1. Overview

This is a report for the quarterly period from July to September 2022 (Q1). The data in this report are derived from the *OzChase* system, and on-track veterinarian and race-day Stewards' reports. It is produced by the Queensland Racing Integrity Commission (the Commission) to document the following:

1. Greyhound pups whelped and named in Queensland, as reported by owners and recorded by the Commission.
2. Greyhound injuries and deaths of racing greyhounds that have occurred at Queensland TAB and non-TAB race meetings. The race-related injury data are sourced from on-track veterinarians' and stewards' reports, and *OzChase* system reports. Race-related injury data does not include injuries that occurred in trials.
3. Greyhound deaths and retirement notifications as reported by Queensland licensees to the Commission and held in *OzChase*.

Reports of whelped, named, and retired greyhounds may vary over time for the same reporting period due to the timing of notification lodgement. To standardise these, they are recorded as at a particular date.

This quarterly report provides all stakeholders, including greyhound racing participants and the community with a summary of greyhound racing and registration.

2. Greyhound pups born (whelped) and named from July to September 2022

During the period July to September 2022, there were 213 live greyhound pups born (whelped) (Table 1) and 328 greyhounds named (Table 2) in Queensland. Greyhounds are generally named for racing at between 12 and 18 months of age, creating a delay between whelping and naming.

Table 1. Greyhound pups born (whelped) during the period July to September 2022.

Month	Greyhounds whelped
July 2022	72
August 2022	83
September 2022	58
Q1 Total	213

Table 2. Greyhounds named during the period July to September 2022.

Month	Greyhounds named
July 2021	134
August 2022	117
September 2022	77
Q1 Total	328

3. Injury Categories

3.1. Injury Severity Classification

Greyhounds injured or involved in incidents at Queensland race meetings are examined by on-track veterinarians. These incidents and actions are reported to the Commission and included in the stewards' reports for each race meeting. Injuries vary from very minor incidents with no treatment or incapacitation (stand down) period required to severe injuries that result in the death or require euthanasia of a greyhound. Mandatory stand down periods allow for injury recovery before a greyhound is permitted to race again.

Race-related injury data does not include injuries that occurred in trials.

Injuries are recorded as per on-track veterinarian and race-day Stewards' reports, stored in the *OzChase* system.

Injury signs and severity that were alter following further veterinary diagnosis is not available in OzChase and therefore not included in the results.

4. Total reported injuries to racing greyhounds from July to September 2022

Injury rates are standardised as injuries per 1000 starters. Every greyhound is counted each time it races in the reporting period to standardise injuries per 1000 starters. As the rate of injury is expressed per 1000 starters, injuries sustained by non-starters (e.g., injuries sustained during trialling or prior to boxing) are not included.

During the period July to September 2022, there were 219 greyhound race meetings held at Queensland venues. At these race meetings, 2,292 unique greyhounds started.

Table 3. Total greyhound racing injuries and severity at Queensland race meetings from July to September 2022. Number of starters = 12,948.

Injury category	Incapacitation period (stand down)	Number of incidents	Incidents per 1,000 Starters
AG	Nil	12	0.93
BG	3 to 10 days	243	18.77
CG	14 to 21 days	64	4.94
DG	28 to 59 days	52	4.02
DF	60+ days	21	1.62
EF	Deceased or euthanased	4	0.31
Total A-E		396	30.58
Total F (Serious)		25	1.93
Total G (Non-serious)		371	28.65

4.1. Reported greyhound racing-related deaths from July to September 2022

Racing fatalities are defined as deaths that occur because of injuries and/or incidents during or immediately following a race. These include injuries that resulted in the euthanasia of greyhounds at a race meeting. The data does not include euthanasia that may occur after race meetings when further diagnostic advice or treatment is sought¹.

Table 4. Greyhounds euthanased or deceased at Queensland race meetings from July to September 2022. Injuries are as described in the on-track veterinarians' and/or stewards' reports.

Injury	Count
Sudden death (Cardiac)	3
Spinal injury	1
Total	4

¹ These are captured through deceased/retirement reporting.

5. Reported injuries by racetrack

Table 5. Number of greyhound race starters and all injuries at Queensland race meetings from July to September 2022.

Venue	Track surface	Starters	Total number of injury incidents	Total injury incidents per 1000 starters	Total number of deceased or euthanased	Deceased or euthanased per 1000 starters
Albion Park	Sand	4276	120	28.06	1	0.23
Bundaberg	Grass	190	11	57.89	0	0.00
Capalaba	Grass	1468	43	29.29	1	0.68
Ipswich	Sand	3459	142	41.05	0	0.00
Rockhampton	Sand	1667	40	24.00	1	0.60
Townsville	Sand	1888	40	21.19	1	0.53
Total		12948	396	30.58	4	0.31

6. Greyhounds reported as retired, deceased, or euthanased during July to September 2022

Greyhounds that are retired from racing, rehomed, or euthanased are recorded in the OzChase database. These notifications are self-reported by owners to the Commission. The last registered owner of the greyhound must submit a notification of retirement, death or euthanasia as specified by Greyhounds Australasia Rule 22.

Caveats

- Reports of retirements from OzChase may vary over time for the same data set due to late lodgement of retirement notifications. To standardise these, they are taken from OzChase records at the midpoint of each following month.
- Data from the Commission's Greyhound Adoption Program (GAP) are included; however, euthanasia data from other adoption programs and agencies are not available.
- Data for greyhounds retired to adoption programs other than the GAP are currently not available unless provided by owners in the greyhound's retirement notification.
- The category of "surrendered to other agency" does not refer to dedicated adoption or rehoming agencies and includes universities and veterinary practices. Euthanasia and adoption data from these agencies are not currently available.

Table 6. Greyhound mortality notifications from July to September 2022, including data contained in Table 5, as reported to the Commission by owners. The data in this section is categorised based on the information provided to the Commission by participants. Reports for Quarter 1 were sourced from *OzChase* on 15 October 2022.

Category	July 2022	August 2022	September 2022	Total
Deceased accidental causes	1	5	0	6
Deceased illness or age	4	3	0	7
Deceased natural causes	1	1	0	2
Euthanased/deceased at track due to injury	1	3	0	4
Euthanased due to illness or age	12	8	1	21
Euthanased due to injury	8	1	8	17
Euthanased due to not suitable for racing	0	2	0	2
Euthanased due to not suitable for rehoming	10	13	12	35
Euthanased by GAP due to health and/or behavioural issues	3	0	3	6
Total deceased or euthanased	40	37	24	100

Table 7. Greyhound retirement notifications from July 2021 to September 2022 as reported to the Commission by owners. Reports were sourced from *OzChase* on 15 October 2022.

The Greyhound Adoption Program (GAP)

The GAP is part of the Queensland Racing Integrity Commission and is dedicated to finding suitable homes for retired greyhounds. The GAP team works with the racing industry to guide participants in preparing their racing greyhounds for retirement. Every greyhound in the program is health checked and behaviourally assessed, de-sexed, wormed and vaccinated. The program aims to help transition greyhounds from racing to pet life.

If you, or anyone you know, has space in their life for a retired racer, visit www.gapqld.com.au to find out how you can foster or adopt one of these beautiful animals.

For more information on this report, contact QRIC's External Affairs team via communication@qric.qld.gov.au.

Queensland Racing Integrity Commission

DEPUTY COMMISSIONER BRIEFING NOTE

Approved Not Approved Noted
Further information required

Commissioner

Dated

TO: Commissioner and Deputy Commissioner,
Queensland Racing Integrity Commission

SUBJECT: Publication of the Greyhound Breeding, Race Injury and Retirement Quarterly Report Q3 January 2022 to March 2022, and Q4 April 2022 to June 2022 (GBRI&R Q3 & Q4 Reports 2022).

TIMEFRAME

Approval of this briefing note is non-urgent.

RECOMMENDATION

It is recommended that the Commissioner:

- **approve** the publication of the GBRI&R Q3 and Q4 Reports (**Attachments 1 and 2**) to the Queensland Racing Integrity Commission's (the Commission) website.

BACKGROUND/KEY ISSUES

- The GBRI&R Q3 and Q4 Reports have been prepared by the Animal Welfare Unit (AWU) and contain information on:
 - injuries in greyhounds that occur during racing in Queensland,
 - greyhounds whelped and named in Queensland, and
 - retirement, death, and euthanasia of greyhounds as reported by Queensland licensees during this reporting period.
- The proactive publication of these data sets supports the Commission's commitment to reporting industry animal welfare data in a transparent manner.
- Form 106 (retirement notification) data may vary slightly based on the date that information was accessed due to the way OzChase reports on this data. Form 106 data is reliant on accurate and timely self-reporting by participants and can therefore fluctuate on a day-to-day basis.
- To ensure the reliability of the information reported, all retirement notification data is provided with an accessed "as at" date.
- The Commission's Animal Welfare Unit has provided Explanatory Notes (**Attachment 3**).
- The Commission's Member Services team has provided the whelping, naming, and retirement data.
- When approved for publication, the External Affairs team will provide the frontispiece and load this Quarterly Report to the Commission's website.
- *Key Communication Messages:* The release of this information provides transparency around the reporting of racing injuries and retirement data and is consistent with the Commission's policy to proactively release information to the public.

