Question 1. Detailed report of events personal information provided the dingo ranger to report that a visitor had passed some information through to her regarding a pair of female backpackers that were being circled by two dingoes in the Champagne Pools visitor area. It is alleged that a passer-by noticed the interaction and offered a lift to the girls who declined as they were not concerned about their safety. However as the dingoes came closer and appeared more aggressive the two visitors did start to become concerned and they were given a lift away from the dingoes on the rear of the vehicle. No details were provided about the two backpackers believed to be German.

Question 2: What were the actions/behaviours of the dingo(s) during the Interaction?

Question 1. Detailed report of events. An unidentified sub-adult or adult dingo had been observed patrolling through the southern end of Eli camp area but had not approached the camp site. At approximately 8:30am on 30th of July, [personal information] was with his [personal information] year old son [personal information] outside the entry to their tent. [personal information] walked over to check the solar panels about 10 meters from where his [personal information] was standing and had his back turned for [personal information] described as a matter of seconds. When [personal information] turned back around his [personal information] was face to face with an adult dingo and was patting it around the head and neck. The dingo was observed to have its eyes closed and was not displaying any aggressive behaviour and was likened by the boy's father to be 'dog-like' in its manner. [personal information] was unable to identify a gender, tag or any identifying marks on the dingo. [personal information] yelled at the dingo and it moved away a short distance, looked back, then continued on its way. [personal information] followed the tracks back from where the dingo had come from and indicated that the dingo had been moving along the track before it changed its direction and headed directly towards the small child.

Question 1. Detailed report of events. Myself and ranger 7023725 were travelling south along the beach when we sighted a dingo within a few metres of a man worming. The dingo was positively identified as 15yellow15m by both rangers. The dingo was dominance testing in terms of pouncing towards the worming bait bag being dragged along the ground and then pouncing backwards. The dingo was vocalising with short howls. This dominance testing behaviour continued for around 30 seconds in a circling manner, as the man attempted to shoo the dingo off by throwing his arms up. 15yellow15m then noticed that two vehicles had stopped to watch the behaviour and he retreated approximately 15m from the wormer. On speaking to the wormer, he stated that the dingo had only recently arrived on scene, just before we pulled up. He stated that the dingo is 'loopy' and had undertaken similar behaviour a day earlier at approximately 130pm on the beach out the front of the QPWS/QPS base at Eurong. 15yellow15m was moving away slowly as we departed.

Question 1. Detailed report of events. During briefing, camper reported an interaction that occurred on the beachfront just south of his camp whereby a dingo (described as having perhaps an 'orange' tag - although man conceded that he is colour blind) approached the man and began to "bounce around" him (dominance test). The man attempted to shoo the dingo away, but it continued to dominance test him, moving around him in a semi circular motion. At this point, a orange bus with sch 4 - personal information intervened, exiting their bus and assisting the man in deterring the dingo. The drivers described the dingo as 'she'. The dingo moved away along the beach after being deterred by the bus drivers (refer comments section).

Question 1. Detailed report of events personal information
 year-old daughters went to the toilet together 10m from camp (against parent's advice not to go without an adult when they first set up camp) and on the return to the camp they were confronted by a dingo which came out of the bush at them. The dingo was described as having a 'pink ear tag in its right ear with the number 15 on it' and had its tail curled over, ears and head lowered. The dingo did not vocalise during this interaction. The girls immediately froze and yelled out 'dingo'. This raised the alarm of personal information who unzipped his tent, startling the dingo, which then reportedly moved into the tarped area of the camp, and sniffed around before moving off south towards the next camp personal information had briefed his daughters on dingo safe behaviour, although the camp had not been briefed by a QPWS ranger at this point. Myself and ranger 7027234 attended their camp and spoke directly to the daughters involved personal information confirmed that the dingo ran at her from 10m away and had actually gotten within a metre of her and 'attempted to lick her foot'. The dingo was also described by personal information as having "crouched" in front of her (dominance test). This information was verified by her year-old sister.

Question 1. Detailed report of events. During briefing, camper reported having observed the following interactions on One Tree Rocks beachfront - persons walking along beach (he assumed to be male and female) were being described as being run at and then 'harassed' by unidentified dingo. The couple were assisted by a car travelling along the beach whose driver pulled alongside them and allowed them safe passage into the car to remove them from the dingo. The dingo was then reported to have run up behind a lone adult male walking on the beach who was seemingly oblivious to its presence and the witness described his observation as the dingo appearing to nearly nip the man's ankles from behind. The man apparently became aware of the dingo shortly after and the witness stated that a bus intervened to end the interaction (this second interaction was likely the code D on the man from camp sch 4 - personal information reported earlier, although this man made no reference to having nearly been nipped from behind). Witness was too distant to identify whether or not dingo had a tag or dingo's gender, even using binoculars.

