OATWQ18	39	26/07/2018	10:25:00 AM	Email									Odour	Hi, I'm writing this email to bring to your attention the source of a terrible smell in Redbank Plains during the night time. I have personally tracked the source of this smell, it's coming from a small dump/landfill in the area I have circled. This is tagged as a wood mulching business on google maps. I am struggling to believe such a bad smell can be emitted from this premises, yet it not be to breath of council environment laws. I have lived in this suburb for over 30 years and never has it been so bad. I look forward to hearing from you regarding this matter as it's become quite intolerable.	Redbank Plains	Unsure						Undefined		Wood Mulching Industries		
OATWQ18	40	26/07/2018	11:02:00 AM	Call									Odour	Smell odour yesterday at 12pm and it was described as a rotten odour, strong in intensity. OATNQ18	126	15/08/2018	8:46:00 AM	Email	C184938				Odour						The smell was awful as we used the whitewater area for exercise/recreation. Absolutely disgusting!! May as well exercise at the city dump!	Rumbalara	General rubbish smell	Strong	12/08/2018	Sunday	12/08/2018	Sunday	3:00:00 PM	15:00 - 15:59	Yes	Sewerbank area			
OATNQ18	127	15/08/2018	3:28:00 PM	Email	C184957				Land						With to place another official dust complaint about the operation of Cleareway New Chum. Today for a period of over half an hour I observed the operation of this site where copious amounts of dust were being generated again. During this period of observation the following non compliance of the Site Based Management Plan (SBMP) was observed. 1. Only 1 water truck was operating near the tip face. None of this watering had any affect at all on the dust generation at the tipping and compacting area as the trucks only went over some roadways near the tip face. Only the road sprinklers were observed in operation not the water cannon. After a short time the truck left the tipping face and left a large pile of dirt on parked up and the drivers having lunch whilst dust was still being generated at the tipping face. This is upon 10 be a normal procedure for this site. (Trucks are not continually operating during business hours and liability are not used to control the dust at the tipping and compacting areas. 2. There was no evidence of any internal dirt roadways having been watered. (See photos) 3. There was no evidence of the external roadway to the western borrow having been watered. (See photos) 4. There were 2 garden use sprinklers in operation well to the west of the tipping face that were having no effect on dust suppression. They were watering some dirt, not any waste area where dust was being generated. 5. There was a car trailer mounted blower blowing a 20mm blower sprayed water across the west of the tipping face. It was also used to place another official dust complaint about the operation of Cleareway New Chum. (The 3rd/2 days). This occurred at 4.15 pm for a period over half an hour I observed the operation of this site where copious amounts of dust were being generated again. In this case the wind was now from the East). During this period of observation the following non compliance of the Site Based Management Plan (SBMP) was observed. 1. No water trucks were operating at all. Both were parked up for the day. 1 on a platform below the tipping face and 1 in the machinery compound. This was despite the fact that the site was still requiring waste and coping dust site being generated. 2. There was no evidence of any internal dirt roadways having been watered. (See photos) 3. There was no evidence of the external roadway to the western borrow having been watered. 4. There were 2 garden use sprinklers in operation well to the west of the tipping face that were having no effect on dust suppression, particularly that they were placed to the west of the tipping face and the wind was blowing from the east. They were watering some dirt, not any waste area where dust was being generated. 5. There was a car trailer mounted blower but it was not working as it appeared that the water source was exhausted. Consequently copious amounts of dust were being generated into the atmosphere and it is clear that the dust from this operation was easily leaving the site. This is the third report to in two days of excessive dust being Only just noticed it's been out a couple of times today and didn't notice the smell. I just noticed the smell and noticed the odour. Odour log and has been filling it in for this event.	Collingwood Park	Unsure											Unidentified