HUMAN RIGHTS

- Not applicable.

1. Overview

This is a report for the quarterly period from January to March 2022 (Q3). The data in this report are derived from the *OzChase* system, and on-track veterinarian and race-day Stewards' reports. It is produced by the Queensland Racing Integrity Commission (the Commission) to document the following:

1. Greyhound pups whelped and named in Queensland, as reported by owners and recorded by the Commission.
2. Greyhound injuries and deaths of racing greyhounds that have occurred at Queensland TAB and non-TAB race meetings. The race-related injury data are sourced from on-track veterinarians' and stewards' reports, and *OzChase* system reports.
3. Greyhound deaths and retirement notifications as reported by Queensland licensees to the Commission and held in *OzChase*.

Reports of whelped, named, and retired greyhounds may vary over time for the same data set due to the timing of notification lodgement. To standardise these, they are recorded as at a particular date.

This quarterly report provides all stakeholders, including greyhound racing participants and the community with a summary of greyhound racing and registration.

2. Greyhound pups born (whelped) and named from January 2022 to March 2022

During the period January to March 2022, there were 422 live greyhound pups born (whelped) (Table 1) and 270 greyhounds named (Table 2) in Queensland. Greyhounds are generally named for racing at between 12 and 18 months of age, creating a delay between whelping and naming.

Table 1. Greyhound pups born (whelped) during the period January to March 2022 as at the 26th of May 2022 and compared with the previous quarters.

Mach 2022	105
Q3 Total	270

3. Injury Categories

3.1. Injury Severity Classification

Greyhounds injured or involved in incidents at Queensland race meetings are examined by on-track veterinarians. These incidents and actions are reported to the Commission and included in the stewards' reports for each race meeting. Injuries vary from very minor incidents with no treatment or incapacitation (stand down) period required to severe injuries that result in the death or require euthanasia of a greyhound. Mandatory stand down periods allow for injury recovery before a greyhound is permitted to race again.

4. Total reported injuries to racing greyhounds from January 2022 to March 2022

Injury rates are standardised as injuries per 1000 starters. Every greyhound is counted each time it races in the reporting period to standardise injuries per 1000 starters. During the period January to March 2022, there were 144 greyhound race meetings held at Queensland venues. At these race meetings, there were 2,125 unique individual greyhounds raced for a total of 11,859 starters.

Table 3. Total greyhound racing injuries, incidents, and severity at Queensland race meetings from January to March 2022.

Injury category	Incapacitation period	Number of incidents	Incidents per 1000 starts
AG	Nil	9	0.76
BG	3 to 10 days	248	20.91
CG	14 to 21 days	56	4.72
DG	28 to 59 days	42	3.54
DF	60+ days	22	1.86
EF	Deceased or euthanased ¹	6	0.51
Total A-E		383	32.3
Total F (Serious)		28	2.36
Total G (Non-serious)		355	29.95

¹ The number of fatalities in Table 3 is sourced from Official On-Track Veterinarian's reporting. It may differ from the self-reported number of euthanasia and deceased greyhounds presented in Table 5.

Table 4. Greyhound euthanased or deceased at Queensland race meetings from January to March 2022. Injuries are as described in the on-track veterinarians' and/or stewards' reports.

Injury	Count
Left - Foreleg - Radius/Ulna Fracture	4
Right - Foreleg - Radius/Ulna Fracture	1
Left - Hindleg - Tarsal Fracture/Dislocation (Hock)	1
Total	6

5. Reported injuries by racetrack

Table 5. Number of greyhound race starters and all injuries at Queensland race meetings³ from January to March 2022.

Venue	Track surface	Starters	Total number of injury incidents	Total injury incidents per 1000 starts	Total number of deceased or euthanased	Deceased or euthanased per 1000 starts
Albion Park	Sand	2,666	76	28.51	1	0.38
Bundaberg	Grass	815	54	66.26	1	1.23
Capalaba	Grass	953	25	26.23	0	0.00

1. Overview

This is a report for the quarterly period from April to June 2022 (Q4). The data in this report are derived from the *OzChase* system, and on-track veterinarian and race-day Stewards' reports. It is produced by the Queensland Racing Integrity Commission (the Commission) to document the following:

1. Greyhound pups whelped and named in Queensland, as reported by owners and recorded by the Commission.
2. Greyhound injuries and deaths of racing greyhounds that have occurred at Queensland TAB and non-TAB race meetings. The race-related injury data are sourced from on-track veterinarians' and stewards' reports, and *OzChase* system reports. Race-related injury data does not include injuries that occurred in trials.
3. Greyhound deaths and retirement notifications as reported by Queensland licensees to the Commission and held in *OzChase*.

Reports of whelped, named, and retired greyhounds may vary over time for the same reporting period due to the timing of notification lodgement. To standardise these, they are recorded as at a particular date.

This quarterly report provides all stakeholders, including greyhound racing participants and the community with a summary of greyhound racing and registration.

2. Greyhound pups born (whelped) and named from April to June 2022

During the period April to June 2022, there were 320 live greyhound pups born (whelped) (Table 1) and 262 greyhounds named (Table 2) in Queensland. Greyhounds are generally named for racing at between 12 and 18 months of age, creating a delay between whelping and naming.

Table 1. Greyhound pups born (whelped) during the period April to June 2022 as of 15 July 2022 and compared with the previous quarters.

2021–22 Total	1134

3. Injury Categories

3.1. Injury Severity Classification

Greyhounds injured or involved in incidents at Queensland race meetings are examined by on-track veterinarians. These incidents and actions are reported to the Commission and included in the stewards' reports for each race meeting. Injuries vary from very minor incidents with no treatment or incapacitation (stand down) period required to severe injuries that result in the death or require euthanasia of a greyhound. Mandatory stand down periods allow for injury recovery before a greyhound is permitted to race again.

Race-related injury data does not include injuries that occurred in trials.

Injuries are recorded as per on-track veterinarian and race-day Stewards' reports, stored in the OzChase system. Injury signs and severity that were alter following further veterinary diagnosis is not available in OzChase and therefore not included in the results.

4. Total reported injuries to racing greyhounds from April to June 2022

Injury rates are standardised as injuries per 1000 starters. Every greyhound is counted each time it races in the reporting period to standardise injuries per 1000 starters. As the rate of injury is expressed per 1000 starters, injuries sustained by non-starters (e.g., injuries sustained during trialling or prior to boxing) are not included.

During the period April to June 2022, there were 149 greyhound race meetings held at Queensland venues. At these race meetings, there were 2,088 unique individual greyhounds raced for a total of 12,369 starters.

Table 3. Total greyhound racing injuries and severity at Queensland race meetings from April to June 2022. Number of starters = 12,369.

Injury category	Standdown Period	Number of incidents	Incidents per 1,000 Starters
AG	Nil	7	0.57
BG	3 to 10 days	237	19.16
CG	11 to 14 days	75	6.06
	14 to 21 days		
	22 to 28 days		
DG	28 to 59 days	37	2.99
DF	60+ days	16	1.29
EF	Deceased or euthanased	2	0.16
Q4 Total		374	30.24

4.1. Reported greyhound racing-related deaths from April to June 2022

Racing fatalities are defined as deaths that occur because of injuries and/or incidents during or immediately following a race. These include injuries that resulted in the euthanasia of greyhounds at a race meeting. The data does not include euthanasia that may occur after race meetings when further diagnostic advice or treatment is sought¹.

Table 4. Greyhound euthanased or deceased at Queensland race meetings from 1 April to 30 June 2022. Injuries are as described in the on-track veterinarians' and/or stewards' reports.

Injury	Count
Left - Foreleg - Radius/Ulna Fracture	1
Heart	1
Total	2

Table 5. Serious injuries (excluding euthanased or deceased) occurring at Queensland race meetings from 1 April to 30 June 2022. Injuries are as described in the on-track veterinarians' and/or stewards' reports.

Injury	Count
Left - Foreleg - accessory carpal fracture.	2
Left – Hindleg – Fibula Fracture	1
Left – Hindleg – Tibia Fracture	1
Right - Foreleg - Radius/Ulna Fracture	2
Right - Hindleg - Tarsal Fracture/Dislocation (Hock)	12
Total	18

¹ These are captured through deceased/retirement reporting.

5. Reported injuries by racetrack

Table 6. Number of greyhound race starters and all injuries at Queensland race meetings from April to June 2022.

Total		50,860	1502	29.53	19	0.37

6. Greyhounds reported as retired, deceased, or euthanased during April to June 2022

Greyhounds that are retired from racing, rehomed, or euthanased are recorded in the OzChase database. These notifications are self-reported by owners to the Commission. The last registered owner of the greyhound must submit a notification of retirement, death or euthanasia as specified by Greyhounds Australasia Rule 22.

