Attention: Ariane Milanovich

Dear Madam,

RE: CONTAMINATED SITES REGISTER / LOT 18 RP 134451

Council has received an enquiry from the [Personal] of the above land, [6] Personal info who is concerned that this property is listed on the contaminated sites register.

Councils records reveal that [h4p4(6) Personal information] land across the road from Lot 18 (Lot 10 RP 890968) and that a cattle dip existed on Lot 10. This lot was previously Lot 10 RP 134451 prior to excision of a 19 720 sqm parcel from western side of the land. An enclosed copy of a proposed plan of subdivision (not approved) shows the location of the dip site on Lot 10.

It would appear that Lot 18 RP 134451 was inadvertently included on the contaminated sites register at the time that lot 10 was entered on the register, due to both lots being owned [Personal]

It is requested that you amend your records accordingly and advise [Personal] of the outcome.

For further information in respect to this matter, please telephone Mr Allan Caulfield on 5483 0611.

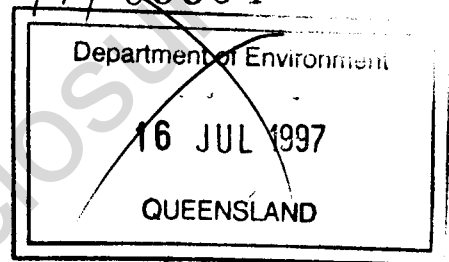

Yours faithfully,

[sch4p4(6) Personal information]

D.S. SLATTER

BRISBANE ALBERT STREET 4002

25 Oct 1993,

Dear Sir,

sch4p4(6) Personal information

sch4p4(6) Personal information

sch4p4(6) Personal information

regarding the listing of a cattle dip property, sch4p4(6) Personal information
sch4p4(6) Personal information . This letter was dated 10th August.

Since then I have been in touch with APR GEOTECHNICAL SERVICES who are quoting for a site Investigation and soil test.

My questions are:

1. Is the above firm's report acceptable by your Dept. or do you nominate someone else ?
2. What is the acceptable level of contamination for various chemicals. For instance the soil was tested by D.P.I in 1988 showing some D.D.T contamination. I was told at the time that it was below the danger level. I was told, on the phone, by your Dept. that the test carried out by D.P.I. was too old to be acceptable? But whatever the situation, I can see no point in having the soil tested if I am not told what constitute "Contamination". The Act dodges the answer by saying "the Dept will decide etc."/.
3. Assuming you declare the site as contaminated and the soil has to be removed, where do I take the contaminated soil ? The Widgee Shire does not have an approved site .

A prompt answer to the above question would be greatly appreciated.

Thanking you in advance,

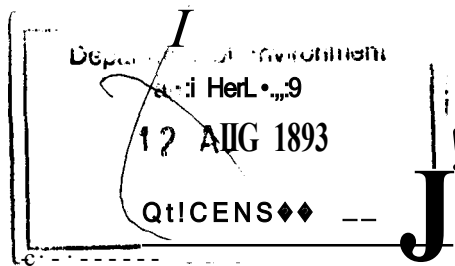

Yours faithfully,

Dear Sir,

I was informed by the Widgee Shire Council that I am the owner of a block of land containing a cattle dip and as such it should be reported to your department as a possible site for contamination under the Contaminated Land Act.

Can you please advise me on:

The manner of which you want the land recorded e.g. Map etc.,
What is the meaning of the word "contaminated".Which chemical, should not be there and to which degree ?

Who should do the testing and at whom s expense.

Thanking you in advance,

Yours ^{ersona}thfully.