OATNQ18	130	16/08/2018	12:30:00 PM	Call	C184951				Dust						• Dust generated by Super Landscaping on Briggs St. Dust generated at all times of operation. Only relief is during rain. • Been occurring the entire time he has operated his business from Huxham Street. • He can sweep one litre of dust from a closed 200m2 shed after a few days. • (PHOTO) 1813	Rawson							Unidentified						
OATNQ18	131	16/08/2018	10:50:00 AM	Call	C184954				Dust						Report of dust from New Chum site. He has been affected at his house. It was a bad day, and whenever there is a Westerly wind, a thick dust and a brown dust cover his driveway, his outdoor area and tables. He needs to clean the outdoor area twice a week. The dust makes him sneeze and his eyes water. He had two people from OAT come to his property yesterday. They have photos of the dust at his house. At time of phone call he is allowing dust leaving the site.	Collingwood Park							Unidentified						
OATNQ18	132	16/08/2018	4:30:00 PM	Email	C184954				Dust						Today, again with the westerly winds and the lack of dust control by Cleareway at New Chum I am suffering further issues with continual sneezing, eye watering and running nose. Today breathing has also become more difficult with the taste of dust always in the mouth. Once again I viewed the site for over 30 minutes about 1 pm and witnessed the generation of voluminous amounts of dust without proper control measures for dust mitigation being used by Cleareway. With the off westerly wind blowing the dust could be clearly seen rising well into the atmosphere and being spread across neighbouring sensitive areas. Unfortunately this is the fourth complaint in 3 days and as yet, I am to hear any responses at all by Cleareway management as to my complaint as it appears that they are disinterested in investigating the complaint. As previously advised I have significant video footage that is too large to email that better shows the lack of dust suppression at the site.	Collingwood Park							Unidentified

OATW218	147	18/08/2018	1:24:00 PM	Email	CH85008									Dust	I wish to make a further complaint about the dust generation and lack of appropriate controls at the Cleanaway New Chum site today which is continuing to affect my health and create dust issues at my home as witnessed by OES officers this week. At 8.15 am I observed the site, and despite the site operating and weather conditions of high westerly winds in a dry environment both water trucks were still parked up in the machinery compound. (see photo) At 1 pm I returned and observed the site operation for 30 minutes. During this time, although traffic volumes were down, considerable dust was being generated to the atmosphere by: 1. emptying of rubbish from trucks 2. Compacting of rubbish 3. Travel of trucks to the tip face Dust control measure were non-existent with: 1. Internal roadways had not been watered 2. No sprinklers or water fogger in operation 3. 1 water truck still parked up in its original position observed at 8.15am 4. the second water truck parked up near the tip face not doing anything despite dust being generated continuously. It actually appeared that there was no operation in the water truck. I have rang the pollution hotline, option 3 number and reported this. Just reporting again as odour we can currently smell at [redacted] is [redacted] water. Unsure of wind direction or source. This is the same smell we smell yesterday evening at approx. 7pm. My phone number is [redacted]	Collingwood Park	Other						Undetected		New Chum Cleanaway		
OATW218	148	18/08/2018	9:54:00 PM	Email	CH85009									Odour	Thanks. Odour - described as similar to grey water Odour - Unknown source, possibly at the end of Eagle Street, Collingwood Park. Odour - Normal dump/landfill smell. As soon as the wind drops the smell lingers. Westerly winds for most of the day. Odour - rubbish/compost. OATW218	169	20/08/2018	7:44:00 PM	Email	CH85063									Dust	Brexa has picked up and I'm making it on bearable I am writing to complain about the amount of dust we are getting from the dump behind us. We live at Collingwood park and are suffering from sinus problems and having dust settling everywhere. Also concerning us is what contaminants are becoming airborne with the dust (medical & industrial). Can you please explain why there are no dust suppression measures in place. Every day the dust clouds coming off the dump are highly visible from a considerable distance but it seems no action is being taken.	Collingwood Park							Undetected				