Caveats

- Reports of retirements from *OzChase* may vary over time for the same data set due to late lodgement of retirement notifications. To standardise these, they are taken from OzChase records at the midpoint of each following month.
- Data from the Commission's Greyhound Adoption Program (GAP) are included; however, euthanasia data from other adoption programs and agencies are not available.
- Data for greyhounds retired to adoption programs other than the GAP are currently not available unless provided by owners in the greyhound's retirement notification.
- The category of "surrendered to other agency" does not refer to dedicated adoption or rehoming agencies and includes universities and veterinary practices. Euthanasia and adoption data from these agencies are not currently available.

² Racing did not occur at Albion Park in April 2022 due to flood damage.

Table 8. Greyhound mortality notifications from April to June 2022, including data contained in Table 5, as reported to the Commission by owners. The data in this section is categorised based on the information provided to the Commission by participants. Reports for Quarter 4 were sourced from *OzChase* on 15 July 2022.

The Greyhound Adoption Program (GAP)

The GAP is part of the Queensland Racing Integrity Commission and is dedicated to finding suitable homes for retired greyhounds. The GAP team works with the racing industry to guide participants in preparing their racing greyhounds for retirement. Every greyhound in the program is health checked and behaviourally assessed, de-sexed, wormed and vaccinated. The program aims to help transition greyhounds from racing to pet life.

If you, or anyone you know, has space in their life for a retired racer, visit www.gapqld.com.au to find out how you can foster or adopt one of these beautiful animals.

For more information on this report, contact QRIC's External Affairs team via communication@qric.qld.gov.au.

Queensland Racing Integrity Commission

DEPUTY COMMISSIONER BRIEFING NOTE

Approved Not Approved Noted
Further information required

Commissioner

Dated

TO: Commissioner and Deputy Commissioner,
Queensland Racing Integrity Commission

SUBJECT: Publication of the Greyhound Breeding, Race Injury and Retirement Quarterly Report
Q1 July 2022 to September 2022 (GBRI&R Q1 Report 2022).

TIMEFRAME

Approval of this briefing note is non-urgent.

RECOMMENDATION

It is recommended that the Commissioner:

- **approve** the publication of the GBRI&R Q1 Report (**Attachment 1**) to the Queensland Racing Integrity Commission's (the Commission) web site.

BACKGROUND/KEY ISSUES

- The GBRI&R Q1 Report has been prepared by the Animal Welfare Unit and contains summaries of:
 - injuries in greyhounds that occur during racing in Queensland,
 - greyhounds whelped and named in Queensland, and
 - retirement, death, and euthanasia of greyhounds as reported by Queensland licensees during this reporting period.
- The proactive publication of these data sets supports the Commission's commitment to reporting industry animal welfare data in a transparent manner.
- Form 106 (retirement notification) data may vary slightly based on the date that information was accessed due to the way OzChase reports on this data. Form 106 data is reliant on accurate and timely self-reporting by participants and can therefore fluctuate on a day-to-day basis.
- To ensure the reliability of the information reported, all retirement notification data is provided with an accessed "as at" date.
- The Commission's Animal Welfare Unit has provided Explanatory Notes (**Attachment 2**).
- The Commission's Member Services team has provided the whelping, naming, and retirement data.
- When approved for publication, the External Affairs team will provide the frontispiece and load this Quarterly Report to the Commission's website.
- *Key Communication Messages:* The release of this information provides transparency around the reporting of racing injuries and retirement data and is consistent with the Commission's policy to proactively release information to the public.

HUMAN RIGHTS

- Not applicable.

1. Overview

This is a report for the quarterly period from January to March 2023 (Q3). The data in this report are derived from the OzChase system, and on-track veterinarian and race-day Stewards' reports. It is produced by the Queensland Racing Integrity Commission (the Commission) to document the following:

1. Greyhound pups whelped and named in Queensland, as reported by owners and recorded by the Commission.
2. Greyhound injuries and deaths of racing greyhounds that have occurred at Queensland TAB and non-TAB race meetings. The race-related injury data are sourced from on-track veterinarians' and stewards' reports, and OzChase system reports. Race-related injury data does not include injuries that occurred in trials.
3. Greyhound deaths and retirement notifications as reported by Queensland licensees to the Commission and held in OzChase.

Reports of whelped, named, and retired greyhounds may vary over time for the same reporting period due to the timing of notification lodgement. To standardise these, they are recorded as at a particular date.

This quarterly report provides all stakeholders, including greyhound racing participants and the community with a summary of greyhound racing and registration.

2. Greyhound pups born (whelped) and named from January to March 2023

During the period January to March 2023, there were 288 live greyhound pups born (whelped) (Table 1) and 301 greyhounds named (Table 2) in Queensland. Greyhounds are generally named for racing at between 12 and 18 months of age, creating a delay between whelping and naming.

Table 1. Greyhound pups born (whelped) during the period January to March 2023.

Month	Greyhounds whelped
January 2023	88
February 2023	66
March 2023	134
Q3 Total	288

Table 2. Greyhounds named during the period January to March 2023

Month	Greyhounds named
January 2023	73
February 2023	129
March 2023	99
Q3 Total	301

3. Injury Categories

3.1. Injury Severity Classification

Greyhounds injured or involved in incidents at Queensland race meetings are examined by on-track veterinarians. These incidents and actions are reported to the Commission and included in the stewards' reports for each race meeting. Injuries vary from very minor incidents with no treatment or incapacitation (stand down) period required to severe injuries that result in the death or require euthanasia of a greyhound. Mandatory stand down periods allow for injury recovery before a greyhound is permitted to race again.

Race-related injury data does not include injuries that occurred in trials.

Injuries are recorded as per on-track veterinarian and race-day Stewards' reports, stored in the OzChase system. Injury signs and severity that were altered following further veterinary diagnosis is not available in OzChase and therefore not included in the results.

4. Total reported injuries to racing greyhounds from January to March 2023

Injury rates are standardised as injuries per 1000 starters. Every greyhound is counted each time it races in the reporting period to standardise injuries per 1000 starters. As the rate of injury is expressed per 1000 starters, injuries sustained by non-starters (e.g., injuries sustained during trialling or prior to boxing) are not included.

During the period January to March 2023, there were 161 greyhound race meetings held at Queensland venues. At these race meetings, 2318 unique greyhounds started.

Table 3. Total greyhound racing injuries and severity at Queensland race meetings from January to March 2023. Number of starters =13,031.

Injury category	Incapacitation period (stand down)	Number of Incidents	Incidents per 1000 Starts
Category AG	Nil	14	1.07
Category BG	3 to 10 days	257	19.72
Category CG	14 to 21 days	128	9.82
Category DG	28 to 59 days	52	3.99
Category DF	60+ days	30	2.30
Category EF	Deceased or Euthanised	3	0.23
Total A-E		484	37.14
Total F (Serious)		33	2.53
Total G (Non-serious)		451	34.61

4.1. Reported greyhound racing-related deaths from January to March 2023

Racing fatalities are defined as deaths that occur because of injuries and/or incidents during or immediately following a race. These include injuries that resulted in the euthanasia of greyhounds at a race meeting. The data does not include euthanasia that may occur after race meetings when further diagnostic advice or treatment is sought¹.

Table 4. Greyhounds euthanised or deceased at Queensland race meetings from January to March 2023. Injuries are as described in the on-track veterinarians' and/or stewards' reports.

Injury	Count
Right foreleg fracture (radius/ulna/scapula)	1
Right hindleg fracture (hock)	1
Left hindleg fracture (hock)	1
Total	3

¹ These are captured through deceased/retirement reporting.

5. Reported injuries by racetrack

Table 5. Number of greyhound race starters and all injuries at Queensland race meetings from January to March 2023.

Venue	Surface	Starters	Total number of injury incidents	Total injury incidents per 1000 starters	Total number of deceased or euthanised	Deceased or euthanised per 1000 starters
Albion Park	Sand	3827	144	37.63	0	0.00

Townsville	Sand	1861	29	15.58	1	0.54
Totals		13031	484	37.14	3	0.23

6. Greyhounds reported as retired, deceased, or euthanised during January to March 2023

Greyhounds that are retired from racing, rehomed, or euthanised are recorded in the OzChase database. These notifications are self-reported by owners to the Commission. The last registered owner of the greyhound must submit a notification of retirement, death or euthanasia as specified by Greyhounds Australasia Rule 22.

Caveats

- Reports of retirements from OzChase may vary over time for the same data set due to late lodgement of retirement notifications. To standardise these, they are taken from OzChase records at the midpoint of each following month.
- Data from the Commission's Greyhound Adoption Program (GAP) are included; however, euthanasia data from other adoption programs and agencies are not available.
- Data for greyhounds retired to adoption programs other than the GAP are currently not available unless provided by owners in the greyhound's retirement notification.
- The category of "surrendered to other agency" does not refer to dedicated adoption or rehoming agencies and includes universities and veterinary practices. Euthanasia and adoption data from these agencies are not currently available.

Table 6. Greyhound mortality notifications from January to March 2023, as reported to the Commission by owners. The data in this section is categorised based on the information provided to the Commission by participants. Reports were sourced from OzChase on 4 May 2023.

