

Compliance certificate

Strategic Cropping Land Act 2011

Strategic cropping land compliance certificate: SCLRD2013/000132

This certificate is given under s. 118 of the Strategic Cropping Land Act 2011, by the administering authority for the resource activities specified in this certificate, to be undertaken in accordance with the conditions in the specified part of the strategic cropping land standard conditions code for resource activities dated December 2012 (the SCL code).

This certificate was given on: **05 April 2013**

Certificate holder(s)	Address
Arrow Energy Pty Ltd	Level 19, 42-60 Albert Street, Brisbane, QLD 4000

This certificate is for **Part 3** of the SCL code.

This part of the SCL code entitles the holder to conduct resource activities on SCL or potential SCL that comply with Part 1, 2 or 3 of the SCL code (subject to all other required approvals).

Resource activities	Environmental authority	Location(s)
Water and gas pipelines, exploration wells, seismic surveys and proposed CSG treated water discharge release point.	PEN100449509	PL194, PL198, PL230, PL238, PL252, PL258, PL260

Notes:

- Sections 76 and 77 of the *Strategic Cropping Land Act 2011* outline offences and penalties for permanently or temporarily impacting on strategic cropping land or potential strategic cropping land without a resource authority for the resource activity.

The conditions under the specified part of the SCL code for carrying out the resource activity on SCL or potential SCL are taken to be conditions of the environmental authority. Therefore, if conditions of the specified part of the SCL code are not complied with, there is no authority to undertake the resource activity.

Strategic Cropping Land compliance certificate

2. It is your responsibility to ensure that all required financial assurance is paid prior to carrying out, or allowing the carrying out of, any resource activities on strategic cropping land or potential strategic cropping land, in accordance with the SCL code.

Hi Carmen,

Could you please follow up on this enquiry? Looking at the spreadsheet, it appears that this compliance certificate was issued on the 5th April - is there any reason why the client may not have received it yet?

Subject:

Good morning,

We have received this payment (please see attached), however there is no reference for us to match it to any outstandings.

Can you please provide more detail/s such as invoice number, permit reference, sit, activity etc so we can allocate it correctly?

The quoted invoice reference (22/0730125080) is not familiar to us. I am wondering if the payment may be meant for the Department of Natural Resources and Mines for one of their mining fees?

Please advise.

Thank you.

Best regards,
Liam

Subject: RE: EA amendment application for PEN100449509
Attachments: DXP EM Plan_Rev 4 20120823.pdf

Hi Amy,

I've only been able to attach the EM Plan as that is the only document small enough to attach to an email but that won't really give you anything about the proposed amendment. Basically Arrow are applying for:

- An additional 200km of seismic surveying; and
- The amendment of the location of the discharge point for the existing approved release of treated coal seam gas water from an un-named tributary of Wilkie creek under wet conditions to Wilkie Creek on a variable flow basis; and
- A groundwater injection trial

Do you have access to our files at all? If so, I can give you the file path so you can access the rest of the supporting information.

Also, we have sent a pretty comprehensive information request in relation to the groundwater injection trial component of the amendment which is to be submitted to us on 12 April 2013.

Feel free to give me a call about it.

Cheers

DATE

--	--	--

This form is to be used to apply for a strategic cropping land (SCL):

- protection decision (section 95); or
- compliance certificate (section 116)

for resource activities located on SCL or potential SCL pursuant to the *Strategic Cropping Land Act 2011*.

This form is relevant to proposed resource activities under the *Mineral Resources Act 1989*, *Petroleum and Gas (Production and Safety) Act 2004*, *Petroleum Act 1923*, *Geothermal Energy Act 2010*, *Geothermal Exploration Act 2004* and *Greenhouse Gas Storage Act 2009*.

Use this form when:

- Applying for an environmental authority or amendment to an environmental authority which relates to a resource activity that will be located on SCL or potential SCL. This is the case even where a compliance certificate or protection decision already exists as a result of a previous environmental authority (or amendment to an environmental authority) application.

Do not use this form when:

- Applying for an environmental authority or amendment to an environmental authority which does NOT relate to resource activity that will be located on SCL or potential SCL.
- The environmental authority application is excluded from all of the SCL Act (see Chapter 9, Division 2).

An environmental authority for resource activities that will be located on SCL or potential SCL cannot be issued until an SCL compliance certificate has been given, or an SCL protection decision has been made, where applicable.

