<p>Question 1: Detailed report of events.</p> <p>Ranger 7027904 was on the beach just sth of Eurong with other rangers when a pup came down out of the bush and started picking something up off the ground and eating it. 7027904 went and looked at the items. It appeared to be sliced chicken and some other darker meat. There were fresh vehicle tracks leading to where the food was dropped. A vehicle had driven to the site, food probably dropped out the door (no shoe prints), vehicle reversed a few metres, then drove away. The tracks came from the north of the area where the pups have been regularly observed. The food was collected and disposed of and photos were taken (see attached).</p>

<p>Question 1: Detailed report of events.</p> <p>Ranger 7028020 was on patrol when they observed 08Purple13f and five UT15 pups emerge from the dunes and make their way straight towards two vehicles and a group of fishermen at the water's edge. All the animals started sniffing around the vehicles and the closed buckets at the rear of the vehicles before being chased away. Several of the animals moved to the fishermen in the water and stood in the water watching, while the rest continued to loiter around the vehicles despite being yelled at, chased away and having sand kicked towards them. After a couple of minutes 08Purple13f & one UT15 moved back to the dunes but the remaining four pups stayed loitering around the vehicles and fishermen. Ranger 7028020 was approached by one of the fishermen asking if there was something they could do to deter the dingoes. It was suggested that they move away from the area, but if they were going to stay they should continue chasing them away and put all buckets in the car. Ranger continued to observe for about 15minutes before moving away.</p>

Date (of Interaction): 30/10/2015

Time (of Interaction 24hrs): between 12:00-14:00

Location (of Interaction): Gabala CZ

Reporting Officer/s details: 7028728

Details of person(s) involved in dingo Interaction.

Name: sch4p4 (6) Personal information

Address:

Phone: sch4p4 (6) Personal information

Visitor type: Camper

Question 1: Detailed report of events.

sch4p4 (6) Personal information and his wife left camp between 12pm and 2pm on 30/10/2015 heading towards Eurong Resort and passed some dingoes on the beach. When they returned to the camp they observed a female adult dingo and two pups (possibly 08puple and two UT15 juveniles) leaving the area and discovered a rip in the tent. Although they had been made aware of the dingo safe messaging, attractive items of hand cream and toiletries had been left in the tent. However, the couple reported that they were fairly certain that nothing had been stolen. Although the dingo believed to be involved is 08Purple13f and two UT15 juveniles, the actual tent rip was not observed therefore this record is documented as being an unidentified dingo.

Question 2: What were the actions of the dingo(s) during the Interaction? (click on box(s) to check/uncheck)

Code C - Nuisance or problem.

- ☐ Loitering at recognized visitor sites (people nearby)

<p>Question 1: Detailed report of events.</p> <p>Female camper was using toilet tent approx 30m away from tent site, when she exited to see 2 Juvenile Dingoes outside. She stopped walking and yelled at Dingoes to 'go away'. The dingoes were walking towards her. They came within about 6 metres. The female camper said she became frightened and went back into the toilet tent and zipped it up and called for her Father and partner to come and help her. Two male adults came over to the toilet tent who yelled at and chased away the 2 Dingoes towards the beach. The dingoes slowly moved away.</p>

<p>Question 1: Detailed report of events.</p> <p>About 02:00 visitor was woken up by a crunching noise coming from just outside his tent under the annexe. He got up and saw 1 dingo chewing on a plastic clip-lock box stored near their tent. The dingo had not managed to get into the box. As the camper scared the dingo away he observed another 5 dingoes in very close proximity. As he continued to yell 4 of the dingoes moved off, with the last two moving off slowly. The dingoes moved down from the top of the dune and proceeded to play-fight at the base of the dunes before heading off south down the beach.</p>