All serious injuries (>60 day stand down and/or fractures) are summarised in the Table 1 for consideration. A separate excel sheet has been provided with additional detail. Refer to Attachment 6.

s.73 Irrelevant – the greyhound was injured in catching pen and euthanased for a hindleg tibial fracture. There is no vision of the catching pen so the group must rely on stewards' and the veterinarian's notes.

The description "catastrophic" was used in the steward's report. The group discussed the use of this term. KC noted that the term should only be used if the clinical injury is unrepairable. Issues may arise when two greyhounds suffer a tibial fracture, and one is referred for treatment, and the other euthanased.

The group agreed that stewards reports need to be consistent and provide a more clinical description.

ACTIONS:

1. Discussion with Stewards regarding the nomenclature for injuries and euthanasia (QRIC).
2. AT to review with admin the reporting process regarding the injury in the Stewards Report and report back to AB (QRIC).
3. NH to discuss options for obtaining catching pen footage from clubs and let GRIWG and RACC know (RQ) - some clubs have cameras already, but they club owned and operated.

s.73 Irrelevant info – The greyhound was dragged down by another runner causing him to fall, and fracture both front legs. The case documents included reference to a hock injury. This has been corrected.

s.73 Irrelevant info – this was an older greyhound (44 months) that suffered a foreleg carpal fracture at Ipswich. The dog fell when severely checked. SF noted that there appears to be a pattern of foreleg injuries at Ipswich.

ACTION: AMB to look at this and see whether the data has changed in relation to type of injury (fore or hind leg) at each track

s.73 Irrelevant info – Ipswich trial, no vision. The dog suffered some interference from another runner and made contact with the rail. It is not clear whether the fractures caused the dog to contact the rail, or whether the rail caused the fractures.

ACTIONS:

1. Amended OTV name to Ann Williams (QRIC)
2. Stewards to provide vision of official stewards' trials (QRIC)

s.73 Irrelevant info – fell in the catching pen and suffered a hock fracture. The greyhound raced in Victoria with 42 starts, but had raced at Rockhampton 6 times, and was familiar with the track. Need catching pen footage to support investigation and review.

<p>AT stated that the Stewards reviewed this case and found that the injury was assessed as more severe than the fractured hock of another greyhound (s.73 Irrelevant) euthanased off-track several days earlier, and that the injury was deemed by the vet to be unreparable. This information was held in the stewards' register of serious injuries.</p> <p>OzChase did not clearly report that the greyhound was euthanased on track in its status. This has been corrected, and the new vet exam form will support better reporting. on OzChase and make it easier.</p> <p>ACTIONS:</p> <ol style="list-style-type: none"> 1. As above - NH to discuss options for obtaining catching pen footage from clubs and let GRIWG and RACC know (RQ) - some clubs have cameras already, but they club owned and operated. Rockhampton to be prioritized for this (RQ). 2. AB to review Stewards register for additional comments for next set of reports (QRIC). 3. AB to prepare a report on catching pen injuries per track for consideration at RACC (QRIC). 4. Review decoy lure protocols and management and determine whether there are any improvements that can be made (RQ). 5. AT to provide new drafting instructions to stewards to improve consistency of reporting. <p>Serious Injuries</p> <p>(s.73 Irrelevant) was x-rayed, treated, and recovered, has now returned to racing.</p> <p>(s.73 Irrelevant info) – the greyhound returned to racing 22/1/2023 and was stood down again for same injury with 28 days.</p> <p>There is history with (s.73 Irrelevant info) given 21 days on 14/8/2022 for a carpal strain, injured again 11/12/2022 and given a 90 day stand down.</p> <p>ACTIONS:</p> <ol style="list-style-type: none"> 1. AMB to collate info from members on the trainer of (s.73 Irrelevant info) and request details from NH with a view to establishing any patterns and kennel Visit with a QRIC Vet (QRIC). 2. Add trainers and owners to the injury spreadsheets (QRIC). <p>BS stated that he supports the intent of the above action, but that an intelligence system which is data driven is required to systematically looks at this data. ML commented this is being reviewed, BS offers to provide input to support this if it would be helpful. ML to pass on offer to QRIC DC.</p> <p>ACTIONS:</p> <ol style="list-style-type: none"> 1. Collate info from the group on the trainer of (s.73 Irrelevant info) Including RMIS applications, and flag with stewards for a kennel visit with a QRIC vet (QRIC). 2. Add trainer and owner to serious injury spreadsheet (QRIC). 		
--	--	--

	<p>3. Agenda item for the next meeting - discuss the current reporting that is provided to vets and what we could do to improve their knowledge about the injury history of dogs to support better pre-race checks. What are the options to improve this for them (QRIC).</p> <p>4. Stewards to investigate the ability of Stewards to override and increase the stand down period appointed by the vet. If not, need to be addressed through QRIC policy (QRIC).</p>		
5.	<p>Submission – Discussion Paper - Greyhounds euthanased following racing injuries referred off track</p> <p>Some data is missing; additional off-track euthanasia from early 2022.</p> <p>AB noted that failure to treat injured dogs is a huge reputational risk and a threat to social licence.</p> <p>The group acknowledged that there are three elements to reducing the number of greyhounds euthanased off track:</p> <ol style="list-style-type: none"> 1. Referral for off track veterinary care, directed by a Steward's order. 2. Support for costs through the RMIS. 3. Regulation that supports penalties (a rehoming/euthanasia local rule). <p>BS questioned the progress on the rehoming local rule. ML stated that the rule was taken off the table by RQ at the last RACC on the basis there are insufficient homes for retired greyhounds. KC confirmed that there was agreement that the pressure on rehoming would be too great for a euthanasia rule to be implemented. ML stated that RQ has argued that was the case and it may be, but in terms of this specific issue, the rule is the third part of resolving the issue. ML also stated that the QRIC had presented a rehoming strategy to RQ to improve options for rehoming.</p> <p>AB summarised that Ipswich is a significant outlier, with more greyhounds euthanased off track than from any other. This may be a result of several factors, including socio-economic, willingness to rehabilitate dogs, owner, and trainer views.</p> <p>SF indicated that she sees worse injuries at Ipswich – exploded hocks versus fractured hocks, often with multiple fractures.</p> <p>KS used the example of the greyhound s.73 Irrelevant info injured on track. She stated that, the trainer was insistent that regardless of the injury, that the dog was to be euthanased.</p> <p>ACTIONS:</p> <ol style="list-style-type: none"> 1. NH to send through additional data to AB (RQ). 2. s.73 Irrelevant info Jan) and s.73 Irrelevant info (Feb) have been added (QRIC). 3. Review the paper and refine the actions and present paper to RACC (QRIC). 4. Open a discussion with GRV, GRNSW and other states to look at off-track euthanasia data (QRIC). 	AMB	

6.	<p>Other Business</p> <p>LURE AND CATCHING PEN DESIGN AND PROTOCOLS</p> <p>BS – considerable consideration has gone into the catching pen design for the Yamanto tracks. This work may be used as a standard to set for alterations to existing tracks. UTS has provided considerable input into this.</p> <ul style="list-style-type: none"> • The distance from the finish to the catching pen needs to be at least 100m to provide sufficient time for lure drive to accelerate and clear the catching pen before dogs come in. • The angle in which the catching pen comes off the track (currently they tend to swing off to the right and left – causing often hard turns at speed. • UTS have also done a lot of work on sight lines to help improve direction – sight lines are only 2-3 metres in an 11-12m width; so Yamanto will look at 14 m to broaden the line of sight for dogs and to reduce bunching • Decoy lures are not used in QLD. Clubs have been asked to consider the introduction of decoy lures. Looking at automated decoy lures at new Yamanto. Decoy system will come into simultaneous viewing as the lure disappears – automated and not reliant on human management. Catching pens at GBGC will be longer and wider to enable the decoy to be central in the pen. Most interstate decoys are at ground level – this tends to encourage lead dog to go down and wrap legs around decoy and then the other dogs pile on. Lifting decoy higher might reduce risks. • FOL has been considered but needs more information, with participants divided as to its advantages. • GBGC will have catching pen footage and any other pressure points where footage is useful. <p>ACTION: BS will consider what can be done in terms of vision in catching pen at the other tracks based on priority, starting with Rockhampton. Report back to next meeting and/or RACC</p>		
----	---	--	--

	<p>Other Business</p> <p>ADDITIONAL RACES AT IPSWICH</p> <p>BS – RQ are in the position of reviewing 4 meetings per week at Ipswich. Data assessment does not indicate this would be a problem.</p> <p>The 4th meeting covers the lower-class dogs, currently with over 150 nominations each week,</p> <p>The 4th meeting provides \$1.6m in prizemoney.</p> <p>RQ is aware there are concerns around the 4th meeting at Ipswich. Preliminary discussions were before the Chief Steward. BS needs to progress the decision so would like to discuss this. Recommendation is in favour of 4th meeting.</p> <p>AB asked whether consideration has been given to mandatory trialling of novice dogs and dogs racing on unfamiliar tracks prior to racing there.</p> <p>BS – all dogs trialling at new track was raised by GRIWG before and there needs to be data to support that this would improve the injuries. Not an easy implementation, but RQ is open to the suggestion, but will need to work with QRIC on the problem identification and discussion.</p> <p>ACTION: defer discussion. ML to organise a meeting for discussion.</p>		
7.	<p>Meeting closed: 12:21pm</p> <p>2023 meetings: 24 May 2023 30 August 2023 22 November 2023</p>		

