Hi Ray,

I hope this email finds you well.

Please find attached a copy of a section 451 Notice (Request for Information) that the Department has sent today via registered post.

Please note that a response to the notice is due by close of business on the 8 February 2012.

If you have any questions please don't hesitate to contact me.

Regards,
Jo

Re: Information required by administering authority regarding the leasing arrangements of 6 Potassium Street Narangba.

Under section 451 of the *Environmental Protection Act 1994* (the Act) the attached notice requires you to provide the information set out below, relevant to the administration or enforcement of the Act.

You are required to provide the following information by **8 February 2013** to the Department of Environment and Heritage Protection situated at PO Box 1080, Caboolture QLD 4510 and an electronic copy to ESnorth.MoretonBay@derm.qld.gov.au.

It is an offence under the Act to fail to comply with this notice unless you have a reasonable excuse for not complying with it.

You may apply to the Department for a review of this decision within 10 business days of receiving this notice. You may also appeal against this decision to the Planning and Environment Court.

Information outlining the review and appeal processes under the *Environmental Protection Act 1994* is attached to this letter. This information is intended as a guide only and you may have other legal rights and obligations.

Should you have any queries in relation to this notice, Joanne Page on telephone 07 5433 7773 would be happy to assist you.

Notice

Environmental Protection Act 1994

Notice requiring relevant information

This notice requiring relevant information is issued by the administering authority pursuant to section 451 of the Environmental Protection Act 1994.

Our reference: CA26671

31 January 2013

Managing Director

Oil Technology Australia Pty Limited

5-7 Potassium Street

DECEPTION BAY QLD 4508

Attention: Mr Raymond Georgey

Note: that under section 451 of the *Environmental Protection Act 1994* (the Act) this notice requiring relevant information is issued to you by the administering authority. The administering authority is the Chief Executive of the Department of Environment and Heritage Protection (the Department). The Department requires this information for the ongoing administration or enforcement of the Act.

This notice is issued in respect to the activities of Oil Technology Australia Pty Ltd at the site on land described as Lot 732 on SP241692 situated at 6 Potassium Street, Narangba QLD 4504 (the premises).

The decision

The notice requiring relevant information is issued based on the following grounds:

- A fire occurred at approximately 12.30am on 11 December 2012 at 6 Potassium Street, Narangba QLD 4504. The fire resulted in 101,798 litres of oil products being released from the onsite building to the surrounding environment within the site boundary and offsite into the stormwater system and land where the contaminated fire water flowed.
- The administering authority is investigating possible offences of section 440ZG and 427 under the *Environmental Protection Act 1994* and section 578 under the *Sustainable Planning Act 2009*.

The facts and circumstances forming the basis for these grounds are:

- Oil Technology Australia Pty Ltd is listed as the registered owner of the chemical manufacturing business being conducted at Lot 801 on SP138531.

Notice requiring relevant information

- Contamination of the surrounding environment has occurred as a result of the incident on 11 December 2012. This includes the contamination of land onsite and offsite, and groundwaters, due to the release of 101,798 litres of oil and grease products.
- Raymond Georgey, Managing Director of Oil Technology Australia Pty Ltd confirmed in a letter to the Department dated 17 December 2012 that Oil Technology Australia Pty Ltd used the premises as a storage facility.

Requirements

You are required to provide the following information to Joanne Page by **5:00 pm on 8 February 2013**. This information is to be sent to PO Box 1080, Caboolture QLD 4510 and an electronic copy to ESnorth.MoretonBay@derm.qld.gov.au.

The information that you are required to provide is as follows:

- A copy of all lease agreements between Oil Technology Australia Pty Ltd and Tasman Sheepskin Tannery Pty Ltd for the premises;
- If not already provided in the lease agreements, please provide the following:
 - Details regarding how often the lease agreements were renewed;
 - The time period (length) of each lease, including the start and finish date of each lease agreement;
 - Details regarding access to the site by the land owner.

You are required to provide the information:

- In order for the Department to determine if any possible offences of section 440ZG and 427 under the *Environmental Protection Act 1994* and section 578 under the *Sustainable Planning Act 2009* have been committed.

Appeal rights

If you are dissatisfied with the decision to issue this notice, you may apply to the Department for a review of the decision within 10 business days of the service of the order. You may also apply to the court for a stay of the decision to issue this notice.

If you are dissatisfied with the review decision, you may appeal against this decision to the Planning and Environment Court. Further information about the review and appeal process is attached to this notice.