<p>Date (of Interaction): 27/12/15 Time (of Interaction 24hrs): 16:16 Location (of Interaction): Just north Cornwells CA Reporting Officer/s details: 7028020</p>	<p>Details of person(s) involved in dingo Interaction. Name: [redacted] (6) Personal information Address: Phone #: Sch4p4(6) Mobile Visitor type: Independent</p>
<p>Question 1: Detailed report of events.</p> <p>I (ranger 7028020) was travelling between the QPWS workshop and the QPWS office at Eurong when I was approached by a visitor who wanted to report someone in a white Hilux ute feeding a dingo up the beach. I got some details off the visitor and said I wanted to drive up and try and find the ute but asked where they were heading so I could have a talk with them and get their statement. He said they were just heading to Eurong and his partner had photos on her phone of the vehicle and the registration. I said I'd meet up with them in Eurong shortly. As I started driving north up the beach I radioed another QPWS vehicle that was travelling south and asked them to keep their eyes open for the dingoes and any white Hilux utes that may be in the area as I had just had a report of someone feeding the dingoes. The other vehicle radioed back that they were travelling south between Gabala and Cornwells CZs and had just come across the dingoes but that there was no white Hilux ute in the area. I asked them to stay with the dingoes and I'd travel towards them to see if I could spot the ute coming towards me. When I met up with the other vehicle at the northern end of Cornwells I had not seen a white ute pass by me, and they hadn't seen one in the vicinity either.</p> <p>2 adult dingoes and 6 2015 juveniles were in the area loitering around vehicles and fishermen and headed into the dunes and Cornwells CZ.</p> <p>After I spoke to a fisherman about their unsecured bait I drove back to Eurong to talk to the witness and get a statement.</p> <p>sch4p4(6) Personal information stated that he and his family had been travelling south along the beach when they came across about 8 dingoes on the beach. They stopped to take photos and observed a white Hilux ute (registration [redacted] (6) Personal information) in front of them throwing what looked to be chips out the driver's side window to a juvenile dingo nearby. sch4p4(6) Personal information got a couple of photos (attached) and then they approached the vehicle and through the window told them to 'stop feeding the dingoes'. The driver of the other vehicle just laughed at them and mimed putting food in their mouth. I viewed the photos on the mobile phone and requested that they e-mail them through to the dingo.ranger e-mail address which they did at 17:10.</p> <p>I ran a compliance report and found a vehicle permit and associated camping permit for a group booked into Camp Zone 8. I left a message, and follow up e-mail, on the phone at Waddy Point for the rangers up there to keep an eye out for the vehicle. I also sent the e-mail to rangers at Dundubara and Eurong in case anyone else came across the vehicle as well.</p> <p>Further details were also sent through to SR Fraser North and South, SR Compliance, RIC North and South.</p>

Visitor type: Camper

Question 1: Detailed report of events.

Rangers 7026936 & 7027236 received a report from Tag Along leader (6) Personal information that he had witnessed a lady on the beach the evening before getting her two children to feed the young dingoes for photo opportunities. She also tried to give the dingo a bowl of water (6) Personal information had approached the lady feeding the dingoes and told her not to do it and she became abusive and told him she would continue as they were starving.

sch4p4(6) Personal information pointed to where they were camped not far from his tag-along camp. He also showed the rangers a photo of their vehicle registration (6) Personal information a white ute.

Rangers 7026936 & 7027236 approached the campsite and ranger 7026936 requested the two adults bring him their licences as we'd had reports of some issues here. The male camper brought his licence first and said that it was not him feeding the dingoes and that he had told his camping partner not to feed them. The female camper, sch4p4(6) Personal information provided her licence and said that she knew not to feed them she had received all of the brochures. When asked why she said "stupidity" and that she had had a few drinks. 7026936 proceeded to issue an infringement notice while 7027236 provided education (6) Personal information and her children (6) Personal information said that 'they weren't dangerous' as they were only young indicating that she was interacting with more than one juvenile dingo.