Table 1. Serious injuries (>28-day stand-down and fractures)

Date	Track	Name	Age(m)	Starts	Injury Sign	Starts / # days			Form	Stewards' Comments	Outcome
						7	28	90			
21/10/2022	Rockhampton	s.73 Irrelevant in	38	82	Right - Hindleg - Tarsal Fracture/Dislocation (Hock)	1	2	6	83(5/14/16)	Shortened stride in the back straight and was visibly injured and failed to finish the race.	Euthanased off track
15/10/2022	Ipswich		35	36	Near side scapula fracture - 60 days + injury trial	1	2	10	46(4/8/10/23)	Severely checked and pulled up entering the back straight. A post-race veterinary examination revealed an injury to the scapula.	Treated
17/10/2022	Albion Park		38	71	Right - Hindleg - Tarsal Fracture/Dislocation (Hock)	1	5	10	72(9/9/9)	Entering the first turn improved onto heels and then checked around heels. Entering the turn out of the home straight lost ground appearing injured.	Euthanased off track
24/10/2022	Albion Park		42	71	Right - Hindleg - Tarsal Fracture/Dislocation (Hock)	2	6	10	72(22/9/14)	Entering the first turn bumped with another runner then checked and then shortly after lost ground appearing injured.	RMIS
26/10/2022	Albion Park		39	61	Right - Hindleg - Tarsal Fracture/Dislocation (Hock)	2	6	15	60(5/6/11/38)	checked rounding the home turn, injury noted following day	RMIS - Deceased - during surgery
30/10/2022	Albion Park		42	30	Left - Hindleg - Tarsal Fracture/Dislocation (Hock)	1	3	6	31(5/4/9)	Checked in the back straight then gave ground and took no further part in the event.	RMIS
1/11/2022	Townsville		48	107	Right - Hindleg - Tarsal Fracture/Dislocation (Hock)	1	3	7	107(36/19/18/33)	Underwent a post-race veterinary examination and was found to have soreness to the right hind hock.	Treated?
3/11/2022	Ipswich		30	32	Right - Hindleg - Tarsal Fracture/Dislocation (Hock)	2	4	10	33(15/8/4/6)	altered in its stride entering the back straight and took no further competitive part in the event.	RMIS
4/11/2022	Townsville		26	22	Offside hock fracture	2	5	5	22(0/5/15)	altered in its stride leaving the first turn and took no further competitive part in the event.	RMIS
8/11/2022	Ipswich		41	73	Offside hock injury - 90 days	1	5	12	74(16/14/7)	Checked leaving the top turn. Commenced to give ground approaching the turn into the home straight.	RMIS

11/11/2022	Albion Park	s.73 Irrelevant i	30	24	Right - Hindleg - Tarsal Fracture/Dislocation (Hock)	1	5	10	25(10/2/2/10)	Entering the first turn lost ground appearing injured. A post-race veterinarian examination revealed an offside leg injury.	RMIS
12/11/2022	Ipswich		28	25	Left - Hindleg - Metatarsal Fracture	1	4	8	26(9/3/4/8)	Checked entering the first turn. Checked approaching the top turn. Underwent a post-race veterinary examination and was found to have sustained an injury to the near side metatarsal. Subsequently, the greyhound was stood down for 90 days and will be required to complete an injury trial prior to returning to racing.	Euthanased off Track
15/11/2022	Ipswich		28	24	Right - Foreleg - Humerus Fracture	1	2	7	25(7/1/3/13)	Checked shortly after the start. Checked in the 1st turn. Checked and dragged down by another runner rounding the turn into the front straight. Underwent a post-race veterinary examination and was found to have injuries to both fore legs and after consultation with the on-track veterinarian the greyhound was humanely euthanized.	Euthanased at Track
15/11/2022	Ipswich		23	16	Left - Foreleg - Fracture/Dislocation (Wrist)	2	5	11	15(2/4/2/5)	Checked and dragged down by another runner approaching the 1st turn	Euthanased off Track
15/11/2022	Rockhampton		26	21	Right - Hindleg - Tarsal Fracture/Dislocation (Hock)	2	3	9	22(5/7/2/7)	entering the back straight was checked heavily from behind resulting in having a heavy fall and taking no further part in the race. A post-race veterinary examination revealed a suspected broken hock on the right hind.	Euthanased off Track
18/11/2022	Rockhampton		34	48	Right - Hindleg - Tarsal Fracture/Dislocation (Hock)	2	4	7	49(7/6/6/30)	Suffered a heavy fall in the catching pen after the race. Was given immediate pain relief prior to initial examination, the post veterinary examination revealed a right hind calcaneal tuberosity fracture (Hock	Euthanased at Track

20/11/2022	Albion Park	s.73 Irrelevant	34	12	Left - hind leg - Cruciate ligament rupture and subluxation of the stifle	1	2	6	11(2/1/0/8)	fracture) classed as a catastrophic injury and was humanely euthanised. Checked shortly after the start. Improved upon the heels of another runner and commenced to give ground, rounding the turn out of the back straight	Euthanased off Track
25/11/2022	Ipswich		44	26	Right - Foreleg - Carpal Fracture/Dislocation (Wrist)	2	4	9	27(6/1/2/17)	Improved onto heels, severely checked, and fell entering the first turn. Took no further competitive part in the event. A post-race veterinary examination revealed the greyhound to have sustained a catastrophic injury to the offside foreleg. Subsequently, s.73 Irrelevant it was humanely euthanised.	Euthanased at Track
30/11/2022	Rockhampton		38	23	Right - Hindleg - Tibia Fracture	1	2	2	24(3/5/7/9)	bumped going around first turn, shifted in and bumped another runner coming around the home turn, In the catching pen when pulling up collided heavily with other runners. A post-race veterinary examination revealed a catastrophic injury to the right hind leg and as a result was euthanised on humane grounds	Euthanased at Track
30/11/2022	Rockhampton		32	32	Right - Hindleg - Tarsal Fracture/Dislocation (Hock)	1	2	9	33(6/6/4/15)	bumped heavily with another runner going around the first turn and pulled up and took no further part in the race. A post-race veterinary examination revealed a suspected broken right hind hock.	Euthanased off track
1/12/2022	Albion Park		54	70	Right - Hindleg - Tarsal Fracture/Dislocation (Hock)	1	4	8	71(18/15/17)	Checked through the catching pen. Faulted in its action entering the back straight and took no further competitive part in the event. A post-race veterinary examination revealed an offside hock injury.	Euthanased off Track

3/12/2022	Ipswich	s.73 Irrelevant	19	8	Left - Foreleg - Carpal Fracture/Dislocation (Wrist)	1	3	6	7(1/1/1/4)	making up the field for the field trial sustained a catastrophic near side radius and ulna compound fracture and was subsequently euthanised. some interference from another runner entering the back turn and then contacted the running rail and then shortly after pulled up near the 600M boxes	Euthanased at Track
11/12/2022	Albion Park		50	97	Right - Foreleg - Carpal Fracture/Dislocation (Wrist)	1	1	2	99(10/14/9/6 5)	Entering the back turn bumped with another runner and then severely checked and then lost ground appearing injured. A post-race veterinarian examination revealed an offside wrist injury	Treated?
13/12/2022	Ipswich		32	44	Right - Achilles tendon	1	5	10	43(1/2/6/34)	Checked and shortened stride entering the first turn and lost considerable ground. A veterinary examination revealed offside Achilles tendon injury	Euthanased off Track
16/12/2022	Townsville		33	84	Right - Hindleg - Tarsal Fracture/Dislocation (Hock)	1	8	14	83(10/10/2/6 0)	Tightened for racing room approaching the first turn and was checked losing ground. Shortened stride approaching the finishing line when appeared to have sustained an injury. Underwent a post-race veterinary examination that revealed an injury to the offside hock.	Euthanased off Track
23/12/2022	Ipswich		32	32	Right - Hindleg - Tarsal Fracture/Dislocation (Hock)	2	6	11	31(1/3/3/24)	Bumped soon after the start, checked approaching the home turn, faulted in its action entering the home straight and took no further competitive part in the event.	Euthanased off Track
30/12/2022	Ipswich		40	48	Right - hock injury	2	2	11	47(6/2/5/33)	Slow to begin. Checked at the first turn and lost ground. Lost ground in the back straight and appeared to sustain and injury.	Euthanased off Track

Incident Profile – s.73 Irrelevant information

Treated

Overview:

Injury	Right - Hindleg - Tarsal Fracture/Dislocation (Hock)
Treatment	Methadone 10mg, acepromazine 1mg, meloxicam 5 mg
Run Stage	Turn off back straight (1st time)
Penalty	Stand down 90 days
Outcome	Surgery
Rationale for euthanasia	
Euthanasia Certificate	
Sex	Bitch
Greyhound ID	528676
Whelp date	8/01/2019
Trainer	s.73 Irrelevant information
Owner	
OzChase Status	Named
Date of incident	3/04/2022
Club	Ipswich
Track conditions	Good/Fine
Track readings	
Race vision	s.73 Irrelevant information
Race number	
Box number	
Race distance	288m
Race grade	5
Number of starts	39
Mean # days between starts (6 months)	
Extended spells (12 months)	
Autopsy	No
Swabs taken	No
Radiographs and post-race veterinary reports	No

Stewards report:

8 s.73 Irrelevant information – Filtered in action rounding the home turn when appeared to have sustained an injury, taking no further competitive part in the race. Underwent a post-race veterinary examination that revealed a fracture to the offside hock and was stood down from racing for 90 days. The greyhound must complete a satisfactory trial prior to racing next. s.73 Irrelevant information was administered pain relief and bandaged by the on-course veterinarian. Stewards were advised by trainer s.73 Irrelevant information at the greyhound will be taken to Brisbane Pet Surgery tomorrow under the care of s.73 Irrelevant information for further assessment. This matter will be referred to the Greyhound Racing Injury Review Panel.