Application for an SCL protection decision or compliance certificate

Part A – General

Question 1

Resource activities include entry on land that is SCL or potential SCL.

Any future applications to amend the environmental authority that results in resource activities being located on SCL or potential SCL will need to meet the requirements of the SCL Act. This may include the need to make an application under the SCL Act for an SCL assessment.

1. Will any resource activities proposed under the related environmental authority application be located on SCL or potential SCL?

- ☒ Yes → Go to Question 2
☐ No → Do not complete this form. No SCL application is required.

Question 2

The applicant must be a person or entity that has applied for, or may apply for, a resource authority or an environmental authority for the resource activities.

2. Applicant details

NAME Arrow Energy Pty Ltd	ABN/ACN ACN:078521936
ADDRESS AM-60 Level 19, 42-60 Albert St	
SUBURB Brisbane	POSTCODE 4000

- ☐ There is more than one applicant for this application and the additional applicant(s) details have been identified in Appendix 1 of this form.

Application for an SCL protection decision or compliance certificate

Question 3

The contact person may be a consultant or some other person acting on behalf of the applicant. If a contact person is nominated, all dealings and correspondence with the applicant will be through the contact person.

3. Contact person

TITLE Mr	NAME sch4p4(6) Personal	
COMPANY Arrow Energy Pty Ltd		ABN/ACN
ADDRESS AM-60 Level 19, 42-60 Albert St		
SUBURB Brisbane		POSTCODE 4000
PHONE Section 78B(2)	FAX 07 3012 4001	EMAIL sch4p4(6) Pers@arrow energy.com.au

Question 4

For resource authorities that are under application, attach information that identifies the resource authority boundaries (provided in the resource authority application).

4. Resource authorities

List all resource authorities subject to this application:

RESOURCE AUTHORITY TYPE	NUMBER (IF KNOWN)	STATUS (APPLICATION/ GRANTED)
Petroleum Lease	194	GRANTED
Petroleum Lease	198	GRANTED
Petroleum Lease	230	GRANTED
Petroleum Lease	238	GRANTED
Petroleum Lease	252	GRANTED
Petroleum Lease	258	GRANTED
Petroleum Lease	260	GRANTED

- ☒ For any resource authority application listed above, attach information that identifies the boundaries of the resource authority (e.g. blocks and sub-blocks, metes and bounds or real property description (lots on plans)).

Application for an SCL protection decision or compliance certificate

Question 5

The description of the land may include a street address or property name and locale descriptor (e.g. 15 km NE of Dalby).

5. Description of the land

The application relates to 1,256km² of land which is located in the Surat Basin and is located predominantly to the South and West of Dalby.

Question 6

For a new environmental authority (application), provide a reference number and date the application was lodged.

6. Environmental authority

Provide details of the relevant environmental authority for the resource activities.

For an existing environmental authority, provide the environmental authority number.

PEN100449509

Question 7

The strategic cropping land (SCL) trigger map is a statutory map under the *Strategic Cropping Land Act 2011* (SCL Act) that identifies the location and extent of SCL and potential SCL and the protection/management areas. It can be found on the Department of Natural Resources and Mines (DNRM) website at www.dnrm.qld.gov.au and navigating to the strategic cropping land webpage. The Interactive Resource Tenure Mapping (IRTM) software also includes an SCL map layer.

The decision register, which lists the outcome of validation applications, can also be found on the DNRM website.

By electing to treat potential SCL as SCL in this application, the land is taken to be SCL for deciding this application only. This election does not make the land SCL under the SCL Act and the land continues to be potential SCL for any other person (s. 84 SCL Act).

7. Status of the land (tick all that apply)

(a) The tenure(s) is located in:

- ☒ a protection area:
☒ southern
☐ central
☒ the management area

(b) The tenure(s) contains:

- ☒ Potential SCL as shown on the SCL trigger map → By ticking this box you elect to treat this part of the land as if the land were SCL.
☐ SCL → You must attach one of the following for each lot on plan that is decided SCL:
☐ the validation information notice(s)
☐ the registry record(s) (SCL)

Question 8

Provide as much detail as possible about the specific resource activities proposed under the application. For example, ten exploration wells, five production wells, 20 km of access tracks etc.

8. What resource activities will be located on SCL or potential SCL?

Water and gas pipelines, exploration wells, seismic surveys, proposed CSG treated water discharge release point.