When they returned they found the esky lid upright and many food items missing. Contents taken included: 24xSausages, 8 burgers, 1kg bacon, ham, 3xPizza's, Cheese, tub of butter. Some steaks were left. Some teeth marks could be seen on the latch of the plastic esky (photo attached to email).</p> <p>The campers thought that the esky was safe as it had a plastic latch, the lid was heavy with ice packs attached to it and they also placed a table on top on it before they left. They had seen, read and discussed the brochures with pictures of flat-strapped eskies and didn't realise it was that serious. They said they wouldn't store food in there any more and were using it only for glass bottled drinks.</p>

<p>Question 1: Detailed report of events.</p> <p>While doing patrols, Rangers came across a tent that had been ripped into by a Dingo/es. There was a loaf of bread just outside the tent that had been ripped open, and looked to be have dragged out from the tent and eaten. Inside the tent there was also a packet of biscuits that had been ripped into and eaten. No campers were present at the time, however Rangers caught up with the campers the next day and gave them a PIN as they had previously received a Notice to Comply. At the northern end of the Cornwells Camp Zone there were 4 Juvenile Un-tagged Dingoes and at the Southern end 1 Juvenile Un-tagged Dingo in the area at the time of the tent ripping.</p>

Question 1: Detailed report of events.

Person reported that as they drove on the beach around the Eurong area, they saw a couple of juvenile dingoes going from the dune to the beach. Dad was taking photographs outside his vehicle and left his sandals on the ground a couple of metres from him, one of the juvenile animals approached and stole one of his shoes and ran off with it to the sand dune. I told the group reporting this we do not like people getting out of their vehicle and approaching dingoes for photographs as it leads to habituation and is dangerous for dingoes and other motorists.

<p>Question 1: Detailed report of events.</p> <p>sch4p4(6) Personal information and incident: A friend stopped their car on Waddy Point beach to look at a dingo sniffing around the car of a fisher who was in a gutter up to his knees. They observed the dingo then walk towards the man who got out of the gutter and turned around to cast and finally saw the dingo approaching to within 3 metres. The fisher waived and yelled at the dingo to scare it away, but the dingo's response was to bounce around like a dog who wants to play. The man kept waving and the dingo finally lost interest and left trotting on the beach. The lady showed me photos on her phone and it looked like an adult male animal, too far and unclear to distinguish a tag.</p>

<p>Question 1: Detailed report of events. On Thursday morning at 0657hrs, Ranger 7028728 was contacted by Ranger 7023725 regarding advice that was given to him, of a sighting of a dingo in the grounds of the Eurong Resort. Ranger 7028728 was requested to patrol the fenced area to determine any areas of obvious breach of the fence. While undertaking this inspection, ranger 7028728 was advised by other rangers conducting inspections, of a gate that was found ajar. At approximately 0730hrs the dingo was confirmed as being within the fenced area, as well as members of the public (Tag along leader) providing advice of where the dingo was last seen. At 0820 hrs the dingo was sedated with a blow dart and was removed from the Resort premises.</p>

Question 1: Detailed report of events.

An off duty QPWS ranger witnessed a person sitting down right next to the car, holding her hand out to feed a nearby juvenile dingo while her husband stood back filming with a video camera. The person asked to see where the dingo was and then put a piece of what was later confirmed as sausage on the ground within 0.5m of her legs and the dingo slowly came in and ate it. At this point the off duty ranger drove towards the woman and the dingo beeping their horn. The woman stood up and the dingo backed away. The off duty ranger made contact with rangers in the office to report the interaction and two rangers drove towards the area.

and her husband had got into their car and started driving north along the beach and the on-duty rangers were able to stop them up the beach. The rangers then spoke to the person and her husband asking to view the footage from the camera. They agreed to them viewing it and returning to the office for a copy. When the rangers arrived back at the office the footage on the camera was filmed on a mobile phone (no-way to download the footage) and the camera was given back to the person. A PM for feeding was issued to the person and rangers went through the dingo safety messaging with them again.

