Subject : Beaked whale strandings - disease investigation protocols

Attachment : beaked whale strandings 20\_21.xlsx;2020-02-10 - Ginkgo - Avoca Beach.jpg;2020-07-24 - Blainvilles Beaked Whale - Entrance Beach - MOP (5).jpg;2020-12-10 - Blainvilles Beaked Whale - Scotts Head - Rhys Pacey (1).jpg;2021-01-09 - Blainvilles Beaked Whale - Racecourse Beach - Shaun Kerrigan (1).jpg;20210322 - Blainvilles - Coffs.jpg;2021-03-23 - Grays Beaked Whale - Gerringong NSW (3).jpg;2021-03-26 - Blainvilles suspected - Plumbago - 01.jpg;PET PORPOISE POOL\_MDEN 090121\_21-26870628\_9CHMA\_0006.pdf;

Hi all,

Super quick catch up given the three beaked whale strandings we had last week and generally over the last 12 months and before easter hits us.

Would be great to get out collective heads together to ensure consistent sample collection and ensure hygiene protocols are adequate if an infectious agent and triggers for event escalation.

Attached are some images of each one that Andy pulled together and I have put a spreadsheet of date/sampling and location as a starting point

Duan has provided some histology results for the January stranding.

Hopefully not an early sign of a Morbillivirus outbreak.

Thanks

## HISTOPATHOLOGY REPORT

Case No.V21/4359

## CLINICAL NOTES

Beaked whale

## MACROSCOPIC EXAMINATION

- "Brain". Two sections of brain 70x20x17mm and 80x25x20mm. 7p7brst.
- Multiple pieces of grey and brown tissue 80mm in aggregate. 15p15brst . (CJ/LL)

## MICROSCOPIC EXAMINATION

Sections are significantly disrupted by freeze-thaw artefact.

Brain. Within a single piece of cerebrocortical white matter is a tiny nodule that contains microglia, small lymphocytes and rare plasma cells aggregated around a vessel. There are no obvious microorganisms. Adjacent neurons are within normal limits. No significant lesions in the remaining brain sections.

Pituitary. No significant lesions.

Intestines. No significant lesions.

Heart. No significant lesions.

Spleen. No significant lesions.

Liver. No significant lesions.

Lung. No significant lesions.

Kidney. No significant lesions.

Stomach. No significant lesions.

Pancreas. No significant lesions.

Skeletal muscle. No significant lesions.

## SUMMARY

Brain: minimal lymphocytic encephalitis

## COMMENT

Within one of the brain sections and closely associated with a white

**Where:** Microsoft Teams Meeting

Hi everyone,

Great effort team, we responded as expected and while not an ideal outcome it was handled well.

While this is still fresh in our memories I have scheduled a meeting to discuss the successes and potential improvements we can make in our stranding response.

I know it is short notice and some of you have commitments at this time, but if you cant make it and you have comments in any of the areas highlighted in the form can you forward them to me or call me to discuss them before this meeting.

Liz and I, intend to review the operation with council and SeaWorld later in the week.

Subject : RE: Cetacean euthanasia form

Attachment : image002.jpg;image004.png;image001.png;

What a great concise document. I just have two suggestions.

There may be some value to add a rating system to the sedation administered AND the euthanasia method so that comparisons and recommendations can be drawn based on peoples approaches used.

1= major complications

5= nil complications

For example: an animal that may have had only a small amount of sedation was highly reactive to the intracardiac needle and subsequent lethobarb administration may only score a 1/5 where as a highly sedated animal may receive the same method of euthanasia and show no response may be assigned a 5/5. Likewise two animals may receive the same sedation protocol however different veins were utilised for chemical euthanasia.

Chemical euthanasia method may be beneficial to include an opportunity to write which technique was utilised. Intracardiac vs peripheral vein i.e the caudal peduncle vein etc. In addition what instrumentation was used to access the venous system 18g spinal needle vs 22g butterfly catheter etc.

This information will allow you to establish recommendations for a cetacean euthanasia kit and better guide the technical respondents on preferred euthanasia methodologies.

Happy to chat more and/or help develop this further.

Regards

Subject: Cetacean euthanasia form

Hi folks,

I just wanted to share the Cetacean Euthanasia Form that I drafted up recently. I created this form due to recent research indicating that there is a general lack of information on cetacean euthanasia techniques and associated information. The idea is that this should be used in all cases of live cetacean stranding, in addition to the usual marine animal stranding report form. I've tried to cover off on most major points, but if you feel something is missing then please let me know and I will add it in. I didn't want to make it too onerous either, so hopefully it is user friendly with very limited double-ups with the original stranding report form. I've left it as a Word doc so it can be a working document, and as such if you want to modify it for your own purposes I don't mind at all.

I would appreciate any feedback.