Queensland Racing Integrity Commission Greyhound Race Injury Working Group Injuries Occurring in April 2022

Stewards Update:

The greyhound s.73 Irrelevant inform underwent assessment and X-rays on Monday 4th March 2022 at Brisbane Pet Surgery. The X-rays confirmed a fracture to the offside hock. The greyhound underwent surgery on Wednesday the 6th of March and has been recovering at s.73 Irrelevant info kennels. The greyhound is expected to recover from surgery but won't race again and will be retired.

Race day stewards report:

s.73 Irrelevant information – Checked approaching the 1st turn. Shifted out, checked another runner on numerous occasions and fell leaving the 1st turn. Underwent a post-race veterinary examination and was found to have a offside hock fracture and stood down for 90 days, greyhound was treated by on course veterinarian and will be taken to Greenbank vet clinic for further assessment. requiring 1 injury trial to return to racing. This matter will be referred to the Queensland Greyhound injury review panel.

s.73 Irrelevant information sustained an offside hock fracture in race 7 at Ipswich on the 7/4/22, its being taken to Greenbank vet clinic

Steward update: s.73 Irrelevant information went to Greenbank vets, after x-rays where taken, it was found to have multiple fractured bones and the decision was to humanely euthanise the greyhound.

Race day stewards report:

s.73 Irrelevant information Appeared to sustain an injury when racing in the back straight. Underwent a post-race veterinary examination which revealed a serious injury to the greyhound's offside hock and was stood down for 90 days. The greyhound was placed in a Robert Jones Bandage and administered pain relief on course. The greyhound was transported to North Lakes Veterinary Surgery for x rays and further diagnostic testing. This matter will be referred to the greyhound injury review panel.

Stewards update:

s.73 Irrelevant information sustained a suspected fracture to the offside hock when racing in the clear at Ipswich on the 11th of April. The greyhound had successful surgery at North Lakes and is now recovering at the property of s.73 Irrelevant information

Race day stewards report:

s.73 Irrelevant information Checked rounding the first turn. A post-race veterinary examination revealed the greyhound to have sustained an injury to its offside hock and was stood down from racing for ninety (90) days. The greyhound must complete a satisfactory trial prior to racing next. Trainer s.73 Irrelevant information advised Stewards that he will take the greyhound to the North Lakes Veterinary Hospital for further assessment and treatment. This matter will be referred to the Greyhound Racing Injury Review Panel.

Stewards update:

Trainer s.73 Irrelevant information advised the greyhound underwent surgery on 19 April 2022 and would remain at the North Lakes Veterinary Hospital for a further few days whilst in recovery.

s.73 Irrelevant information advised the surgery was successful although noting it was one of the worst injuries he had operated on.

Incident Profile – s.73 Irrelevant information

Treated off Track

Injury	Right - Foreleg - Radius/Ulna Fracture
Treatment	Metacam s/c, methadone / acp 1m E.J Bandage
Run Stage	Turn into the back straight
Penalty	60D
Outcome	Referred off-track
Rationale for euthanasia	
Euthanasia Certificate	
Sex	Dog
Greyhound ID	507919
Whelp date	26/03/2018
Trainer	s.73 Irrelevant information
Owner	
OzChase Status	Named
Date of incident	28/04/2022
Club	Ipswich
Track conditions	Good
Track readings	
Race vision	s.73 Irrelevant information
Race number	
Box number	
Race distance	520M
Race grade	Best 8
Number of starts	119
Mean # days between starts (6 months)	6.75 (36 starts between 28/04/22 and 28/08/21)
Extended spells (12 months)	N/A
Autopsy	N/A
Swabs taken	Unknown
Radiographs and post-race veterinary reports	

Race day stewards report:

Race 4 - DOVER & SONS BEST 8 520m

s.73 Irrelevant information Checked through the turn into the back straight. Took no further part in the race. A post-race veterinary examination revealed the greyhound to have sustained an injury to its off fore limb and was stood down from racing for sixty (60) days. The greyhound must complete a satisfactory trial prior to racing next. Trainer s.73 Irrelevant information advised Stewards that he will take the greyhound to the Brisbane Pet Surgery for further assessment and treatment. This matter will be referred to the Greyhound Racing Injury Review Panel.

Stewards update:

The dog had surgery yesterday with 2 plates inserted to join both bones that were broken. He is at home & is recovering well at this stage. He is expected to make a full recovery. I'm still waiting on X-rays & once received will forward them on.

Swabs taken	Unknown
Radiographs and post-race veterinary reports	

Race day stewards report:

Race 8 - BODHI INK TATTOO GALLERLY MIXED 4/5 520m

s.73 Irrelevant – Sustained an injury and fell in the first turn. Took no further part in the event. A post-race veterinary examination revealed the greyhound to have sustained an injury to its offside hock and was stood down from racing for sixty (60) days. The greyhound must complete a satisfactory trial prior to racing next. Trainer s.73 Irrelevant advised Stewards that he will take the greyhound to the Greenbank Veterinary Hospital for further assessment and treatment. This matter will be referred to the Greyhound Racing Injury Review Panel.

Stewards update:

R106 comment - Right hock fracture. Fracture is calsis with distraction, slab fracture central tarsal bone, fracture 4th tarsal bone. Severe bruising suggesting of fibrinolytic syndrome. Euthanased by s.73 Irrelevant, Greenbank Veterinary Hospital.

s.73 Irrelevant was euthanised, s.73 Irrelevant has sent clinical notes to L&R with other notifications.

Appendices

Penetrometer, Clegg hammer and moisture meter references

COMPACTION & HARDNESS MEASURING TOOLS

The use of a **hand penetrometer** (SAND TRACKS) - a single continuous compression to the desired depth to measure the resistance to vertical penetration to obtain the compressive strength of the *cohesive track profile*, not the actual racing surface. This will provide a pressure reading, relative to the pressure / force required to penetrate the required depth.

The use of a cone penetrometer (GRASS TRACKS) is a 3-drop method to measure the resistance to vertical penetration to obtain the compressive strength of the cohesive track profile, not the actual racing surface. This will provide a pressure reading, relative to the pressure / force required to penetrate the required depth.

The **Clegg hammer** measures the compaction of the soil (1 DROP FOR SAND, 3 DROPS FOR GRASS). The measurement reflects the hardness of the surface and subgrades.

Moisture meters measure the water content in the subbase (below the track surface). An even, consistent reading is desirable around the entire track.

The **profiler tool** is inserted into the surface in a vertical upright position and to a minimum depth of 75mm. This takes a full depth cross-section of the sand track profile and allows the curator to look for any visible fractures or layer issues within the profile. Any fractures in the profile needs to be rectified and/or monitored.