<p>Question 1: Detailed report of events. Off duty ranger 7027110 was walking along beach with family. Observed two dingoes walking south along beach. One dingo 20Blue15F approached within 2 metres. Stayed in area for approx. 1 minute retreating when 7027110 flicked sand at it then approaching again. Other dingo (unidentified adult male) stayed outside 10m distance had tagged but unable to identify colours.</p> <p>Dingoes moved south along beach to a couple that were sitting on the back tray of a triton ute. 20B15F approached vehicle under ute tray while occupants sat above them taking photos. Dingo was <1m from visitors. Large male dingo remained in the area at a safe distance.</p> <p>A Nissan patrol was driving south down the beach and saw the 2 dingoes. Driver stopped vehicle in close proximity to dingoes then proceeded to get out of vehicle with 2 young children and approach the dingo 20B15f. Man approached within 10cm holding out the back of his hand to the dingo - dingo possibly licked his hand but I could not see clearly from my distance. At this point I started yelling from 30m away. Off duty ranger 7023725 drove car toward occupant honking horn. Both rangers then spoke to driver about inappropriate dingo behaviour and safety especially relating to children. Dingoes where chased away from scene.</p> <p>At this time a Sunset Safaris tour bus had stopped near dingoes to south. When ranger 7027110 moved south he observed that the tour bus operator had exited the bus along with at least three of his tour guests. Driver was crouching down encouraging the dingo approximately 3-4 m away while passengers were behind taking photos. 7027110 advised driver that this was not appropriate.</p>

<p>Question 1: Detailed report of events. 20Blue15F was observed lying down behind a group of backpacker vehicles with backpackers standing 5m away. Ranger 7026936 drove his vehicle towards the dingo/backpackers to ensure the dingo was not being encouraged. The dingo continued to lie in the same spot so ranger 7026936 attempted to deter the dingo with "Spray Shield" 1% citronella animal deterrent spray from a distance of 2m. The spray made contact with the dingoes face and eyes; however appeared to be undeterred aside from initially jumping back at the sight and noise of the spray coming from the can. The dingo continued to loiter around the backpackers for a short time until they left to enter the Eurong fence line. The dingo then moved south along the beach.</p>

Visitor type: Camper

Question 1: Detailed report of events.

Sch4p4(6) Personal information and a friend are regular visitors to Fraser Island but this is their first time camping on the beach. Person was sitting at the front of his tent and his friend was sitting on the dune about 10 metres away. Their tarp kitchen was right in between them with a couple of eskies on the ground. Person reports seeing a dingo appear out of nowhere to under the tarp, started to chew at their esky less than 5 metres from both of them. Person got up and yelled at it, clapped his hands, the dingo trotted off, but not really that scared of the men. The animal was described as a pretty big male, but no tag was observed as the men didn't think to look for one, so no ID is possible.

Name: Palace tag along tour participant Address: Fraser Experience Tours unmarked bus Phone #: Visitor type: Tag along tour</p>
<p>Question 1: Detailed report of events.</p> <p>Reported initially by a Fraser dingo tag along tour leader to Fraser Island police at 1220. FI police then passed on report to ranger 7027110 who went to gather further information at Lake Wabby beach carpark with ranger 7026804 at 1257. Limited information was gathered at the time as the Palace tag along tour involved and witnesses to the interaction had left the area.</p> <p>On the 14/02 ranger 7026936 received information regarding this interaction from the witness (Fraser dingo tag along leader) who originally reported the interaction to QPS on 12/02. According to this witness a female member of a palace tag along tour group had gone into the ocean for a swim (50m from the group). She apparently layed down to let the waves wash over her and at this point a male dingo with an orange tag started to run towards her from the car park. There were 2 other dingoes that remained in the car park that were apparently watching the orange tagged dingo. People from the car park were shouting to the female swimming alerting her to the dingo heading toward her. She left the waters edge and made it back to other members of her tour who had started walking towards her from the car park. By the time she had made it to this group of people from her tour, the dingo made it to 3m from her. The orange tagged dingo continued to loiter in the area with the other 2 dingoes whilst the palace group entered their vehicles and left.</p>

interaction.