Question 9

The development footprint includes infrastructure or proposed infrastructure relating to the resource activity, in addition to the items listed in section 85(2) of the SCL Act, which

9. Map

Provide a map that identifies or describes:

- ☒ the location of all SCL or potential SCL

Application for an SCL protection decision or compliance certificate

includes, among other things, buildings and structures.

Where the exact location of the development or resource activities is unknown, a map(s) that identifies the resource authority boundaries and the SCL and potential SCL within those boundaries is the minimum amount of information that can be supplied for this requirement.

You should provide the specific locations of major infrastructure located on SCL or potential SCL.

Question 10

The SCL standard conditions code can be found on www.dnrm.qld.gov.au by searching for the strategic cropping land web page.

You must be able to comply with the SCL code to apply for an SCL compliance certificate.

If you cannot fully comply with the code, you must apply for an SCL protection decision.

Note: Not all resource activities provided for under a Code of Environmental Compliance (e.g. Exploration and Mineral Development projects) made under the Environmental Protection Regulation 2008 are able to comply with the SCL code.

Question 11

Refer to the SCL code for the list of resource activities and conditions to determine which part of the code you may be able to comply with.

The SCL code does not allow for permanent impacts in a protection area.

Question 12

No additional impact means: A resource activity approved under an environmental authority is subject to amendment but the amendment will not result in any additional impact to SCL or potential SCL. There must not be a change to what the activity is, or an increase in the footprint size or impact to SCL or potential SCL. An example of no additional impact would be where the location of a resource activity is changing.

What evidence is required to demonstrate that there will be no additional impact to SCL or potential

- ☐ where the development is proposed to be carried out on SCL or potential SCL
- ☐ all of the footprint of the development
- ☒ the boundaries of the resource authorities

10. Are you able to comply with the SCL standard conditions code for resource activities (SCL code) for the resource activities proposed on SCL or potential SCL?

- ☒ Yes → I am applying for an SCL compliance certificate. Go to Question 11.
- ☐ No → I am applying for an SCL protection decision. Go to Part B (Question 14).

11. Which part of the SCL code are you electing to comply with?

By answering this question, you certify that you will comply with the part of the code that you selected.

- ☐ Part 1 – no additional impact → Go to Question 12
- ☐ Part 2 – minimal impact → Go to Question 13
- ☒ Part 3 – low impact → Go to Question 13

12. Provide evidence as to why the resource activities proposed on SCL or potential SCL will have no additional impact on that land.

Application for an SCL protection decision or compliance certificate

SCL:

- Details of, and a copy of, the relevant environmental authority highlighting where the activity has received prior approval.
- Details of why the amendment to the resource activity will not result in additional impacts to SCL or potential SCL, beyond what was previously authorised in the environmental authority.

Note: Part 1 or any other part of the SCL code does not authorise permanent impacts on SCL or potential SCL in a protection area.

Question 13

The SCL code is divided into three parts.

The same part of the SCL code means:

- (a) for part 3—part 3
- (b) for part 2—part 2
- (c) for part 1—part 1

The relevant part of the SCL code means:

- (a) for part 3—parts 1 and
- (b) for part 2—part 1.

For more information, refer to section 6 of the Strategic Cropping Land Regulation 2011.

For the purposes of a reissue of a compliance certificate, Version 1 (December 2011) of the SCL code is equivalent to Part 3 of the SCL code (December 2012)

13. Reissue of compliance certificate

Does this application meet ALL of the following criteria:

- (a) This application relates to an application for amendment of an environmental authority; and
- (b) A compliance certificate already exists for the above mentioned environmental authority; and
- (c) The activities proposed under this application can comply with the same part or a relevant part of the code as the existing compliance certificate.

- ☐ Yes → this application is subject to the lower 'reissue' fee
- ☒ No → this application is not subject to the lower 'reissue' fee.

Go to Part C (Question 17).

Part B – Protection decision only

Question 14

Carrying out development on SCL or potential SCL has a permanent impact on the land if—

- The carrying out impedes the land from being cropped for at least 50 years (legal or physical impediment); or
- Because of the carrying out, the land can not be restored to its pre-development condition; or
- The activity involves open cut mining or storing hazardous mine wastes, including, for example, tailings dams, overburden or waste rock dumps.