While ranger 7027940 was talking to a family on the beach to keep their kids close, the dingo spotted two kids playing in the lagoon out the front of Binngih sand blow approximately 200m away and sprinted at them. Ranger 7027940 immediately got in the vehicle and drove at pace to the kids and just beat the dingo. Ranger 7027940 aimed the vehicle towards the dingo to try and slow it down and deter the animal. Ranger then jumped out of the car and chased the dingo by foot. The dingo was showing aggressive behaviour towards the kids by dominance testing and lunging, the dingo was reluctant to move on. Before I got back to the kids their mother had ran over and hugged the kids on the ground. I then told the mother to keep the kids very close as we are having some problems with this dingo. I then continued to monitor the dingo keeping it away from people.</p>

<p>Question 1. Detailed report of events. Rangers 7027118 and 7028728 were observing an untagged lactating female with high right sock on the Waddy Point Beach Front scouting the beach near fishermen. The Rangers observed, at a distance of approximately 80 metres, 3 young children playing by themselves in a lagoon on its northern side edge. Realising the potential for a high risk incident occurring they drove directly towards the children. At approximately the same time the dingo noticed the children and started running towards them at a fast pace. The parents who were on the southern side of the lagoon, at a distance of approximately 50 metres, began yelling for the children to swim back towards them. The rangers and the dingo arrived at the edge of the lagoon at around the same time; the dingo did not follow the children into the water. The rangers then proceeded around the lagoon to the children's parents reiterating the need for the children to be close by at all times.</p>

<p>Question 1. Detailed report of events. <i>sch 4 - personal information</i> reported that she was walking with a friend on the beach in front of Cathedral Beach this morning when they observed a dingo in the distance. The dingo was walking towards them and they observed it hanging around a fisherman for a while before it kept moving along the beach in their direction. When the dingo noticed the women it changed its direction of travel and came right up to them and started pouncing around and circling them. The ladies yelled at the dingo (identified as having a yellow tag in its left ear 15Yellow15m) and it would jump back a few metres before pouncing in again. Towards the end of the interaction the dingo was described as growling in a playful manner. A vehicle travelling on the beach drove between the ladies and the dingo but the dingo was not deterred and the vehicle kept driving between them. The dingo spotted a bird further down the beach and ran off towards it.</p>

Question 1. Detailed report of events. At approximately 1650 hrs QPWS Ranger 1423683 received a phone call on the dingo hotline from Eurong Resort staff stating that a guest ^{sch 4 - personal information} has had an interaction with a dingo. QPWS Ranger 1423683 immediately organised to meet up with ^{sch 4 - personal information} at the resort.

^{sch 4 - personal information} states that she was sitting on the dunes out front of the resort with her two young children and her mother.

The children were close by playing in the sand and after about ten minutes a dingo (later identified as 15Pink15F)

appeared from the dunes and came up behind the children to within arm's reach ^{sch 4 - personal information} of her ^{sch 4 - personal information} 7 year old son.

stood up grabbing one child while her mother picked up the other.

This is when they kept eye contact and backed away. 15Pink15F came up to where they were sitting and took some of the children's sand toys, ran a couple of metres away but soon lost interest. The dingo started to follow ^{sch 4 - personal information} mother, getting to within less than a metre lunging several times at her feet.

After a short while 15Pink15F saw something moving in the grass and lost interest. This is when they returned to the fenced area. Ten minutes later ^{sch 4 - personal information} returned to the beach and collected her belongings. ^{sch 4 - personal information} did not sight the Dingo again.

CODE: D

Dingo ID: **15Pink15f**

Management Area (NRM use): **Eur-Poy**

D: Threatening – growling, snarling, dominant towards humans. *E: High Risk* – nipping, biting, attacking

Date (of Interaction): 30/10/2016 Time (of Interaction 24hrs): 1700 (approx) How long did the interaction last: 5 mins Location (of Interaction): Eurong Beach front Reporting Officer/s details: 7023725	Details of person(s) involved in dingo Interaction. Name: 7023725 Address: Phone #: Visitor type: QPWS employee
---	--

Question 1. Detailed report of events. Off duty QPWS Ranger (7023725) was walking along the beach out the front of Eurong (high on the beach near the dunes) at approximately 1700 hours when a dingo that was identified as 15Pink15f approached from the north. The dingo followed the Ranger heading south, initially from a distance before running towards him to get within 5 meters and obstructing his direction of travel. The dingo was within 5 meters for about a minute and retreated after the Ranger picked up a near by stick and waved it whilst yelling. The dingo moved to approximately 50 meters away for a minute or so before running towards the Ranger again and obstructing him. This time within 2 - 3 meters, again for about a minute before the dingo was again chased off by yelling and waving a stick. The dingo then followed from a distance of approximately 50 meters for a couple of minutes or so before losing interest and heading into the bush just south of the Eurong township.