☒ Yes ☐ No Briefed by tour operator

Question 7: Follow up actions.

- ☐ NTC Issued
☐ PIN Issued
☒ NRM ranger notified

Details of further actions: The dingoes involved are members of the Eurong pack. Fortunately in this circumstance there were many other people close by to reduce the chance of a high risk dingo interaction. If these dingoes encounter people on their own it is possible that they will continue to display high risk behaviour as they did in the code E interaction on the 4/02/16. Aggressive dingo signs should be installed at all visitor sites throughout their known territory. Condition reports should also highlight the need for caution in these areas. Briefings throughout open camp zones should also highlight the situation to campers.

<p>Question 1: Detailed report of events.</p> <p>Rangers 7026804 + 7027110 were responding to report of concerning dingo interaction at Lake Wabby beachfront. On arrival, we noticed a dingo lying (resting) behind a parked car. Ranger 7027110 was able to move to within 10m of the dingo to establish that she was tagged 20Blue in her right ear. She awoke at this point but was not perturbed by ranger presence. Ranger 7027110 chased her away by brandishing a stick over his head (she was difficult to discourage) to the northern extent of the carpark, but within 2 mins she trotted back past within 10m of ranger 7027110. There was a group of four persons nearby, plus two hikers, but 20Blue15F did not approach them. <p>Question 1: Detailed report of events.</p> <p>Campers reported having 5 dingoes around there camp throughout the Sunday night on 14/15th. The dingoes stayed away from the campers themselves but stayed around the camp. In the camp there were 10 males in there late 20s. This camp was in Cornwells Camp Zone which is currently closed. Campers also had a fire, in which they were sitting around when the dingoes approached. The campers did not deter the dingoes as they didn't believe they were a problem and campers went to sleep with the dingoes still loitering around there camp. At approx 7am the campers awoke to having 2 dingoes still loitering around there camp. The campers assured me that the dingoes did not have any access to food or rubbish. The campers could only id 2 of the 5 dingoes seen.</p>

<p>Question 1: Detailed report of events.</p> <p>Shortly after sunset, I noticed two dingoes hanging around their camp. Himself and his camping friends where all aware of this so they consistently yelled at the dingoes to try and move them on but they would not leave. At best the dingoes ran a few metres and shortly returned. This continued for most of the night until they went to bed around 2:00am. I noted that at times up to four dingoes where present, one having a green tag in it's right ear. They had a good inspection of their camping equipment the next morning and nothing had been disturbed.</p>

<p>Question 1: Detailed report of events. Two QPWS rangers spoke to a group of tourists near the Lake Wabby toilets on their way out of the lake walking track, they reported a dingo following them, who was their tour guide, confirmed that a dingo had "been there all morning following people in and out of the lake, but no teeth bared". Several people showed me videos and photos very clearly identifying a juvenile female with a blue tag, some of the shots were very close up, probably about one metre or so. People said the dingo was showing no fear at all passing people within touching distance. Some people said they tried to deter her to no avail. At around 3:30 QPWS Ranger saw the Blue Tagged Female again following a group of tourists who then passed my colleague and I working with noisy machinery (Power carrier). She disappeared for about 1 minute after I chased her but returned and followed us at a distance of 5-10 metres for about 100 metres back to the carpark where she proceeded to sniff around cars and loiter around people. I briefed a couple of hikers who were taking photographs. QPWS Ranger spoke to 2 tag along leaders who said she hadn't been aggressive.</p>

Question 1. Detailed report of events and how the dingo(s) behaved. *(sch4p4(6) Personal information)*

One person and her friend walked down to the beach to watch the sunset. They saw a dingo approaching from the north and moved towards another pair of women so they were in a group. When the dingo (identified as 15Green15m from description and photos) approached the other two women left. The dingo got to within 0.5m and started to lunge towards the women, mouthing and causing a noise. The women and her friend moved away from the dingo but it followed them and started to circle around behind them.