However, the information provided above should be considered as general advice only. You may have other legal rights and obligations and should seek and be guided by your own legal advice.

Notice
Notice requiring relevant information

Penalties

Under section 470 of the Act, failure to comply with this notice is an offence unless you have a reasonable excuse for not complying with it. A reasonable excuse for an individual not complying with this notice is where the information requested might tend to incriminate the individual.

The maximum penalty for not complying with this notice is \$5,500.

Should you have any queries in relation to this notice, please contact Joanne Page of the Department of Environment and Heritage Protection on telephone number 07 5433 7773.

CC: brentb@otechaustralia.com.au; Salomone Daniel; Ward Joanna
Subject: RE: Section 451 Notice (Request for Information) - Oil Technology Australia

Hi Ray,

A penalty unit is defined in the Penalties and Sentences Act 1992. Section 5 states the following:

“(1) The value of a penalty unit is—

- (a) for the *State Penalties Enforcement Act 1999* or an infringement notice under that Act, other than an infringement notice for an offence against a law mentioned in paragraph (b) or (c)—\$110; or
- (b) for a local law, or an infringement notice under the *State Penalties Enforcement Act 1999* for an offence against a local law—the amount, not more than \$110, prescribed under a regulation; or
- (c) for the *Work Health and Safety Act 2011*, the *Electrical Safety Act 2002*, the *Safety in Recreational Water Activities Act 2011* or an infringement notice under the *State Penalties Enforcement Act 1999* for an offence against those Acts—\$100; or
- (d) in any other case, for this or another Act—\$110.

(2) If an Act expresses a penalty or other matter as a number (whether whole or fractional) of penalty units, the monetary value of the penalty or other matter is the number of dollars obtained by multiplying the value of a penalty unit by the number of penalty units.

(3) If an order of a court expresses a penalty or other matter as a monetary value, the number of penalty units is to be calculated by dividing the monetary value by the value of a penalty unit as at the time the order is made.

(4) For the purposes of this or another Act a reference to a penalty of a specified number of penalty units is a reference to a fine of that number of penalty units.

Example—‘Maximum penalty—10 penalty units’ means the offender is liable to a maximum fine of 10 penalty units.”

Therefore under the *Environmental Protection Act 1994* and the *Sustainable Protection Act 2009* a penalty unit is equal to \$110. In order to determine the value of the maximum penalty of any offence that is listed in *Environmental Protection Act 1994* and the *Sustainable Protection Act 2009*, you must multiply the number of penalty units by \$110.

I hope this information helps.

If you have any further questions please don't hesitate to contact me.

Regards,

Jo

Attention: Ms Joanne Page

Dear Madam,

INCIDENT RESPONSE WORKS NARANGBA INDUSTRIAL – POND DEWATERING STRATEGY

As discussed at our meeting with Daniel Salomone on 13 February 2013 (D Salomone, John Brun, Narah Benn, J Bess, L Dahl, N Gifford), please find following the proposed dewatering strategy for the 3 ponds on Lot 795 SL 10002 associated with incident response to the fire on the adjoining private property. These ponds are Pond 1, Pond 2 and Pond 4 (which is a three cell pond depicted as 4, 5 & 6). Please refer to the attached Gilbert & Sutherland Plan for pond locations.

We confirm that the strategy remains consistent with the recommendations provided by DEHP at the meeting. Please refer to the attached water quality test results which indicate that water from Ponds 1 and 2 are suitable for discharge to stormwater. Water quality results from Pond 4 indicate that the water is not suitable for discharge to stormwater and hence will be pumped to Settling Dam 1 to be dealt with through the forthcoming Remediation Action Plan for the balance site.

The proposed strategy is as follows:

1. Pump the full volume of water from Pond 4 into Settling Dam 1;
2. Assess capacity of Pond 1 to accept pumped volumes from Pond 2;
3. Pump the full volume of water from Pond 2 directly to Pond 1;
4. Remove silt-laden material from Ponds 2 and 4 bases by excavation to Pond 3;
5. Test, flocculate, condition all water in Pond 1 to acceptable release parameters;
6. Pump down Pond 1 directly to existing stormwater manhole (refer to yellow highlighted plan attached) using a floating intake structure to draw from the surface;
7. Monitor pumping of Pond 1 to ensure it is shut down prior to reaching low level;
8. Remove any silt-laden material from Pond 1 base by excavation to Pond 3;
9. Fill Ponds 1, 2 and 4 to level one certification.