Reference to Ipswich and Albion Park Sand Tracks ONLY

Penetrometer: measures the resistance to vertical penetration to find compressive strength in the cohesive track profile

0 to 0.5	Very soft
0.5 to 1	Soft
1 to 2.2	Good
>2.2	Firm to Hard

Clegg Hammer: compaction of track

<=3.0	Unacceptably low
3.1 – 5.9	Soft
6.0 – 9.9	Good
10.0 – 11.9	Firm
>=12.0	Unacceptably high

Moisture Meter: to a depth of 50mm

10 to 15%	Dry
16 to 23%	Good
>24 %	Saturated

**Queensland Racing Integrity Commission Greyhound Race Injury Working Group
Injuries Occurring in April 2022**

References to Townsville and Rockhampton Sand Tracks ONLY

Penetrometer: resistance to vertical penetration to determine compressive strength in the cohesive track profile

0 to 0.5	Very soft
0.5 to 1	Soft
1 to 2.2	Good
>2.2	Firm to Hard

Clegg Hammer: compaction of track

<=3.0	Unacceptably low
3.1 – 5.9	Soft
6.0 – 9.9	Good
10.0 – 11.9	Firm
>=12.0	Unacceptably high

Moisture Meter: inserted into the racing surface with minimum pressure to a depth of 50mm

3 to 7 %	Dry
8 to 13 %	Good
>14 %	Saturated

Reference to Capalaba and Bundaberg Grass Tracks ONLY

Penetrometer: vertical penetration to determine compressive strength in the cohesive track profile - 3-drop cone test

0 to 5	Firm to Hard
6 to 10	Good
11 to 13	Soft
>14	Very soft

Clegg Hammer: compaction of track - 3-drop cone test

<=3.0	Unacceptably low
3.1 – 5.9	Soft
6.0 – 9.9	Good
10.0 – 11.9	Firm
>=12.0	Unacceptably high

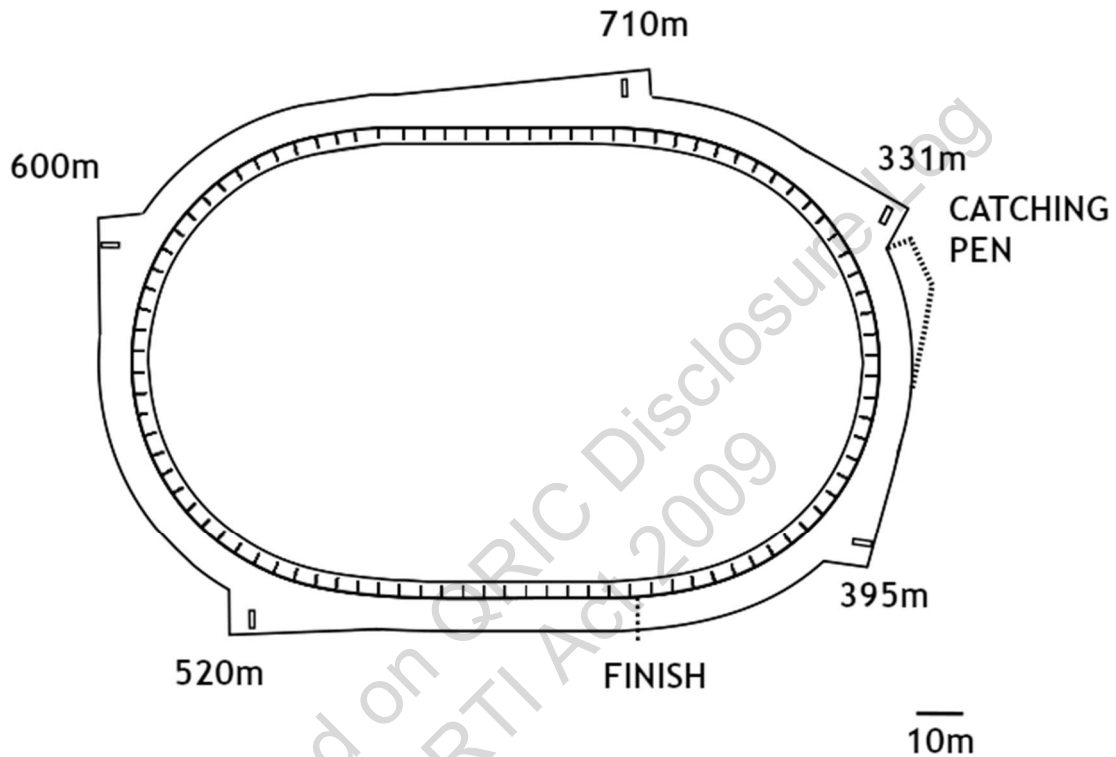

Moisture Meter: inserted into the racing surface with minimum pressure to a depth of 100mm

Race day stewards report:

s.73 Irrelevant – *Faltered in its action rounding the turn into the back straight and took no further competitive part in the event. A post-race veterinary examination revealed the greyhound to have sustained an injury to its off side hock and was stood from racing for ninety (90) days. The greyhound must complete a satisfactory trial prior to racing next. Trainer s.73 Irrelevant advised Stewards that he will take the greyhound to the Greenbank Veterinary Hospital for further assessment and treatment. This matter will be referred to the Greyhound Racing Injury Review Panel.*

Queensland Racing Integrity Commission Greyhound Race Injury Working Group Injuries Occurring in February 2022

s.73 Irrelevant sustained a fracture to its off side hock and was stood down for ninety (90) days.

The greyhound was administered Methadone, Aceprom, and a modified Robert Jones bandage was applied. Trainer

s.73 Irrelevant advised he would take the greyhound to the Greenbank Veterinary Hospital for further assessment.

Hock repair. Comminuted calcaneus with central split. MT4 quaternary fracture, central tarsal comminuted with collapse central tarsal, hock deformity.

The greyhound was administered Methadone, ACP, and a modified Robert Jones bandage was applied. The greyhound was euthanased on 7 February 2022. Trainer s.73 Irrelevant provided Clinical Notes of 12 February 2022.

Euthanased at Rosewood vet

HISTORY::

At racetrack, race vet stated concern for Fx leg, given methone and bandaged; in for follow up r/c and rads.
Prior this
EDDU normally, bright and active at home.
Fed generic mix wet.
Flea, worming, vac UTD.
O's have no other health concerns.

EXAMINE:

Very drunk (methone) overtly comfortable though 3-legged mobile in consult.
Mskel: crunching RHL tarsal region opn flex/extension, 3 legged lame; Lean & muscular;
EENT clean & clear - mild drooly from methone;
Integ: Few lesions on LHL, RHL, from tumbling at track; minimal, elsewhere Skin nil visible lesions, coat clean & normal density.
RLN all WNL, abdo palp smooth and comfortable.
HS, LS clear, NAD, NMA, SSFP.
Temp not taken - rads first, P&R high given stress; MM pink, moist, CRT <2.

X-rays show slab Fx proximal anterior tarsal arcade and several smaller suspicious fissures distal fibula.

ASSESSMENT: Concern for healing and comfort long tern, likely OA and poor prognosis for lameness with surgical or conservative Tx given prox joint involvement.

TREATMENT: O' okayed humane QoL euth.

IV lethabarb until nil HR, RR, corneal reflex or femoral pulse.

O' elect routine cremation

Race day stewards report:

s.73 Irrelevant information – Checked shortly after the start. Checked approaching the finishing line. Underwent a post-race veterinary examination and was found to have an offside hock fracture, stood down for 12 weeks and requiring 1 injury trial to return to racing. The greyhound was given pain relief and bandaged on course, to be taken to Greenbank veterinarian for a clinical assessment. This matter will be referred to the greyhound racing injury review panel.

Trainer s.73 Irrelevant information advised surgery was not required following review of the x-rays. The Greenbank vets bandaged the greyhound's leg and will be taken back on Monday for rebandaging.

Retired as pet to owner

Penetrometer, Clegg hammer and moisture meter references

COMPACTION & HARDNESS MEASURING TOOLS

The use of a **hand penetrometer** (SAND TRACKS) - a single continuous compression to the desired depth to measure the resistance to vertical penetration to obtain the compressive strength of the *cohesive track profile*, not the actual racing surface. This will provide a pressure reading, relative to the pressure / force required to penetrate the required depth.

The use of a cone penetrometer (GRASS TRACKS) is a 3-drop method to measure the resistance to vertical penetration to obtain the compressive strength of the cohesive track profile, not the actual racing surface. This will provide a pressure reading, relative to the pressure / force required to penetrate the required depth.

The **Clegg hammer** measures the compaction of the soil (1 DROP FOR SAND, 3 DROPS FOR GRASS). The measurement reflects the hardness of the surface and subgrades.

Moisture meters measure the water content in the subbase (below the track surface). An even, consistent reading is desirable around the entire track.

The **profiler tool** is inserted into the surface in a vertical upright position and to a minimum depth of 75mm. This takes a full depth cross-section of the sand track profile and allows the curator to look for any visible fractures or layer issues within the profile. Any fractures in the profile needs to be rectified and/or monitored.

Reference to Ipswich and Albion Park Sand Tracks ONLY

Penetrometer: measures the resistance to vertical penetration to find compressive strength in the cohesive track profile

0 to 0.5	Very soft
0.5 to 1	Soft
1 to 2.2	Good
>2.2	Firm to Hard

Clegg Hammer: compaction of track

<=3.0	Unacceptably low
3.1 – 5.9	Soft
6.0 – 9.9	Good
10.0 – 11.9	Firm
>=12.0	Unacceptably high

Moisture Meter: to a depth of 50mm

10 to 15%	Dry
16 to 23%	Good
>24 %	Saturated

Radiographs and post-race veterinary reports	Yes

Race day Steward report:

s.73 Irrelevant information – Commenced to weaken rounding the first turn when appeared to have sustained an injury, failing to complete the race. A post-race veterinary examination revealed the greyhound to have sustained an offside hock injury and was stood down from racing for 12 weeks. The greyhound must complete a satisfactory trial prior to racing next. Trainer s.73 Irrelevant information advised Stewards that he will take the greyhound to the North Lakes Veterinary Hospital for further assessment and treatment under s.73 Irrelevant information This matter will be referred to the Greyhound Racing Injury Review Panel.