Important: If the outcome of the SCL protection decision application is that a resource activity will have a permanent impact on SCL or potential

14. Permanent impacts (protection decision only)

If, in question 7(a) you answered that the resource activity subject of this application is in a protection area, answer the following question, otherwise, go to Question 16.

Will any resource activities proposed under this application have a permanent impact on SCL or potential SCL in a protection area?

- ☐ Yes → Go to Question 15
- ☐ No → Go to Question 16

Application for an SCL protection decision or compliance certificate

SCL in a protection area, the development will not be permitted to proceed without an exceptional circumstances determination or transitional status (see question 15).

Question 15

If you are eligible for exclusion of the permanent impact restriction, you do not need an exceptional circumstances determination to have a permanent impact in a protection area. However, you must attach evidence to your application which demonstrates your eligibility. Refer to sections 286 – 289 of the SCL Act for full details.

15. Is the development in exceptional circumstances?

- ☐ Yes → You must attach one of the following:
- ☐ evidence that the development is prescribed to be in exceptional circumstances pursuant to the Strategic Cropping Land Regulation 2011; or
 - ☐ a copy of the relevant exceptional circumstances decision.

☐ An application for exceptional circumstances will be or has been lodged and a decision is pending. Provide application reference details:

- ☐ No → I am eligible for exclusion of the permanent impact restriction under Chapter 9, Division 3 of the *Strategic Cropping Land Act 2011*. Supporting evidence is attached.

Question 16

A report is required that assesses the extent of the development's impacts on all SCL or potential SCL on the land; and identifies any constraints on the configuration or operation of the development. It should include the following information:

- What is the resource activity
- How you have avoided and minimised the impacts to SCL or potential SCL (both permanent and temporary impacts), drawing on any constraints on the configuration or operation of the development.
- How will the resource activity be conducted (construction, operation and decommissioning phases)
- The period of time that the resource activity will be conducted
- The potential impacts from the resource activity on SCL or potential SCL (construction and operation)
- Whether the impacts will be temporary or permanent and why.
- If the activity will be temporary, what is the pre-development condition of the land and how will it be restored to pre-development

16. Development impact report (protection decision only)

Provide a report that:

- ☐ assesses the development's impact on all SCL or potential SCL
- ☐ identifies any constraints on the configuration or operation of the development.

Go to Part C (Question 17).

Application for an SCL protection decision or compliance certificate

- condition within 50 years.
- If the activity will have a permanent impact, what are the reasons why the activity cannot be conducted in a way that it would have a temporary impact.

Part C – Financial assurance, application fee and declaration

Question 17

Compliance certificates:

Financial assurance is only required for certain resource activities under Part 3 of the Code.

It is a condition of the code that the required amount of financial assurance is submitted to the administering authority prior to carrying out any resource activities on SCL or potential SCL.

The proposed financial assurance should be calculated using Schedule 1 of the code.

Protection decisions:

This requirement for financial assurance is provided for under the SCL Act (s. 100).

The proposed financial assurance should be based on the costs for a third party to restore the temporary impacts on SCL or potential SCL to pre-development condition.

You do not need to pay financial assurance at the time of lodging your application; however, if you are required to pay financial assurance, this requirement must be met prior to undertaking the activities on SCL or potential SCL.

Financial assurance for SCL purposes is separate to financial assurance/security required for the environmental authority/resource authority. The final amount of SCL financial assurance can take into account the amount of financial assurance paid for the environmental authority for those resource activities that are proposed on SCL or potential SCL.

The Department of Natural Resources and Mines will provide information on how to meet your financial assurance requirements (i.e. acceptable forms of financial assurance, lodgement).

Question 18

The applicable SCL fee can be found at www.dnrm.qld.gov.au or in the Strategic Cropping Land Regulation 2011.

17. Financial assurance for SCL

Financial assurance is required for certain resource activities that will have a temporary impact on SCL or potential SCL. Refer to guidance material for more information.

☐ Financial assurance calculation attached →

SCL financial assurance required \$ _____

sch4p3(2) Business affairs

18. SCL application fee

Type of SCL application: SCL compliance certificate - carrying out a resource activity that complies with the standard conditions code, part 3

Application for an SCL protection decision or compliance certificate

The fee amount depends on what type of application you are making:

1. Compliance certificate

- a) Part 1
- b) Part 2
- c) Part 3
- d) Reissue

2. Protection decision

The application fee is \$ 10,149

You may pay your application fee via cheque, money order or credit card.