Thanks,

Nat

Natalie Sands

Hi Dave,

Well that might leave us in a bit of a bind! Had heard things had taken a new direction. I guess the department will need to give consideration of how we move forwards in relation to..... a whole bunch of things you were involved in and the expertise you wield.

Truly appreciate the offer of maintaining contact and the provision of advice/assistance.

Take it easy and no doubt we will be in contact sometime soon one way or the other.

Cheers Liz

Hi Justin,

We attended a juvenile female Melon-headed whale stranding at Main Beach on the Gold Coast on Friday afternoon. Brought it back to Sea World and euthanased it. Results pending. See thread below. There has been a few up and down the coast.

Hi Personal i

Thanks for the notification below. I hope the calf is showing some signs of progress?

Now that the dolphin is in care at Seaworld, can you please liaise with the Wildlife Management staff within our Department regarding any further notifications/updates, as they are the ones who administer your rehab permit. Frank Mills would be the best contact to start with – I have cc'd him on this email if you need his contact. Sorry if you are already doing this, just wanted to make sure. Can you also please keep Justin Meager in the loop given his interests in the species? Thanks!!

Talk to you soon about that training.

Cheers,

Natalie

Subject: Newborn Sousa calf

Hi Wayne,

As discussed over the phone this morning, we flew up to Agnes Waters on Saturday (9<sup>th</sup> June) to retrieve a newborn female Indo-pacific humpback calf (Sousa sahalensis) that had stranded up there. It stranded on Saturday morning and was refloated by members of the public and restranded. We were contacted and flew up and brought it down to Sea World. Its weight on arrival was 9.6 kg and it is 0.97 m long. It is in poor body condition and unable to swim unassisted. We are currently tube feeding it with an artificial milk replacer. The prognosis is poor for this animal.

Regards,

# Notice of Decision

## Approval of application

ch4p4( 6) Personal informatio

Village Roadshow Theme Parks  
Pty Ltd (Sea World)  
PO Box 190  
SURFERS PARADISE QLD 4210

Our reference: TWB4503 72911

Dear p4( 6) Personal informa

I am pleased to advise that your application for a Scientific Purposes Permit has been approved.

Please find enclosed permit number WISP12115912 which has been issued under the provisions of the *Nature Conservation Act 1992*. You are asked to carefully read the conditions attached to this permit. Included with this letter is advice on the review and appeal process that may be available to you. Should you seek a review or appeal, the Department of Environment and Heritage Protection (the department) advises that you seek independent advice before taking such action.

The Principal Holder listed on the permit is responsible for all activities that are undertaken under the jurisdiction of the permits listed above, including the activities of nominated authorised assistants. Your cooperation is requested in observing the following matters:

- Additional persons authorised to collect under this permit must while collecting
  - (a) carry a copy of the permit endorsed by the permit holder with the additional persons name and residential address; and
  - (b) carry a form of identification that displays a coloured photograph of the person, such as a Queensland driver licence.
- Names of additional persons authorised and endorsed by you should be provided in writing to the office issuing the permit.
- Any change of details including change of name, residential address, postal address or business address must be advised in writing before or immediately after the change has occurred.

A return of operations (Wildlife Data Return and Report) must be submitted on the standard reporting forms within 10 business days of the anniversary date of the permit each year the permit is in force; and within 10 business days of the expiry date.

Please submit these forms, along with any reports or publications arising from the research to the Project Officer (Scientific Permits), Department of Environment and Heritage Protection, PO Box 731, Toowoomba QLD 4350. Alternatively, reports may be submitted electronically to [SPPreport.southern@ehp.qld.gov.au](mailto:SPPreport.southern@ehp.qld.gov.au). Penalties may apply if returns are not submitted.

Please do not hesitate to contact me if I can be of further assistance.

Yours sincerely

## Conditions of Approval

### Agency Interest: Biodiversity

PB1 This permit authorises the holder to collect freshly dead carcasses from either shark nets or Queensland beaches. The carcasses may be transported to Sea World or if the carcass is at a remote location it may be processed in situ.

A Marine Wildlife Stranding and Mortality Report must be submitted via email to [strand.data@derm.qld.gov.au](mailto:strand.data@derm.qld.gov.au) as soon as possible.

Reproductive material may be collected from the animals.

Carcass disposal should be conducted in a timely and efficient manner and in accordance with direction from Queensland Parks and Wildlife Service or the local council.

The Queensland Museum must be offered first refusal of any excess material.

Unless otherwise specified, all practices and procedures undertaken pursuant to this permit are to be in accordance with those details contained in and attached to the Application for a Scientific Purposes Permit signed by the Principal Holder on 10 September 2012.

PB2 The Principal Holder must contact the relevant Queensland Parks and Wildlife Service Office prior to commencing activities in Marine Parks. Current Marine Park permits must be held prior to collecting in Marine Parks.  
Great Sandy Marine Park (07) 4197 4002  
Moreton Bay Marine Park (07) 3131 2888

PB3 Environmental impact is to be kept to a minimum.

