Subject: RE: Bundaberg depot

Hi Paul

Apologies for my delayed response, further to the QLD EPA letter dated 5 October to MOA (addressed to Matt Bergeron, epa ref BNE24920). I am writing to provide you an update, with regard to the five points of actions.

1. All on site excavation works (in the past) have been undertaken with an appropriate health and safety plan in place to manage occupational risks. The current site owner is aware of contamination and how to manage such issues. Though I am not sure if the site operator has a formal plan in place. I will follow this up. Though given the depth to contamination, site operators would not normally be exposed to groundwater contamination during everyday site operations.
2. Notification to utility operators is in progress, Coffey have drafted up a letter of notification and it is with MOA legal for review and should be sent out before the end of the year. Given the depth of contamination, shallow services are not considered to be at risk. A vapour survey during the post phase 2 investigations did not detect elevated PIDs in utility pits.
3. An offsite drilling program was completed at the end of last year the report is about to be finalised (I will get copy to you). Further offsite works have not been scheduled, though MOA and Coffey are in process of planning further works.
4. A pilot test was completed last year at the site to assess remediation options, due to the complex geology at the site, the report has been through a number of revisions and has not been finalised yet. This should also be finalised in the next few weeks.
5. MOA completed another round of groundwater monitoring event (GME) in September to assess groundwater trends (not finalised yet).

Paul, I dont believe MOA have supplied you any reports to date, I will aim to get you copies of the Post Phase 2, the GME and the pilot test report which should give you sufficient information to gain an appreciation of the site and the contamination status. I will aim to get you these in first few weeks of new year. Also it would be worthwhile if we had meeting maybe after we provide you reports.

If you wish to discuss any aspect please call me on the number below.

RE: Bundaberg depot

Subject

Please respond
to
<paul.butcher@epa.qld.gov.au>

Hi CTPI Sch 4

Thanks for getting back to me so soon. I would certainly be interested in obtaining copies of any recent reports and in the groundwater monitoring report as soon as it is available. The EPA is particularly interested in obtaining details of follow up actions relating to onsite and offsite groundwater impacts detected and outlined in the letter to the EPA dated 12 December 2005. This letter also outlined a five point course of action.

Could you please provide information regarding the outcome of this course of action, particularly as it pertains to the delineation of offsite groundwater impact, PSH recovery and other remediation options?

Regards

Paul Butcher

Attention: CTPI Sch 4

Dear CTPI Sch 4

**Re: Notification of Environmental Release – Mobil Wessel's Petroleum Depot, 5-7
Whrittred Street, Bundaberg (Lot 1 on RP126016 and Lot 57 on RP229184 in the Parish of
Kalkie and County of Cook)**

I refer to your letter dated 12 December 2005 informing the Environmental Protection Agency (EPA) of additional Environmental Site Investigation works at, and adjacent to, Mobil Wessel's Depot. In relation to the detection of onsite and offsite impacts, the EPA requests details of actions taken by Mobil Oil Australia Pty Ltd as outlined in the course of action in the above letter and for any further actions taken subsequently.

If you have any questions regarding this matter, please do not hesitate to contact Paul Butcher on (07) 3225 8416.

Yours sincerely