Select the payment method below:

☒ Payment by cheque or money order made payable to the Department of Natural Resources and Mines (attached); or

☐ Please contact me (the applicant) for credit card payment

Phone number: _____

Question 19

Where the applicant is a company, this form is to be signed by a person authorised (in writing) to sign for that company and in doing so declares that the corporation will be bound by the conditions associated with the granting of a licence or permit.

19. Declaration

I declare that the information contained in this document, including all appendices and attachments, is true and correct to the best of my knowledge, information and belief. I understand that it is an offence under section 229 of the *Strategic Cropping Land Act 2011* to give an authorised person information, or a document containing information that I know is false or misleading in a material particular.

Compliance certificate

Strategic Cropping Land Act 2011

Strategic cropping land compliance certificate: SCLRD2013/000132

This certificate is given under s. 118 of the Strategic Cropping Land Act 2011, by the administering authority for the resource activities specified in this certificate, to be undertaken in accordance with the conditions in the specified part of the strategic cropping land standard conditions code for resource activities dated December 2012 (the SCL code).

This certificate was given on: **05 April 2013**

Certificate holder(s)	Address
Arrow Energy Pty Ltd	Level 19, 42-60 Albert Street, Brisbane, QLD 4000

This certificate is for **Part 3** of the SCL code.

This part of the SCL code entitles the holder to conduct resource activities on SCL or potential SCL that comply with Part 1, 2 or 3 of the SCL code (subject to all other required approvals).

Resource activities	Environmental authority	Location(s)
Water and gas pipelines, exploration wells, seismic surveys and proposed CSG treated water discharge release point.	PEN100449509	PL194, PL198, PL230, PL238, PL252, PL258, PL260

Notes:

- Sections 76 and 77 of the *Strategic Cropping Land Act 2011* outline offences and penalties for permanently or temporarily impacting on strategic cropping land or potential strategic cropping land without a resource authority for the resource activity.

The conditions under the specified part of the SCL code for carrying out the resource activity on SCL or potential SCL are taken to be conditions of the environmental authority. Therefore, if conditions of the specified part of the SCL code are not complied with, there is no authority to undertake the resource activity.

Strategic Cropping Land compliance certificate

2. It is your responsibility to ensure that all required financial assurance is paid prior to carrying out, or allowing the carrying out of, any resource activities on strategic cropping land or potential strategic cropping land, in accordance with the SCL code.

ENTERED BY [SIGNATURE]

--

DATE

--	--	--

This form is to be used to apply for a strategic cropping land (SCL):

- ☐ protection decision (section 95); or
- ☐ compliance certificate (section 116)

for resource activities located on SCL or potential SCL pursuant to the *Strategic Cropping Land Act 2011*.

This form is relevant to proposed resource activities under the *Mineral Resources Act 1989*, *Petroleum and Gas (Production and Safety) Act 2004*, *Petroleum Act 1923*, *Geothermal Energy Act 2010*, *Geothermal Exploration Act 2004* and *Greenhouse Gas Storage Act 2009*.

Use this form when:

- Applying for an environmental authority or amendment to an environmental authority which relates to a resource activity that will be located on SCL or potential SCL. This is the case even where a compliance certificate or protection decision already exists as a result of a previous environmental authority (or amendment to an environmental authority) application.

Do not use this form when:

- Applying for an environmental authority or amendment to an environmental authority which does NOT relate to resource activity that will be located on SCL or potential SCL.
- The environmental authority application is excluded from all of the SCL Act (see Chapter 9, Division 2).

An environmental authority for resource activities that will be located on SCL or potential SCL cannot be issued until an SCL compliance certificate has been given, or an SCL protection decision has been made, where applicable.

Application for an SCL protection decision or compliance certificate

Part A – General

Question 1

Resource activities include entry on land that is SCL or potential SCL.

Any future applications to amend the environmental authority that results in resource activities being located on SCL or potential SCL will need to meet the requirements of the SCL Act. This may include the need to make an application under the SCL Act for an SCL assessment.

1. Will any resource activities proposed under the related environmental authority application be located on SCL or potential SCL?

- ☒ Yes → Go to Question 2
☐ No → Do not complete this form. No SCL application is required.

Question 2

The applicant must be a person or entity that has applied for, or may apply for, a resource authority or an environmental authority for the resource activities.