OATW218	2108														Another working day another 2 official complaints about the lack of dust control at Cleanaway New Chum. Complaint 1. At 9.30am this morning whilst the site was in full operation there were limited dust minimisation measures in operation at the site, none of which was in any way effective in minimising or controlling dust. This included: Only one water truck watering areas where other vehicles were not driving. One water mister which was sited too far away from the tip area to be effective and whose water was being blown backwards. No sprinklers. During this time significant amounts of dust were being generated and leaving the site with the morning breeze. Complaint 2. At 1.15 pm this afternoon I revisited the site and observed the same situation where there was no control of dust generation at the site. The water mister fan was running, BUT no water was supplied to the unit. The water truck was ineffective in controlling the significant dust. Odour - Very organic smell from dumps in area. Odour - Old rubbish like being hit in the face with a dead fish. Rubbish smell, nausea's coming from the roundabout along Centenary Hwy near white rock. Same smell that was detected at Stn Ripley last night and on Friday night. Bad garbage smell - had to bring the dog in, smell was that bad. Worse at 5 am started to get better around 7am. OATWQ18	423	31/08/2018	7:45:00 PM	Email											Odour	My place of residence is [redacted] I heard the sound of trucks beeping in the distance in the middle of the night at approximately 12:00am. I suspect it is a chemical dump in New Chum because [redacted] I can confirm the smell was evidently from the time I walked outside at 6:00am until 7:00am when I left for work. The smell could have continued throughout the day but I was in Brisbane City. All other members of the family noted the smell. This is the first complaint I have made as previously I did not know who to report to. I have smelt a bad smell in this region in and off since not long after I moved to Ipswich [redacted]	Elstone	General rotten smell	Strong	31/08/2018	Friday			7:00:00 PM	19:00 - 19:50	Yes	This is to notify you that a very bad odour that smelt like sulphur or rotting waste was present at Elstone on Friday 31st August from early morning, 7:00pm, until we left the house at 8:00pm. Truck beeping (freemoving) could be heard late at night 100N/101st. Is this trucks turning rubbish at the business of waste site at New Chum

OATNQ18	429	10/09/2018	9:18:00 PM	Email	CR81628										Unlicensed	On Saturday 8th September I visited the front of the site and witnessed mud and waste being tracked from the site down Chum St and Aberdare St due to rain conditions. I did this inspection as I was concerned that Cleanaway's licence conditions would not be complied with during the rain. This material was dangerous to other road users in that it made the road slippery and contributed to much road waste being sprayed on sidewalks. Later on, returning from Ipswich along Brisbane Road travelling East I stopped at the intersection lights with Flower Road. As I followed a long line of vehicles moving off when we had a green I observed slippery conditions and again much rubbish being thrown up from vehicles. This was all due to the mud and waste residue tracked from Aberdare St onto Brisbane Road before it became the Ipswich motorway. All other roads to that point were clear and clean due to the recent rain. What will Ipswich City Council, Main Roads and DES do about this continuing situation of non compliance with licence conditions and exposing other road users to dangerous conditions?	Collingwood Park							Unidentified			