PB4 Collecting activities are to be effected away from public view.

## Scientific Purposes Permit

WISP12115912

- PB5 No animals are to be killed specifically for use under this permit.
- PB6 This permit (or a copy plus proof of identity of the permit holder) must be carried while engaged in any activity authorised by the permit.
- Assistants authorised by the Principal Holder/Person in Charge must carry a copy of this permit endorsed by the Principal Holder/Person in Charge showing their full name and address. Assistants must also carry photo identification such as a Drivers Licence.
- The Principal Holder must notify the Project Officer (Scientific Permits) Toowoomba, of any additional collectors or assistants authorised by the Permit Holder.
- PB7 The Principal Holder must ensure that all vessels used in connection with the activities permitted herein are clearly marked Research Vessel while being used for those activities.
- PB8 A return of operations (Wildlife Data Return and Report) must be submitted on the standard reporting forms:  
- within 10 business days of the anniversary date of the permit each year the permit is in force;  
and  
- within 10 business days of the expiry date.
- The return is to show numbers of specimens of each species, the type of habitat and specific locality or localities where they were collected. This information is to be supplied to the Project Officer (Scientific Permits), Department of Environment and Heritage Protection, PO Box 731, Toowoomba or electronically to [sppreport.southern@ehp.qld.gov.au](mailto:sppreport.southern@ehp.qld.gov.au)
- A copy of any resulting publication from this research is to be provided to the Project Officer (Scientific Permits), Department of Environment and Heritage Protection, PO Box 731, Toowoomba or electronically to [sppreport.southern@ehp.qld.gov.au](mailto:sppreport.southern@ehp.qld.gov.au)

## Legislative Requirements and Conditions of Wildlife Authority

### Nature Conservation

#### Legislative requirements

- RPLR01 The permit holder must achieve acceptable animal welfare standards and not exceed their own capabilities. The total numbers of animals held in care must be appropriately housed and the holder must meet all requirements of the Code of Practice—Care of Sick, Injured or Orphaned Protected Animals in Queensland, see [www.des.qld.gov.au](http://www.des.qld.gov.au)

This requirement may be found in section 215 of the Nature Conservation (Wildlife Management) Regulation 2006

- RPLR07 Activities carried out under this authority, unless otherwise authorised, apply to non-protected areas only.

This requirement may be found in section 12 of the Nature Conservation (Administration) Regulation 2017

#### Custom condition

- RPCC01 This permit authorises the holder to hold in care not more than 100 animals at any given time.

#### General condition

- RPM02 The permit holder must notify DES within 24 hours of taking possession of an animal that cannot be identified by the permit holder.

Hi

Can you please advise the status of the request for dolphins and whales?

I believe it is important for us to be able to temporarily hold these animals under our permit as an intermediate location for sea world.

We held a dolphin last year in conjunction with QPWS and sea world and need to be covered under our permit conditions.

We have the only facility in this region capable of housing these animals along with our support network of DEHP and specialist vets.

Happy to discuss further.

Cheers

Personal i

Hi Dave,

Thanks for the notification below. I hope the calf is showing some signs of progress?

Now that the dolphin is in care at Seaworld, can you please liaise with the Wildlife Management staff within our Department regarding any further notifications/updates, as they are the ones who administer your rehab permit. Frank Mills would be the best contact to start with. I have cc'd him on this email if you need his contact. Sorry if you are already doing this, just wanted to make sure.

Can you also please keep Justin Meager in the loop given his interests in the species? Thanks!!

Talk to you soon about that training.

Cheers,

Natalie

Hi Wayne,

As discussed over the phone this morning, we flew up to Agnes Waters on Saturday (9<sup>th</sup> June) to retrieve a newborn female Indo-Pacific humpback calf (*Sousa sahulensis*) that had stranded up there. It stranded on Saturday morning and was refloated by members of the public and restranded. We were contacted and flew up and brought it down to Sea World. Its weight on arrival was 9.6 kg and it is 0.97 m long. It is in poor body condition and unable to swim unassisted. We are currently tube feeding it with an artificial milk replacer. The prognosis is poor for this animal.

Regards,

**Subject:** FW: Whale- BURLEIGH HEADS

Morning all,

I received a call from the RSPCA regarding a possible whale calf entanglement in a shark net 500m off of the beach near Tumgun look out in Burleigh. Adult whale was reported swimming nearby. The RSPCA provided me with the caller's name and phone number: [redacted]

The RSPCA caller's name was [redacted] and the RSPCA job reference number is 735522 (see dispatched notice below).

I got in contact with [redacted] and provided him with the details.

I also reported the possible entanglement to the DAF 24 hour shark control hotline by calling and leaving a message at 1800 806 891.

As I don't have access to the Wildlife Operations inbox, this is being sent from my own work email. I also received assistance with this process from Sandra Riemer.

Kind regards,  
Courtney Jackson