2. Applicant details

NAME	ABN/ACN
Arrow Energy Pty Ltd	ACN:078521936
ADDRESS	
AM-60 Level 19, 42-60 Albert St	
SUBURB	POSTCODE
Brisbane	4000

- ☐ There is more than one applicant for this application and the additional applicant(s) details have been identified in Appendix 1 of this form.

Application for an SCL protection decision or compliance certificate

Question 3

The contact person may be a consultant or some other person acting on behalf of the applicant. If a contact person is nominated, all dealings and correspondence with the applicant will be through the contact person.

3. Contact person

TITLE	NAME	
Mr	sch4p4(6) Person	
COMPANY		ABN/ACN
Arrow Energy Pty Ltd		
ADDRESS		
AM-60 Level 19, 42-60 Albert St		
SUBURB		POSTCODE
Brisbane		4000
PHONE	FAX	EMAIL
Section 78B(2)(c)	07 3012 4001	sch4p4(6) Pers@arrow energy.com.au

Question 4

For resource authorities that are under application, attach information that identifies the resource authority boundaries (provided in the resource authority application).

4. Resource authorities

List all resource authorities subject to this application:

RESOURCE AUTHORITY TYPE	NUMBER (IF KNOWN)	STATUS (APPLICATION/ GRANTED)
Petroleum Lease	194	GRANTED
Petroleum Lease	198	GRANTED
Petroleum Lease	230	GRANTED
Petroleum Lease	238	GRANTED
Petroleum Lease	252	GRANTED
Petroleum Lease	258	GRANTED
Petroleum Lease	260	GRANTED

For any resource authority application listed above, attach information that identifies the boundaries of the resource authority (e.g. blocks and sub-blocks, metes and bounds or real property description (lots on plans)).

Application for an SCL protection decision or compliance certificate

Question 5

The description of the land may include a street address or property name and locale descriptor (e.g. 15 km NE of Dalby).

5. Description of the land

The application relates to 1,256km² of land which is located in the Surat Basin and is located predominantly to the South and West of Dalby.

Question 6

For a new environmental authority (application), provide a reference number and date the application was lodged.

6. Environmental authority

Provide details of the relevant environmental authority for the resource activities.

For an existing environmental authority, provide the environmental authority number.

PEN100449509

Question 7

The strategic cropping land (SCL) trigger map is a statutory map under the *Strategic Cropping Land Act 2011* (SCL Act) that identifies the location and extent of SCL and potential SCL and the protection/management areas. It can be found on the Department of Natural Resources and Mines (DNRM) website at www.dnrm.qld.gov.au and navigating to the strategic cropping land webpage. The Interactive Resource Tenure Mapping (IRTM) software also includes an SCL map layer.

7. Status of the land (tick all that apply)

(a) The tenure(s) is located in:

- ☒ a protection area:
 - ☒ southern
 - ☐ central
- ☒ the management area

(b) The tenure(s) contains:

- ☒ Potential SCL as shown on the SCL trigger map → By ticking this box you elect to treat this part of the land as if the land were SCL.
- ☐ SCL → You must attach one of the following for each lot on plan that is decided SCL:
 - ☐ the validation information notice(s)
 - ☐ the registry record(s) (SCL)

The decision register, which lists the outcome of validation applications, can also be found on the DNRM website.

By electing to treat potential SCL as SCL in this application, the land is taken to be SCL for deciding this application only. This election does not make the land SCL under the SCL Act and the land continues to be potential SCL for any other person (s. 84 SCL Act).

Question 8

Provide as much detail as possible about the specific resource activities proposed under the application. For example, ten exploration wells, five production wells, 20 km of access tracks etc.

8. What resource activities will be located on SCL or potential SCL?

Water and gas pipelines, exploration wells, seismic surveys, proposed CSG treated water discharge release point.

Question 9

The development footprint includes infrastructure or proposed infrastructure relating to the resource activity, in addition to the items listed in section 85(2) of the SCL Act, which

9. Map

Provide a map that identifies or describes:

- ☒ the location of all SCL or potential SCL

Application for an SCL protection decision or compliance certificate

includes, among other things, buildings and structures.

Where the exact location of the development or resource activities is unknown, a map(s) that identifies the resource authority boundaries and the SCL and potential SCL within those boundaries is the minimum amount of information that can be supplied for this requirement.

You should provide the specific locations of major infrastructure located on SCL or potential SCL.