OATNQ18	425	11/09/2018	9:00:00 AM	Call	CR81631										Odour	Odour Abatement Taskforce CR80317 Commenced from 8.45 today ongoing now 7 stated it was extremely strong like the rubbish has been dumped in his back room. Even though the main polluter Saper Landscape Supplies has been contacted by yourself, and the Ipswich City Council, the dust problem is still an issue. The ICC road sweeper has been a number of times to sweep the road, but it doesn't spray enough water to lay the dust, it just sweeps it to the middle of the road where it's once again spread by the traffic. A water truck needs to be employed to wash the road. The sidewalk grass is also grey with dust. All that seems to be happening at the moment, is the dust is moved from one side of the road to the other! Can you confirm what practical solution has been found, to stop this dust pollution or is this going to be an ongoing problem - going into the too-hard basket? This is about our health.... Thank you for your attention so far, but please can this issue be sorted. OATWQ18	514	3/10/2018	8:50:00 AM	Call											Odour	3/10/2018 at 8:50am - Received email from  from (weath City Council, referring odour issue as follows: "An (weath City Council) resident contacted to advise of Odour from Wood Mulching Industries - Seabank Rd Seabank. Customer (weath City Council) advised that the odour was first noticed on 27/09/2018 and has been worse since then. The odour is described as a very strong piggy smell, which is coming from Candy Sells at Trunk. (The odour was first about 9:30am this morning (27/9/2018) and since about 2:30pm this afternoon, it became real bad and is still for the time being. I would rate it a 6 (extremely strong) on the odour intensity scale. On 4/10/2018 and he doesn't live near WMI, he observed the odour when he was driving on the highway and odour was bad on 27/09/2018 & 3/10/2018. He described the odour as being a sulphur type smell. OATWQ18	712	2/11/2018	11:05:00 PM	Email	S186490										Odour	I would like to report odour outdoors of my home coming from the wind perhaps North or North west wind... Today @10 pm the odour was intense and was medium to low through out the day (intermittently with wind) It smells like poop... can't express it... very unpleasant smell... making me worried abt my family's health due to constant exposure to such things. Please act on this asap... if you wish to experience the smell, just drop by my home [redacted] around evening between 7pm - 10 pm (pretty sure you will get multiple encounters of this smell). OATWQ18	569	9/11/2018	10/11/2018	12:52PM 2:14:00 PM	Call Email	S186581 S186597						No	No		Odour	I wish to report a foul odour which pervaded our suburb on Friday November 10th from around 6pm. I cannot report when the odour stopped as we had to close up our house before retiring for the night. The odour smelled acid, having a chemical quality like burning plastic. It was carried on the wind from the south or south-west but as it surrounded the house, the source/direction was difficult to determine. It was not a "normal" odour, like burning vegetation. Please log and investigate as appropriate.														
OATWQ18	571	10/11/2018	12:10:00 PM	Call	S186618										Odour	Really strong acid chemical smell. It woke her up. Weather is still and stable with very little breeze. Odour strength varying	Redbank Plains	Chemical/gas smell	Strong	10/11/2018	Saturday		12:10:00 AM	00:00 - 00:59	Yes	SA				
OATWQ18	570	11/11/2018	3:59:00 PM	Web Form	S186599										Odour	Hi I've just come home at about 3.30 pm and have found the odour really terrible again... After I had contact with the lovely people who visited a while ago, we had one or two bad days and then it was great for a long time. Even when we had that beautiful rain, the odour seemed to be controlled. The last few days, I've noticed a slight smell starting again and today it's pretty bad. The wind is up a bit at times, but it's not blowing the smell away unfortunately - it's a lovely sunny day and mostly not a lot of wind. Regards, [redacted]	Ripley	Other	Strong	11/11/2018	Sunday	3:59:00 PM	15:00 - 15:59	Yes	SA

OATNQ18	2115											Repeat	Yes	Yes	Dust	Today, I visited the site to find, as always, there was no control of the dust that was being generated at the site. OF MORE CONCERN is the fact that there was no control of the significant dust being generated from the concrete crushing activities that are held on site. This dust is silicon dust, the dust that causes SILICOSIS. This is the same dust that has resulted to date of 54 (at least) Queenslanders being diagnosed with silicosis which often turns into a terminal condition. This dust, as always was being liberally distributed from the site, and today because of the high westerly winds was being visited on the people living downwind of the site in significant volumes. The video posted at clearly shows significant dust being picked up from the air due to lack of control and this dust being dispersed towards Cottingham Park.

