<p>Question 1: Detailed report of events.</p> <p>While driving to Sandy Cape my self and another ranger noticed 2 children (young teenagers) playing in shallow water. We then saw a dingo come down from the dunes and approach the children at a trot, we alerted the children and then placed our vehicle between them and the dingo and escorted them back up to their campsite. When we arrived at the campsite there were several adults there but not there parents. All adults were then given a thorough briefing on dingo safety and advised that all children and young teenagers should have an adult with them whenever they left the campsite, I reiterated the importance of this several times.</p>

Additional comments: The individual involved in the interaction had extremely limited English so communication of the event was limited to a general idea through hand signals and broken English. I asked if the animal had a collar, (through gesture), and he nodded; hence the identification of 15 Green 15M as it was known to be in the area at that time

Action taken: Report generated for NRM RIC.**Proposed further action:** Continue to monitor dingo via collar and brief campers and visitors in areas where dingo is frequenting.**Faxed/emailed date:** 14/06/2016

<p>Question 1: Detailed report of events.</p> <p>On Tuesday morning 14.06.2016 at 8.38am I was conducting a patrol along waddy point beachfront camping area. At this time I sighted a man interacting with a female dingo - holding his hand out, patting the animal and allowing it to lick his hand on several occasions. During this time I located the nrm camera and took a photograph. The man involved looked up at me, then continued to interact with the dingo (Photograph below). On introducing myself to the man he asked 'are the dingoes always this friendly' I responded using words to the effect – no they are not and the way that you have just interacted with that particular animal is an offence under the Recreation Areas Management act.</p> <p>A pin was issued to sch 4 - personal information on the morning of the 14.06.2016 for disturbing an animal that is dangerous without approval.</p> <p>A further brief on the importance of dingo safety was reiterated to sch 4 - personal information</p>

<p>Question 1: Detailed report of events.</p> <p>Whilst conducting an early morning patrol QPWS Rangers 1423683 and 7028728 witnessed a male dingo loitering around fishermen at Poyungan Rocks. Rangers spoke to one of the fishermen and it was established that the dingo had only been there for a few minutes. While Rangers observed the dingo's movements, it came within two metres of an unaware fisherman. A dingo briefing was conducted and all fishermen had their catch and bait stored on them in their fish bags.</p>

<p>Question 1: Detailed report of events.</p> <p>At 14:30hrs 7028644 and 1431102 were reacting to a Code E_20160926_Untagged F_Waddy-Con_Biting incident at waddy beach front. Untagged lactating female dingo was observed on the edge of a lagoon near some kids so Rangers headed in that direction and placed the vehicle between the children and the dingo. The dingo then moved towards some kids playing and screaming from the campground. The dingo continued to loiter near visitors and fisherman, she found and ate some buried fish frames before moving NE towards the vegetation swamp. The dingo was loitering near park users for around 1.5 hours before moving on. Two Code D interactions were recorded during this time; Code D_20160926_Untagged Lactating Female_Waddy-Con_Incorporate humans into pack behaviour; Code D_20160926_Untagged Female_Waddy-Con_Dominant towards humans.</p>

<p>Question 1: Detailed report of events.</p> <p>QPWS Rangers, 1424194 & 1435908, responded to a phone message regarding a dingo interaction at Govi campground.</p> <p>The interaction occurred on the evening of 29/9/16 at 1930. QPWS Rangers arrived on site at 0800 30/9/16 to gather report details</p> <p>On the evening of the 29/9/16 at about 1930 the group (2 families with children) were gathered together in the annexe area of the tent relaxing and winding down before going to bed. One of the children noticed a dingo 8-10 metres away at the northern end of their camp. The dingo appeared to be watching them. After a couple of minutes, a second dingo was noticed 8-10 metres away on a track to the east of the camp, while the first dingo was still present to the north. Although there was no definite identification, one of the children believed they saw a faded "orange" ear tag on one of the dingoes. The group did not make an effort to deter the dingoes and all stayed together.</p> <p>Both dingoes were then distracted by people on the beach on bicycles and took off after them. These people were staying in a campsite approximately 75 metres to the south (see separate interaction report).</p>