Question 10

The SCL standard conditions code can be found on www.dnrm.qld.gov.au by searching for the strategic cropping land web page.

You must be able to comply with the SCL code to apply for an SCL compliance certificate.

If you cannot fully comply with the code, you must apply for an SCL protection decision.

Note: Not all resource activities provided for under a Code of Environmental Compliance (e.g. Exploration and Mineral Development projects) made under the Environmental Protection Regulation 2008 are able to comply with the SCL code.

Question 11

Refer to the SCL code for the list of resource activities and conditions to determine which part of the code you may be able to comply with.

The SCL code does not allow for permanent impacts in a protection area.

Question 12

No additional impact means: A resource activity approved under an environmental authority is subject to amendment but the amendment will not result in any additional impact to SCL or potential SCL. There must not be a change to what the activity is, or an increase in the footprint size or impact to SCL or potential SCL. An example of no additional impact would be where the location of a resource activity is changing.

What evidence is required to demonstrate that there will be no additional impact to SCL or potential

- ☐ where the development is proposed to be carried out on SCL or potential SCL
- ☐ all of the footprint of the development
- ☒ the boundaries of the resource authorities

10. Are you able to comply with the SCL standard conditions code for resource activities (SCL code) for the resource activities proposed on SCL or potential SCL?

- ☒ Yes → I am applying for an SCL compliance certificate. Go to Question 11.
- ☐ No → I am applying for an SCL protection decision. Go to Part B (Question 14).

11. Which part of the SCL code are you electing to comply with?

By answering this question, you certify that you will comply with the part of the code that you selected.

- ☐ Part 1 – no additional impact → Go to Question 12
- ☐ Part 2 – minimal impact → Go to Question 13
- ☒ Part 3 – low impact → Go to Question 13

12. Provide evidence as to why the resource activities proposed on SCL or potential SCL will have no additional impact on that land.

Application for an SCL protection decision or compliance certificate

SCL:

- Details of, and a copy of, the relevant environmental authority highlighting where the activity has received prior approval.
- Details of why the amendment to the resource activity will not result in additional impacts to SCL or potential SCL, beyond what was previously authorised in the environmental authority.

Note: Part 1 or any other part of the SCL code does not authorise permanent impacts on SCL or potential SCL in a protection area.

Question 13

The SCL code is divided into three parts.

The same part of the SCL code means:

- (a) for part 3—part 3
- (b) for part 2—part 2
- (c) for part 1—part 1

The relevant part of the SCL code means:

- (a) for part 3—parts 1 and
- (b) for part 2—part 1.

For more information, refer to section 6 of the Strategic Cropping Land Regulation 2011.

For the purposes of a reissue of a compliance certificate, Version 1 (December 2011) of the SCL code is equivalent to Part 3 of the SCL code (December 2012)

13. Reissue of compliance certificate

Does this application meet ALL of the following criteria:

- (a) This application relates to an application for amendment of an environmental authority; and
- (b) A compliance certificate already exists for the above mentioned environmental authority; and
- (c) The activities proposed under this application can comply with the same part or a relevant part of the code as the existing compliance certificate.

☐ Yes → this application is subject to the lower 'reissue' fee

☒ No → this application is not subject to the lower 'reissue' fee.

Go to Part C (Question 17).

Part B – Protection decision only

Question 14

Carrying out development on SCL or potential SCL has a permanent impact on the land if—

- The carrying out impedes the land from being cropped for at least 50 years (legal or physical impediment); or
- Because of the carrying out, the land can not be restored to its pre-development condition; or
- The activity involves open cut mining or storing hazardous mine wastes, including, for example, tailings dams, overburden or waste rock dumps.

Important: If the outcome of the SCL protection decision application is that a resource activity will have a permanent impact on SCL or potential

14. Permanent impacts (protection decision only)

If, in question 7(a) you answered that the resource activity subject of this application is in a protection area, answer the following question, otherwise, go to Question 16.

Will any resource activities proposed under this application have a permanent impact on SCL or potential SCL in a protection area?

☐ Yes → Go to Question 15

☐ No → Go to Question 16

Application for an SCL protection decision or compliance certificate

SCL in a protection area, the development will not be permitted to proceed without an exceptional circumstances determination or transitional status (see question 15).

Question 15

If you are eligible for exclusion of the permanent impact restriction, you do not need an exceptional circumstances determination to have a permanent impact in a protection area. However, you must attach evidence to your application which demonstrates your eligibility. Refer to sections 286 – 289 of the SCL Act for full details.