DATWQ218	2109														Queensland as they are continuing to operate without restraint by not controlling dust generation. This is in direct contravention of the IA for the site. They are failing to comply with their own documented environmental and quality programs and appear to be placing the health of workers and truck drivers to the site at risk. Today, again, at Intrain, the site operated with massive clouds of dust being generated and being literally dispersed across the residents of Ipswich. View this post to witness the following: https://www.facebook.com/IntrainQueensland/218099125486022 The water fogger is still in the south west corner of the site busily wetting the internal road and Churn St. Adds no value to dust minimisation at all. Trucks bringing spoil from the western borrow across Churn St generate dust storms in themselves as inadequate road wetting occurs. Water trucks wander around the site witnessing copious clouds of dust being generated, sometimes they even water the tip face and even some roadways. Waste trucks dump waste and clouds of dust are generated, generally without any intervention by water truck cannons. Cleanaway equipment in itself generate significant dust as they move around the site. Site staff (Manager/Supervisor) get out of vehicles to observe the situation without any PPE. (See the white van) The lack of dust generation control and subsequent controls meant that significant clouds of dust were leaving the site to the west and south. Towards the start of the video a white van clearly breaches the site speed limit in the background as it races to do something. OATNG218	2116														Another working day another 2 official complaints about the lack of dust control at Cleanaway New Chum. Complaint 1. At 6:45 am this morning whilst the site was in full operation there were no dust minimisation measures in operation at the site. This included: No water trucks No water misters No sprinklers whilst significant amounts of dust were being generated and leaving the site with the morning breeze. At 7 am, finally the water mister was started and the water mist was being blown back across the internal roadway having no impact at all on dust control. At this time, one water truck was observed finally wetting down some roadway near the front of the tip face. It was clear that staff had spotted me observing the non compliance resulting in this reaction. Complaint 2. At 9:15 am this morning I revisited the site and observed the same situation where there was no control of dust generation at the site. One water truck was parked up at the water mister at the southern side of the site, not operating. At 9:15 am this morning I revisited the site and observed the same situation where there was no control of dust generation at the site. One water truck was parked up at the water mister at the southern side of the site, not operating. Cleanaway New Chum landfill Odour, but it will smell stronger once the breeze goes away Undertified Odour WMI Wood Mulching Industry Swarbank Air - Other I would like to make a complaint about a large uncontrolled fire at the Cleanaway New Chum dump tonight Sat Nov 24 2018. The fire has produced a very large plume of toxic plastic smelling smoke which was blown to the East across Collingwood Park and Goobah. Attached pictures were taken at approximately 02:30pm from Chum Street on the southern end of the dump looking north. This is completely unacceptable and is creating a major health hazard for my family and neighbours. This is the fifth major fire on this site in as many years. We are sick and tired of it and the inaction is DES. Photos attached in email. Air - Other RE FOLX, The fire below that was at this site last night and this morning was caused in part because Cleanaway is not complying with its EA conditions, namely Condition 164 that states: (b4) Deposited waste must be covered as soon as practicable to limit stormwater infiltration. Prevent exposure of waste and prevent issues arising from vectors and pest species. It is to be noted that in NOT complying with this condition it has allowed for the situation where fire can occur as there is no covering of deposited waste as soon as practicable. In the aftermath of the large fire on this site in July 2017 the community raised these issues with Cleanaway and DES and since again no action has been taken in complying or enforcing the EA. Consequently, the people of Ipswich have once again be exposed to unknown toxic smoke from this site. At what point with Cleanaway and DES take action to comply/enforce these conditions? For Ipswich City Council, the current approval is based upon I am writing to share my concerns regarding the dump fire at new chum tonight. Surely it is not reasonable to have fires at dumps this regularly, what is being dumped that is causing these fires? Or are they deliberately lit? I would be interested in reading investigation results. I am also concerned about the fumes and smoke itself, as the content of exactly what was burning is a complete mystery. Is there any indication as to what products were burning? How long will it be until it is safe to open our windows again? As long as we can smell the smoke or general dump smell, it's unsafe to be outside, this is our health, our children's health, are we willing to risk that? This dump has been proven unsafe, it needs to be closed and covered, immediately. No dumps should be