Description

The Maleny STP operator identified a low sewage flow into the plant - 60, 80 then 100 KL lower than average with normal water consumption in the catchment.

Crews dispatched and found manhole 829211 in Ash Street Maleny overflowing into Obi Obi Creek (approx 5 lt per minute)

Area sandbagged initially to stop flow into creek.

Blockage with rubble and grit (possibly from recent sewer connection works) of 150mm sewer the cause - blockage removed, solids cleaned up and area disinfected. Signs erected and water samples taken. High ecoli downstream of the spill for a number of days.

CCTV of gravity mains to be done.

6 actions being completed by Unitywater
