<p>Question 1: Detailed report of events. While patrolling south waddy beach Ranger 7028728 noticed an untagged sub adult female with high left sock heading south. Roughly 200m south of the dingo were two teenage girls (estimate age 14/15) with a boy aged 9 unsupervised. The untagged dingo looked particularly interested in the objects in the distance and proceeded with pace towards them. Ranger moved the vehicle between the dingo and the three people, got out and began to shoo the dingo off by yelling, waving hands and throwing sand at it. The dingo was persistent in trying to manoeuvre around and get close to the younger male. After several attempts to deter the dingo lost interest and retreated to the dune. The three involved were walked back to their father.</p> <p>This interaction may have escalated had QPWS not arrived at the time - the father of the children didn't seem concerned.</p>

Question 1. Detailed report of events: [redacted] Eurong office 0900hrs on 21/9/16 to report the following interaction: Previous night (20th of September) [redacted] was collecting drinking water from the QPWS public water tap when they were approached by an unidentified dingo [redacted] was looking but unable to ascertain if was tagged, stated that it appeared to be a 'full grown' dingo but unable to determine gender or fur colouration). The dingo was described as dropping into a 'crouch' position within 5m of [redacted] (dominance test) and vocalising with a single bark [redacted] fellow camper, a male [redacted] tall, made his way up from the vehicle parked at the base of the fore dunes and attempted to shoo off the dingo. The dingo responded by moving around to the side of the men, and dominance testing with a single bark again, still within 5m of the men. There was a lady standing on the fore dunes nearby making a phone call - the dingo moved past her but [redacted] did not observe any negative interaction between the woman and the dingo. When the woman realised that the dingo was there, she made her way back to her vehicle, parked nearby. The men then made their way back to the car, at which time they described that the dingo "ran at them". When the dingo realised that the two men were back in the car, the dingo ran off to the north behind the fore dunes. The total interaction lasted up to five minutes.