within such dangerously close distances to residential areas. My final questions are: Was an official health warning issued? Will an official explanation and apology be issued? What action plan be implemented to ensure fires do not occur again? Odour Unsure but it is VERY STRONG Swarbank Dump It is reporting a distinct "off cooking smell" which started about 10pm today. The odour has been noticeable off and on for the past two weeks. Today the wind is from the west and I believe the source of the odour is possibly from the Dimmore Abattoir. Other residence. Moved to the area in January 2013 and noticed the smell when she moved in. She noticed it was very strong on Friday 23rd, Saturday 24th and Sunday 25th from 7am when she woke up and this morning from Sam. It had a very distinctive raw sewage smell (like the septic tank). It was so strong she had to close all the windows and doors. Asa also put her over extractor on to try and remove the odour from her house. She noticed it is very strong when there is a W, SW wind. She is happy to complete odour logs and report any odours she detects. She is also willing to complete a witness statement if required. She also raised concern about fires in the area. She was in the rural fire service and said that she noticed the smell over the weekend and was concerned about people burning during a fire ban and whether they had the appropriate permits. Odour Odour Odour The local dump or something in Ipswich! Odour Cleanaway New Chum Dump Fire - I just wanted you to be made aware the smoke from this fire affected our household in Milmerrac yesterday and Saturday night. My mother had to shut windows on a 24-hour hot day with my small children inside because of the toxic smell/smoke. I hope you are looking into this. Air - Other I would like to make a complaint about the unacceptable amount of dust generated on the Cleanaway New Chum site which I was being blown across Collingwood Park this afternoon between 4 and 5pm. Attached photos were taken on GIBBS Avenue looking directly towards the Cleanaway dump. Both my wife and daughter are suffering with sinus problems because of it and we cannot hang clothes out to dry because they get dusty outside. Why is this being allowed to happen? OATNQ18	2113														Unfortunately I have to lodge an official pollution report as the senior management of the Cleanaway New Chum dump site is failing to inform the residents of Ipswich when there is a query about their operation and possible non-compliance. It is unclear as to whether the liquid tanker shown in the attached photo is doing, and as senior management has declined to provide a response by a timely manner using the communication channels that the same manager insisted that we use I have had to make this formal report of what could be non-compliance with the EA of the site. DES continually advises the community to first raise their concerns with the operators of sites if they have an issue to see if the issue can be quickly resolved. However, as can be seen by the email that follows a very large waste company feels that it does not have to answer to the community in which it operates. It is also a requirement of EA's to respond to queries/complaints, regarding the operation of licensed facilities. We have formally requested a response twice and to date there has been no response other than to wait 2 months.																					Cleanaway New Chum site

OATNQ18	2118														Once again, like a broken record, I would like to complain about the lack of dust minimisation or control at the Cleanaway New Chum dump yesterday, 17th November 2018. I visited the site at 1pm yesterday and witnessed the following NON COMPLIANCE with the Site Based Management Plan (SBMP) that is supposedly in operation at this site to control and minimise dust generation at the site, 1. No internal roadways were watered. 2. Both water trucks at the site were parked up at the machinery compound, not in use. 3. No water sprinklers were in operation. 4. Only a water mistler was in operation BUT was placed too far away from the tipping face and waste compacting area to have any effect to control dust. MORE importantly the wind direction at the time was blowing water mist back away from the site onto Chum St. 5. Road sweeper not in operation Significant dust was being generated through compacting and dumping operations and NO CONTROL MEASURES were having any effect in reducing or controlling dust. After 15 minutes of observation a water truck roared up to the dump working face and busily watered areas that were not generating any dust at all. This turned out to be operated by the Green waste dump at Sweetbank.