15. Is the development in exceptional circumstances?

- ☐ Yes → You must attach one of the following:
- ☐ evidence that the development is prescribed to be in exceptional circumstances pursuant to the Strategic Cropping Land Regulation 2011; or
 - ☐ a copy of the relevant exceptional circumstances decision.

☐ An application for exceptional circumstances will be or has been lodged and a decision is pending. Provide application reference details:

☐ No → I am eligible for exclusion of the permanent impact restriction under Chapter 9, Division 3 of the *Strategic Cropping Land Act 2011*. Supporting evidence is attached.

Question 16

A report is required that assesses the extent of the development's impacts on all SCL or potential SCL on the land; and identifies any constraints on the configuration or operation of the development. It should include the following information:

- What is the resource activity
- How you have avoided and minimised the impacts to SCL or potential SCL (both permanent and temporary impacts), drawing on any constraints on the configuration or operation of the development.
- How will the resource activity be conducted (construction, operation and decommissioning phases)
- The period of time that the resource activity will be conducted
- The potential impacts from the resource activity on SCL or potential SCL (construction and operation)
- Whether the impacts will be temporary or permanent and why.
- If the activity will be temporary, what is the pre-development condition of the land and how will it be restored to pre-development

16. Development impact report (protection decision only)

Provide a report that:

- ☐ assesses the development's impact on all SCL or potential SCL
- ☐ identifies any constraints on the configuration or operation of the development.

Go to Part C (Question 17).

Application for an SCL protection decision or compliance certificate

- condition within 50 years.
- If the activity will have a permanent impact, what are the reasons why the activity cannot be conducted in a way that it would have a temporary impact.

Part C – Financial assurance, application fee and declaration

Question 17

Compliance certificates:

Financial assurance is only required for certain resource activities under Part 3 of the Code.

It is a condition of the code that the required amount of financial assurance is submitted to the administering authority prior to carrying out any resource activities on SCL or potential SCL.

The proposed financial assurance should be calculated using Schedule 1 of the code.

Protection decisions:

This requirement for financial assurance is provided for under the SCL Act (s. 100).

The proposed financial assurance should be based on the costs for a third party to restore the temporary impacts on SCL or potential SCL to pre-development condition.

You do not need to pay financial assurance at the time of lodging your application; however, if you are required to pay financial assurance, this requirement must be met prior to undertaking the activities on SCL or potential SCL.

Financial assurance for SCL purposes is separate to financial assurance/security required for the environmental authority/resource authority. The final amount of SCL financial assurance can take into account the amount of financial assurance paid for the environmental authority for those resource activities that are proposed on SCL or potential SCL.

The Department of Natural Resources and Mines will provide information on how to meet your financial assurance requirements (i.e. acceptable forms of financial assurance, lodgement).

Question 18

The applicable SCL fee can be found at www.dnrm.qld.gov.au or in the Strategic Cropping Land Regulation 2011.

17. Financial assurance for SCL

Financial assurance is required for certain resource activities that will have a temporary impact on SCL or potential SCL. Refer to guidance material for more information.

☐ Financial assurance calculation attached →

SCL financial assurance required \$

sch4p3(2) Business affairs

18. SCL application fee

Type of SCL application: SCL compliance certificate - carrying out a resource activity that complies with the standard conditions code, part 3

Application for an SCL protection decision or compliance certificate

The fee amount depends on what type of application you are making:

1. Compliance certificate

- a) Part 1
- b) Part 2
- c) Part 3
- d) Reissue

2. Protection decision

The application fee is \$ 10,149

You may pay your application fee via cheque, money order or credit card.

Select the payment method below:

☒ Payment by cheque or money order made payable to the Department of Natural Resources and Mines (attached); or

☐ Please contact me (the applicant) for credit card payment

Phone number: _____

Question 19

Where the applicant is a company, this form is to be signed by a person authorised (in writing) to sign for that company and in doing so declares that the corporation will be bound by the conditions associated with the granting of a licence or permit.

19. Declaration

I declare that the information contained in this document, including all appendices and attachments, is true and correct to the best of my knowledge, information and belief. I understand that it is an offence under section 229 of the *Strategic Cropping Land Act 2011* to give an authorised person information, or a document containing information that I know is false or misleading in a material particular.