We anticipate dewatering will begin during the week commencing 8 April 2013.

Should you have any queries, please do not hesitate to contact the undersigned.

Hi Michael,

As recently discussed, please find attached correspondence from the principal contractor, Projex Partners, engaged in the remediation of a Narangba industrial site located at 73-79 Boundary Road and 12-24 Potassium Street, Narangba, Queensland.

We previously discussed the discharging of stored water from the site to the nearby stormwater drain as part of the dewatering strategy. The attached correspondence details the dewatering strategy for the site and includes the pertinent water quality analysis.

Please review this correspondence and advise if Council are accepting of the discharge strategy.

Give me a call to discuss this further.

Please be advised that Joanne Page of DEHP is also providing advice into this matter.

Hi Mike,

I have no objections if EHP is satisfied that the water is safe to discharge to stormwater. However, I noticed that the PAH, TPH and BETEX levels for SW1 and SW2 are significantly higher than the detection limits. Do we know what criteria were used to determine that the water is safe to discharge to stormwater (eg. ANZECC water quality guidelines)?

Hi Mike,

I have reviewed the correspondence from Projex Partners and EHP have no main concerns. I just wanted to touch base with Council before I let them know. Did you have any concerns?

Thanks

Jo

Subject: Fwd: 149-002 Incident Response Pond Dewatering

Hi Michael,

As recently discussed, please find attached correspondence from the principal contractor, Projex Partners, engaged in the remediation of a Narangba industrial site located at 73-79 Boundary Road and 12-24 Potassium Street, Narangba, Queensland.

We previously discussed the discharging of stored water from the site to the nearby stormwater drain as part of the dewatering strategy. The attached correspondence details the dewatering strategy for the site and includes the pertinent water quality analysis.

Please review this correspondence and advise if Council are accepting of the discharge strategy.

Give me a call to discuss this further.

Please be advised that Joanne Page of DEHP is also providing advice into this matter.

Regards,

Nick Gifford Senior Environmental Scientist/Engineer **BEEnvSc BEngTC(Env)**

Hi Jo,

Council's Environmental Health Department has no objections to the release to the stormwater system provided that Projex Partners have satisfied all EHP requirements.

Hey Lachlan and Mike,

Any further news on the below?

I do have a copy of the water quality report which states the guidelines that Projex Partners has used. Let me k now if you haven't seen this document.

Thanks
Jo

Hi Mike,

I have no objections if EHP is satisfied that the water is safe to discharge to stormwater. However, I noticed that the PAH, TPH and BETEX levels for SW1 and SW2 are significantly higher than the detection limits. Do we know what criteria were used to determine that the water is safe to discharge to stormwater (eg. ANZECC water quality guidelines)?

Hi Jo

Please find attached our proposed dewatering strategy for the incident response ponds at Narangba.

A hard copy will be in today's mail.

Please call me if you wish to discuss.

Nick – please forward to Michael Taylor from MBRC.

Kind regards,

Hi Lucy,

I hope this email finds you well.

I apologise for the delay in responding to you. EHP has no concerns with the information presented in the dewatering strategy and the RAP (provided earlier).

Has the dewatering strategy already commenced onsite? EHP would like to obtain some further information about the dewatering process.

- What is the total amount of water being released from the site?
- What is the proposed increments for the discharge of the water from the site?
- Have you assessed any impacts of the water release on the receiving environment?

I have been in contact with Moreton Bay Regional Council (MBRC) regarding the strategy and MBRC has no objections to the strategy provided that Projex Partners have satisfied all EHP requirements.

If you have any questions please don't hesitate to contact me.

Thanks

Jo

Subject: 149-002 Incident Response Pond Dewatering - EHP response

Hello Jo

Thankyou very much for your approval of the incident response RAP and the proposed de-watering strategy for the 3 No. ponds.

Your assistance in this regard has been greatly appreciated!

The dewatering has not as yet commenced due to weather and contractor availability. Once we get the go ahead to proceed, I will respond to your queries prior to commencement, as our response for items 2 and 3 will be largely dependent upon pump size etc. I will be in touch in the next week in this regard.

The balance area RAP will be coming your way in the next couple of weeks. As per the incident response RAP, I will send you a drop box link and also post a hard copy in the mail.

Kind regards,

Lucy Dahl