At this stage, a person who was nearby, put himself between the dingo and the ladies and tried to deter the dingo by moving towards it. The dingo would move back towards the person as he approached but would come back again and continued to circle around behind him towards the women. After about 5mins the dingo seemed to lose interest and walked away.

(sch4p4(6) Personal information) Observed the dingo walk towards another couple who were walking on the beach and saw the dingo display the same behaviour. As the dingo and the couple passed by, he walked towards it again and it moved off and into the dunes.

Question 2: What were the actions/behaviours of the dingo(s) during the Interaction?

Question 1: Detailed report of events.

QPWS Rangers had given hikers and his travelling companion a dingo briefing at Eurong beachfront around 18:00 hrs.

They informed QPWS Rangers that they were camping for the night at Govi CZ.

At around 19:00 hrs while hiking on the beach towards their camp, they noticed a dingo following them.

The dingo followed closely (within 3 metres) for some time and started yelping at the dingo.

The dingo followed for a short while longer but eventually left.

This is when [redacted] rang the dingo hotline (received dingo safe business card) and spoke with ranger 1423683

[redacted] could not identify the dingo as it was dark and he only had the light from his phone.

<p>Question 1: Detailed report of events. Ranger 7028728 was fishing after work with Ranger 7026858 approximately 100m further north along the beach. Ranger 7026858 started walking back towards 7028728 when she noticed two dingoes in close proximity to him. When she was in range she alerted to him their presence, at this stage the dingoes were within 10 meters. The dingoes were able to be identified by a Green tag left ear and Pink tag right ear (15Green15M, 15Pink15F). Over the next 10 minutes both rangers tried to consistently move the dingoes on by shooing and flicking sand towards them. When this occurred they would momentarily move back but would consistently return to about 5 meters distance. The dingoes only left when they noticed a group of Tag along campers walking down the beach in their direction.</p>

<p>Question 1: Detailed report of events. Off duty Ranger was walking to the beach to fish and observed several cars stopped at the front of the resort, some people standing and 2 dingoes coming towards them, the interaction then was blocked by the vehicles and Ranger couldn't see clearly. The leading vehicle of a RBAC group seemed to intervene and drive between the animals and the people. The dingoes proximity to the people still couldn't be seen or their behaviour. When asked the RBAC leader (believed to be a family) said the dingoes were getting a bit too close to a family with kids, when asked how close, he just replied "too close". So I thanked him and kept walking to a group of 3 adults now being confronted by two juvenile dingoes identified as Green15M and Pink15F. They kept harassing the group coming to within 5 metres for at least 20 minutes. I waved a stick at them aggressively several times, but they came back continually and only lost interest when another group of fishers came about 50 metres south of us, then eventually moved on towards some vehicles and a bus. They were on the beach around the people recreating from the time I arrived at the beach around 4:45 (they had been there from 3 pm at least according to a report from a family fishing on the beach) and were still hanging around at 17:45 when I got home.</p>

<p>Question 1: Detailed report of events.</p> <p>Ranger 7028728 was conducting a beach patrol heading north towards the northern end of Gabala C.Z when he observed a Fraser Discovery Bus pulled over on the dune side of the beach. From a distance of approximately 80 meters it was observed that there was a dingo within close proximity, on the dune side of the vehicle (approximately 3 meters). Approximately 10 Patrons were observing and crouching down to take photographs of the dingo on the eastern side of the bus. The distance from the dingo to the patrons was observed to have been <15 meters. As the ranger continued to get closer to the vehicle, at approximately 50 meters the dingo spotted the ranger vehicle and moved back behind the vegetated dunes, as this was occurring the patrons were getting back onto the bus. Shortly after the bus continued south down the beach. On reaching the location where the dingo had entered the dunes two dingoes were observed in the closed camp site.</p>