---	--

Question 1. Detailed report of events. QPWS received a phone call from Eurong Resort staff approximately 07:20 reporting that a guest had just come in to report a dingo interaction. Staff went to the resort to talk to the guest.

stated that he was walking south on the beach between Eurong Resort and Eurong 2nd Valley on his own about 07:00 when he noticed a dingo lying up in the dunes. He continued walking and when he looked behind him again he noticed that the dingo had moved from the dunes onto the beach behind him and was about 30-40m away.

kept walking and again noticed that the dingo (identified as 15Green15m from tag description (bluey/green tag) and video footage) was still following him so decided to turn back towards the resort. As he turned back the dingo ran straight at him and started to circle around him, within 2m, and was growling and backing turned towards the dingo and started walking backwards. yelled at the dingo and it stopped and crouched down watching briefly before again running forward and starting to circle and lunge towards him attempting to bite his legs.

continued to yell at the dingo and kicked the animal 3 to 4 times keeping it from making contact with his legs. This behaviour continued for approximately 5minutes before the dingo stopped of its own accord and stood watching continue to walk backwards away from it.

Shortly after the dingo again ran towards and started to circle again, but stopped again after a very short time and watched until he made it back to the resort.

--	---

Question 1. Detailed report of events. Tag-along leader reported an interaction to QPWS staff where a dingo was displaying dominant/aggressive behaviour to a family at Cornwells Camping Area. QPWS staff spoke to the people involved.

"About 07:00 15Pink15f was observed moving through campsite and heading north towards the next camp.

About 08:00am three of the children (aged 4, 5 and 6) had moved just over the top of the dunes, out of view of the adults that were packing up around the camp, and were looking for ghost crabs. One of the children was on her knees in the sand when she felt something on the back of her foot and looked up to see a dingo (identified as having a pink tag in the right ear with a number - 15Pink15f) right behind her. She stood up and moved to join the other two kids whilst screaming for help.

The three adults came over the top of the dunes and saw the three kids all standing together and the dingo within 1-1.5m. The adults moved towards the kids with the two males walking towards the dingo kicking sand and yelling and the female getting the kids behind her and walking backwards. At this point a tag-along tour stopped and yelled for the group to pick up a stick, which they eventually found and at this point the dingo moved away north up the beach.

When questioned, the kids indicated that the dingo was circling around them but did not make any noise or crouch down/lunge after they were all together.

Question 2: What were the actions/behaviours of the dingo(s) during the Interaction?

Code D - Threatening. – growling, snarling, dominant towards humans

- ☐ Growling/snarling

☒ SR ranger notified

Additional comments: Approx 1/2hr earlier another camper had come up to the group and told them to keep the kids close as they had just had a dingo hanging around them for about 1/2 hour as they were fishing (separate interaction to come).

Tag-along leader reported that the dingo had a tag in the left ear with green/red colours.

Action taken: Interview conducted and report circulated. SR FI South and RD notified. Briefing of campers given.

Proposed further action: Continue monitoring behaviour of 15Pink15f. Continue briefings of visitors and tourists in this area.

Consider a high visibility/tracking collar for 15Pink15f due to a high level of recent Code C & D interactions.

Consider closing Wongai, One Tree Rocks and Cornwells camping areas after the school holidays to limit possible interaction between 15Pink15f and people, as well as any pups that might be in the area.

<p>Question 1. Detailed report of events. During a patrol and camper briefing on 28/09/2016 the personal family reported an interaction with a dingo identified as 15Pink15F. On the morning of Monday 26th of September the family of five were camping at the northern end of Wongai campground. At approximately 0530 one of the children (around personal information) was going to the toilet when he was approached by 15Pink15F. 15Pink15F began dominant testing the boy, which then escalated to lunging forward and repeatedly attempting to bite the boys shin, ankles and legs, no contact was made by the dingo. The boy then called out to his family. The father of the boy tried his best to discourage dingo away, but 15Pink15F was very persistent and would not move away, the boy fathers stated that the dingo was vocalising but not snarling or showing its teeth. The family then grouped together and used a blanket as a barrier until the dingo eventually left. As of the 28/09/2016 the dingo has not interacted with family again.</p>

Name: 7027110 Address: Phone #: Visitor type: QPWS employee
Question 1. Detailed report of events. Ranger 7027110 was walking in front of the Eurong ranger base heading to the north. The Ranger had been on the beach for approximately 2 minutes when he felt a dingo grab him on the ankle of the left boot. The dingo (identified as 15Pink15f) held onto the foot for a couple of seconds as rangers kicked his foot away, releasing the dingoes hold and yelled at the dingo. The dingo jumped back a couple of metres and was crouching and bouncing around - testing dominance. Ranger was fending off dingo with a piece of poly pipe and yelling at dingo. Ranger continued to chase dingo away with poly pipe and dingo eventually retreated back up into the dunes.	
Question 2: What were the actions/behaviours of the dingo(s) during the Interaction? Dingo grabbed ranger on back of boot and then was aggressively dominance testing.