Update:

s.73 Irrelevant information trained by s.73 Irrelevant information had surgery yesterday and is recovering well he will also get the vets to send thru x-rays next week when he goes back for a follow up appointment.

Race day Steward report:

s.73 Irrelevant inf – Along the back straight lost ground appearing injured. A post-race veterinarian examination revealed and injury to the offside hock and was stood down from racing for 90 days and will need to complete a solo veterinarian trial prior to nomination. This injury will be referred to the Queensland injury review panel.

Follow up

(Michael Fernholz)

In R9 at Albion Park today the following greyhound suffered an offside hock fracture. The greyhound was given pain relief and stabilised by the on-course vet and will be transported tonight to Stafford veterinarian clinic for further assessment. We will follow up with trainee s.73 Irrelevant tomorrow.

Race day Steward report:

s.73 Irrelevant information was heavily checked going around the first turn pulled up in the back straight and took no further part in the race. Was sent for a post-race veterinary examination and was found to be suffering from a suspected broken hock on the right hind. Was given immediate pain relief and the leg was splinted and strapped for support. Was stood down from racing for 42 days and must pass a veterinary clearance trial before racing again. This incident will be referred to the serious injury committee.

Trainer s.73 Irrelevant information advised he was taking s.73 Irrelevant information to his veterinary surgeon for further treatment. Trainer s.73 Irrelevant information was advised stewards would follow up with him the following day.

Race day Steward report:

s.73 Irrelevant information – Approaching the 1st turn was checked, into the 1st turn was checked appearing injured as a result. A post-race veterinary examination revealed the greyhound to have injured its offside foreleg and was stood down from racing for 12 weeks. The greyhound was transported to the North Lakes veterinary clinic for further assessment. This matter will be referred to the greyhound racing injury review panel.

Chair comment – the greyhound lost ground significantly early in the race before running on for a distance and falling heavily. It would be good to understand if there was an injury e.g., to the right hock when the greyhound was checked and pushed outward, causing it to lose ground initially.

Update:

BGRC handling – tendon injury treatment at QVS North Lakes

**Queensland Racing Integrity Commission Greyhound Race Injury Working Group
Injuries Occurring in January 2022**

Biceps avulsion

Patient clipped and aseptically prepared. Patient placed in right lateral recumbency. Medial approach to right proximal limb. Incised skin with #15 blade and haemostasis achieved with electrocautery. Dissection of soft tissue with metzenbaum's revealed avulsed biceps tendon at the musculotendinous junction. Tendon end minimally debrided. Locking loop pulley and Krackaw suture pattern of O PDS utilised to apposed tendon ends. Once placed the limb was manipulated and normal ROM achieved with adequate tension of the biceps. Suture ligation. 3/0 PDS fascia, SQ and skin 3/0 Dermabond cruciates. Patient recovered well post operatively.

Central tarsal fracture repair

Patient in dorsal recumbency for dorsomedial approach to the right central tarsal bone. Soft tissue dissection performed using scalpel blade and metzenbaum scissors, dorsal and medial CTB fragments exposed. Fragments reduced successfully using point to point forceps. A 2.7mm locking positional screw is placed in the medial CTB fragment in the mediolateral direction. A 2.7mm locking positional screw was placed in the dorsal CTB fragment in the dorsoplantar direction. Saline lavage performed. Routine closure: fascia 4/0 PDS simple continuous, SC 4/0 PDS simple continuous, skin 3/0 dermalon cruciate.

Race day Steward report:

s.73 Irrelevant information – Checked off heels rounding the first turn. Lost ground in the back straight and took no further competitive part in the event. A post-race veterinary examination revealed the greyhound to have sustained an injury to its near side hock and was stood down for ninety (90) days. The greyhound must complete a satisfactory trial prior to racing next. Trainer Roan Enright advised Stewards that he will take the greyhound to the Greenbank Veterinary Hospital for further assessment and treatment. This matter will be referred to the Greyhound Racing Injury Review Panel.

Update:

(17.01.22 - Sherry Barr) - Stewards' update - s.73 Irrelevant information the trainer of s.73 Irrelevant information who was injured last night. The vets have sent him a txt message stating the greyhound has a slab fracture of the central tarsal bone and will require surgery. He has been instructed by the Vet Gerry King to leave the greyhound at the clinic until Monday when they can operate on it.
He will send thru the x-rays when he receives them after the surgery. Treated at Greenbank, hock fracture – RMIS to reimburse – awaiting clinical notes.

Race day Steward report:

s.73 Irrelevant information – Through the back turn while racing in the clear sustained an injury then fell and took no further competitive part in the event. A post-race veterinarian examination revealed an offside hock fracture and was stood down from racing for 12 weeks. The greyhound was administered pain relief on course and transported to North Lakes veterinarian clinic for clinical assessment. This matter will be referred to the greyhound racing injury review panel.

Update:

(31.1.2022 – Michael Fernholz) - I have followed up with trainer s.73 Irrelevant information regarding the above greyhound. The dog has had surgery and is recovering well. I have instructed s.73 Irrelevant information to bring in the X-rays and notes from the vet when he is next at a track so the stewards can take copies.

Race day Steward report:

s.73 Irrelevant information When racing in the clear appeared to sustain a serious injury and took no further part in the event. Underwent a post-race veterinary examination which revealed an injury to the offside hock and was stood down for 12 weeks. The greyhound was administered with pain relief on course and transported to Greenbank veterinary Hospital. for further diagnostic tests. This matter will be forwarded to the greyhound injury review panel.

Update:

Greyhound has had surgery at Brisbane Pet Surgery and will be retired to Greys4Pets who have a previous working relationship with the owner.

Reason									
Deceased	Euth. - Injury	28/01/2022 00:00		Raced last night track vet suspected fractured tarsus. Marked swelling right tarsus. Very painful Rads show several tarsal fractures and luxation of the tarsal joint. Repair would require arthrodesis poor prognosis for active bouncy dog likely to fain. No prospect for return to race.	Laidley Vet Surgery	Anna Martin	abarnett	31/01/2022 10:06	QLD / AUS

Race day Steward report:

s.73 Irrelevant information *Began to give ground rounding the home turn before faltering and losing its action. A post-race veterinary examination revealed the greyhound to have sustained an injury to its offside hock and was stood down for ninety (90) days. The greyhound must complete a satisfactory trial prior to racing next. Trainer Jamie Hosking advised Stewards that he will take the greyhound to the Laidley Veterinary Surgery for further assessment and treatment. This matter will be referred to the Greyhound Racing Injury Review Panel.*

SECTION B - CERTIFICATE OF EUTHANASIA
GREYHOUND

SECTION B: is intended to be completed independently by a Veterinarian and forwarded directly to QRIC

DETAILS OF GREYHOUND

Greyhound's Name	s.73 Irrelevant information	Earbrand	unreadable
Microchip No.		Colour	BLACK
Owner / Trainer		Gender	F ☐ M ☒

REASON FOR EXAMINATION:

Raced last night, track vet suspected fractured tarsus.
RT placed, presented for x-rays today

CLINICAL FINDINGS:

marked swelling & laxity right tarsus. NWB, very painful.
Rads show several tarsal fractures, & luxation of the
tarsal joint.

REASON FOR EUTHANASIA:

Repair would require arthrodesis, poor Px for active bouncy
dog → likely to fail. No prospect for return to race

COMMENTS: (Please attach extra documentation if required)

Injuries Occurring in January 2022**

Incident Profile – s.73 Irrelevant information

Injury	Right - Hindleg - Tarsal Fracture/Dislocation (Hock)
Penalty	12 weeks plus satisfactory trail
Treatment	Methadone, ACP, Meloxicam and a Robert Jones bandage applied.
Outcome	
Rationale for euthanasia	Not applicable
Euthanasia Certificate	Not applicable
Sex	Dog
Greyhound ID	527429
Whelp date	24/11/2018
Weight	30.4kgs
Trainer	s.73 Irrelevant information
Owner	
OzChase Status	Active
Date of incident	28/01/2022
Club	Ipswich
Track conditions	Track: Good / Weather: Fine
Track readings	Clegg – Good; Peno – Good; Moisture - Good
Race vision	s.73 Irrelevant information
Race number	
Box number	
Race distance	288m
Race grade	Grade 5
Number of starts	76
Mean # days between starts (6 months)	
Extended spells (12 months)	None
Autopsy	Not applicable
Swabs taken	No – refer to stewards' race day summary
Radiographs and post-race veterinary reports	Yes/No (if no reason)

Race day Steward report:

s.73 Irrelevant info – *Faulted in its action rounding the home turn and took no further competitive part in the event. A post-race veterinary examination revealed the greyhound to have a serious injury to the offside hock, the greyhound has been treated and is to be taken to North Lakes Veterinary Clinic for further assessment, the incident will be referred to the injury review panel. Ruby's Son has been stood down for 12 weeks and must complete a satisfactory Steward's trial prior to racing next.*

Update:

Greyhound is being treated at QVS and going as expected – no clinical notes as yet, awaiting RMIS application.
