

22/11/21
10.45am

AO's Lisa Reddy & Joshua Morris attended
Site of truck rollover @ intersection of
Bruce Hwy & Burnett Hwy.
A sump was observed. Lifted with
what looks like a mix of diesel,
milk & water. There was some milk
in the drainage line. LR did not
consider this to be cleaned up.
Back in the office, [redacted] was
phoned to enquire about the clean-up.
[redacted] apologised and was organising
a vac truck to suck up the
contaminants. LR advised it would be
ideal if this could happen soon as rain
is on the way.

Subject : Update - Truck Rollover - Bruce and Burnett H'way Intersections

Attachment : 20211122_105749.jpg;20211122_105245.jpg;20211122_105136.jpg;image001.png;image002.png;image005.png;

Hi Lou

A follow up inspection of the location of the truck roll over was undertaken this morning (22/11/2021), which determined the sump containing milk and diesel had not been vac trucked out as advised on Friday. Although the contaminants had not travelled further down the stormwater drain since Friday there was rain predicted for later today. On return to the office (11.15am) I contacted s.73 Irrelevant information to enquire about the clear up s.73 Irrelevant information and advised a vac truck will be arranged to remove the contaminants today. The urgency was highlighted due to the rain predicted.

Let me know if there is anything further I can provide.

Thank you,

Lisa Reddy

Subject: Turck Rollover - Bruce and Burnett H'way Intersections

Hi Lou

See below for dot points on the incident responded to today. If this needs to be in an ESR Alert style let me know. I'll update after our inspection on Monday.

- Officers attended scene of truck rollover at the Bruce Highway and Burnett Highway at 2:10pm 19 November 2021 and spoke with representatives s.73 Irrelevant information
- The rolled truck and trailer were in situ and the contents (primarily milk bottles) were being removed from the trailer.
- Milk and diesel had been released into the drainage line however the volume was not considered significant.
- The sawdust bund that had been installed was failing to contain the release. Officers advised that more bunding is required, and s.73 Irrelevant information advised they will construct a sump to collect release to vac truck out, and a bund downstream of the sump to accommodate for any sump overflow.
- There is still clean-up to occur over the weekend, with a drive by recommended to be undertaken Monday morning. The next possibility of a shower is predicted for Monday.

Thank you,

Lisa Reddy