OATWQ18	826	8/12/2018	9:44:00 AM	Call	C187238									Yes	Odour	Same odour as reported on Friday evening. Haven't stopped, it has gotten worse. Rated it a 5/5. Again expressed his frustration over the situation and didn't understand why his report would not be investigated until Monday. Ended the phone conversation with "I hope you're able to sleep tonight because we can't". I wish to lodge a formal complaint about the lack of litter control at this site. Due to the nature of waste being received at the site there is significant loose litter that is not being managed as per the site based management plan (SBMP) and litter is leaving the site during windy conditions. This issue has increased now that the height of the current tipping face has increased, with the tipping face now often being higher than the boundary fence. The boundary fence does capture some litter, but not all, and is not being cleared of litter on a regular basis as per the SBMP. The control measure in the Cleanaway SBMP " utilise temporary or permanent litter control structures such as portable litter screens close to the face of the down wind side and temporary fencing. Collect litter from structures regularly." is not being utilized at all, allowing significant litter being blown around and from the site in risk compliance with the EA. OATWQ18	757	12/12/2018	02:11PM	Email	C187307						repeat	Yes	Yes	Dust	Today over a period of 30 minutes I took significant videos and photos that clearly show the lack of ongoing compliance by Cleanaway to dust control at the site. The strong westerly winds that are occurring today are exacerbating the issue of the strong gusts are pushing the significant dust a significant distance toward the residents of Collingwood Park. Once again water trucks are not concentrating on the generation of dust by trucks unloading the rubbish and massive clouds of dust are being released to the atmosphere for dispersion among local residents. There has been significant complaints to Cleanaway and to date no improvement of any type is occurring at the site. More importantly all the staff and truck drivers visiting the site are being exposed to this significant dust hazard without any PPE being considered or supplied by Cleanaway. DATNW218	1023	17/01/2019	9:42:00 AM	Email	C188033										Unknown	Dust	Wish to report rising dust off the Seawbank industrial precinct from a large stockpile of white-looking (probably C80) waste in Seawbank in the area behind the Boral plant south of Redbank Plains Road/ Newell Drive. I believe the stockpile is south of the Veolia Wattle Glen landfill. The stockpile may belong to Bagdale Mining Industries (BMI). I observed this as I was driving east along Redbank Plains Road, near the intersection with the Cunningham Hwy. The dust was rising many metres into the air but it was not possible to tell how many as I was driving. I estimate the site was about 2 km away from my position at the time I saw the dust. Please have the Odour Assessment Team investigate as incidents in Redbank Plains are less than a kilometre from the area where the dust was rising.	Cottingswood Park	Other	Very Strong	18/01/2019	Friday		9:42:00 AM	09:00 - 09:50	Yes	Veolia Wattle Glen landfill

OATNG18	1105	29/01/2019	8:33:00 AM	Call						Repeat	N/A	N/A	Odour	CRT received an after hours complaint related to a burning vinyl-type odour that was possibly coming from Candy Sells. The odour began on Friday evening and continued intermittently throughout the long weekend and into Monday morning. There was a SE wind, and it was a 4/5 in intensity. The complainant indicated that there may have also been subtle works along the Werrisbee Highway with possible heating up of bitumen contributing to the odour. Information provided as follows: [redacted] contact client ref 75496 29 (1:15, called 7:44PM, left message as follows: Odour being experienced, same as usual, coming from Sewerbank, intensity 3 to 3.5 out of 7.	South Ripley	Unsure	Distinct	29/01/2019	Tuesday			7:44:00 PM	19:00 - 19:50	Yes	Sewerbank											
DATNW218	2130											Repeat	Yes	Yes	Odour	With to register a complaint about dust nuisance emanating from the Clearyway New Chum landfill. Yesterday 2nd October at 1pm, I was at the shopping centre, corner of Collingwood Drive and Eagle Street, Collingwood Park when I observed large plumes of dust rising high off the Clearyway New Chum landfill and sweeping off along the coast. This dust was reaching the height of the Western Shoreway (City Pace Hill) to the immediate west, which is approximately 120 metres high and being generated by landfill activities and trucks travelling the site. The dust from this landfill has increased over the preceding 4 months due to low rainfall. Every time I am in that location I see this happening. I could make a report every day that the site is operating. Other residents report that water trucks are often not working during operating hours. Measures such as water canon and misters when operating, are ineffective. Their reports, photographs, and video evidence are discounted and unheeded. The company has maintained the vast majority of the landfill in an unoperated state for many years on the apparent assumption that an expansion in height will be approved in the future. This has been done despite the condition of the operating licence which requires progressive rehabilitation. It has been done to the detriment of those living near this facility. Intensified smoky smell

OATNW218	1347	2/02/2019	4:53:00 PM	Email	C188617						Repeat	N/A	N/A	Odour	I would like to submit my complaint of a strong odour in the Ripley township, specifically [redacted] It has triggered in the air for two days now from morning to night. I was outside for about 10 minutes yesterday afternoon and felt sick and headache. It is a pungent irritating odour. I assume the odour is coming from the direction the wind is blowing which is the Swanbank dump site. I would also like to report that the pollution hotline was not operational today at 4:30pm. As residents of Ripley we should be able to enjoy our backyards without feeling sick and having to return indoors. I would like to know what will be done to rectify this problem.
