Hi Diana,

Will see what we can do, though no guarantees, as it's a bit short notice and GC is also experiencing staff shortages at present.

Cheers,

Sergio Norambuena

Hi,

I'm sending you this on behalf of Andy Dutton as he has had to 73(2)Irrelevant

We are thinking of doing a planned burn in the Mount Gillies section of Mount Barney National Park starting on either Tuesday 4th August or Wednesday 5th August next week (most likely Wednesday) through until around Monday 10th August.

It's a fairly large and relatively complicated burn so we will need an additional three crews each day and one night/swing crew each night. We can provide accommodation in Boonah for any crews who need to stay nearby.

Are any of you able to provide us with crews (with a vehicle) for this burn? I know it's a good burn window so you are probably all doing the same thing!

Thanks!
Diana

Darren

Can you please organise for a map that provides a fire burn history that cover the Scenic Rim State Govt electoral boundary. Might need a couple to cover it in the required detail. Masking type exercise that shows burnt unburnt over a period of time. Give me a call if you need to discuss further.

Cheers

Steve

Big area – Lamington, Main Range, Barney all had decent fires last year…. Wonder what the main discussion points will be..

This fire masking map demonstrates relatively well what QPWS has been able to achieve with fire management, not many areas outside prescription. Notice some new acquisitions within Scenic Rim electorate are showing up red… other parts that have been park for a while relate to cliff edges, watercourses, ridges trapped by rainforest/gorges, etc.... Some sections of Tamborine seem to be an anomaly… Plunkett and Wickham out of SR Electorate.

Subject: No burns for Brisbane South this week

Hi All,

Just so we're all on the same page there will be no prescribed burns happening this week in Brisbane South (i.e. proposed for Plunkett 2014/2 - 11.2ha of 19.6ha and Mt Gillies 2016/2 – 1040ha).

After discussions with RICS a combination of wind, wet tracks, staff availability, close to September, rain coming on Saturday, unstable atmosphere, etc had led to the cancellation of burns this week.

Gillies is likely to be off now till next year till we get some more stable weather patterns (around May); we may still have a shot next week to do another section of the Plunkett burn (we'll see what the wind does).

This will hopefully give you some breathing space which I know you'll all appreciate.

Cheers,

Andy

Hi Andy

I'm keen to get an IAP or SMEACS up so that there is some evidence of strategy around our approach – I started an IAP this afternoon (prob should just have used a SMEACS form) – link follows. It needs a bit of work put in by someone who really knows whats going on and what we are trying to do out there.

Note this and a couple of other docs are on our Greater Brisbane sharepoint site (hit link below or navigate to it by selecting Greater Brisbane under 'Operational areas' from the menu on the LHS of the Regional Sharepoint page, then hit the new 'Incident management' link, then the Boonah Base link, then the Mt Gillies WF Aug 2020 link). As proposed at RLT, this is where all of our rosters, accommodation arrangements etc should be stored.

HI Guys,

Started up the Gillies roster via spreadsheet (a slight modification to the one you and AK developed Cherie) to keep track of things,, Justin says things are pretty quiet down there atm which is good.

Blue highlight indicates break to reset the fatigue clock. You'll see we juggled things a bit to still have locals around so they all don't get to 4 days together.

Also highlighted when the 4D shift has arrived to easily see when rest day is required.

This isn't gospel and totally up to date. There needs to be some updates / additional information put in…

Anyway thought you could use this for tracking going forward.

Has a State Wide Roster been developed for the upcoming fire season so we all get used to one roster format…..???? ☺

Attachment : image001.png;image003.png;

Hi Ally,

As discussed could you put a sitrep on for the Gillies fire.

At 1130 28oC, 31%rh, 14kmh SW gusting to 25kmh

Justin contacting neighbours to inform.

Crews have inspected fires on site.

Fire travelling 1m every half hour even uphill

Received 15-20mm of rain over fire ground…XXX look up dates details on BOM

On ground attack not achievable as terrain too rugged, slippery gravel on slopes, broken vertical cliffs, bluffs and ravines.

Follow up if used waterbomber determined by on ground staff to not be achievable.

At 1412 hrs SW wind 4kmh gusting to 25kmh, 32.9% RH, get temp from Justin..

Crews to keep monitoring fire through unfavourable weather over next few days. Hoping to start significant containment options next Monday when weather improves.

Get more from Justin if required..

Cheers,

Andy
