better resolution (15-60cm vs 5m), however the imagery is 2016. It's just for reference so you can clearly see what the area looks like.

Hey Craig,

Just looked over the map. Thanks very much!

Two requests:

1. Would you mind adding in the total hectares at the bottom of the table? And
2. Can you change the legend reference to: 'Potential Impact Areas (supplied by complainant)'

On receipt of the update, I'll forward to Lit and see what they think.

Thanks again,
Rhys

Hey Rhys,

Draft map. Imagery isn't that great but might not be able to get better due to location. It'll be difficult to get accurate disturbance based on it. Discuss on Monday.

Cheers
