CONTAMINATED SITES

- A rural residential subdivision is proposed and an EMR search reveals an old gold-mining operation and two former dip sites on the property. Investigation establishes that the site would pose a health risk for human habitation and a full clean-up is undertaken for one dip. The remaining dip and gold mining areas are partially cleaned up for parkland and open space uses (subject to the conditions of a Site Management Plan) and subdivided from residential areas.

Should I carry out any checks on old or currently used dips myself?

As part of general environmental management of your property, and possibly within any annual quality program, it would be wise to check the dip site periodically. You could then be sure it is not generally accessible to children or animals and that contamination — from splashing, sludges and dry-out areas — is not spreading from the area and causing environmental harm. It may be advisable in some situations to securely fence the dip site.

What am I required to do should I sell my property?

As a property owner you must inform the purchaser, in writing, that the site is listed on the EMR. Should this not be done, the purchaser is able to rescind the sale agreement before its completion or before taking possession of the property.

How can I obtain more information?

DEH has a series of information sheets on managing contaminated land (including a full list of notifiable activities). These are available from DEH Regional offices and the Naturally Queensland Information Centre.

From: Angwin, Colin [Colin.Angwin@dpi.qld.gov.au]
Sent: Tuesday, 26 June 2007 1:44 PM
To: Annemarie Lewis
Cc: West, David
Subject: Surrender of Certificate SR1291 - Notification of Contaminated Land
Attachments: EDRMS-#64246-v4-SR1291_-_List_of_decommissioned_herbicide_pits_2006.DOC

Hello Annemarie

In reference to Greg Tkai's email below attached is an updated list of decommissioned 'herbicide pits'. The list has been updated to include comments from the local FPQ centres in regard to the pit contents. The information on pit contents is necessarily general as the Licence conditions did not require details of quantities & type of herbicides to be recorded.

I also add the following comments:

- Herbicide waste was confined to degradable agricultural herbicides including (triple rinsed) containers.
- Quantities of waste were relatively small and were in a neutralised (by lime) or diluted (by water) form.
- The waste was not a regular process by product and was only incidental to normal operations, eg accidental spillage, periodic sludge build up in tanks or the result of hygienic practices eg wash down.
- Pits were located in isolated State Forest areas, subject to specific guidelines, in areas of suitable topography and soil type and in particular well away from public access roads, watercourses, houses, crops, apiary sites and the like.
- Pits were utilised until other disposal methods were established and/or readily available, eg re-use, re-cycling, Council waste disposal sites or collection by waste contractors.

I trust this is sufficient to enable the surrender process to be completed - please contact me if you require further clarification.

Subject: Notification of Land

Good afternoon Collin,

This is to confirm our telephone conversation of 8 February 2007.

Could you please add an extra column to the table attached to your notification clarifying the real property description (lot on plan description) that the GPS coordinate relate (your ref: FH-EM/LEGIS/ACTS/ENVIRON.00001.A). Also, are these GPS coordinates Lats and Longs or AMG corodinales?.

For your information the EMR/CLR notification is tied to a real property description. The GPS coordinates will certainly assist in accurately describing the exact location of the sites on each real property description.

If you require any further clarification with regard to this matter, please do not hesitate to contact me direct.

Regards

Note:

1. **Shading** denotes pit is located on **State Forest**.
2. No shading denotes pit is located on **State Plantation Forest**.
3. **Ingham FMA**: Pits were used to dispose of rinsed containers and their rinsates. Typically the pits would contain triple rinsed containers and diluted rinsates of primarily *Glyphosate*, *2-4D* and *Simazine*. Danbulla pit it would also have included small amounts of *Atrazine*.
4. **Capricorn FMA**: It is estimated that approximately 6000 litres/annum of diluted herbicide wastewater was deposited in the Byfield pit during its 13 year lifespan (1992 – 2005). Total estimated quantity = $6000 \times 13 = 78,000$ litres. The diluted wastewater would have typically contained herbicide residues of: *Pulse*, *Starane*, *Dye Big Foot*, *Bond*, *AMS Garlon 600*, *Simazine*, *Grazon DS*, *Cut Out*, *Chemwet 1000*, *Verdict*, *Roundup*, *Taskforce Residual*, *Hot up* & *Tordon*.

To: Annemarie Lewis
Cc: West, David
Subject: Surrender of Certificate SR1291 - Notification of Contaminated Land

Hello Annemarie
 In reference to Greg Tkai's email below attached is an updated list of decommissioned 'herbicide pits'.
 The list has been updated to include comments from the local FPQ centres in regard to the pit contents.
 The information on pit contents is necessarily general as the Licence conditions did not require details of quantities & type of herbicides to be recorded.

I also add the following comments:

- Herbicide waste was confined to degradable agricultural herbicides including (triple rinsed) containers.
- Quantities of waste were relatively small and were in a neutralised (by lime) or diluted (by water) form.
- The waste was not a regular process by product and was only incidental to normal operations, eg accidental spillage, periodic sludge build up in tanks or the result of hygienic practices eg wash down.
- Pits were located in isolated State Forest areas, subject to specific guidelines, in areas of suitable topography and soil type and in particular well away from public access roads, watercourses, houses, crops, apiary sites and the like.
- Pits were utilised until other disposal methods were established and/or readily available, eg re-use, re-cycling, Council waste disposal sites or collection by waste contractors.

I trust this is sufficient to enable the surrender process to be completed - please contact me if you require further clarification.

Good afternoon Collin,

This is to confirm our telephone conversation of 8 February 2007.

Could you please add an extra column to the table attached to your notification clarifying the real property description (lot on plan description) that the GPS coordinate relate (your ref: FH-EM/LEGIS/ACTS/ENVIRON.00001.A). Also, are these GPS coordinates Lats and Longs or AMG corodinales?.

For your information the EMR/CLR notification is tied to a real property description. The GPS coordinates will certainly assist in accurately describing the exact location of the sites on each real property description.

If you require any further clarification with regard to this matter, please do not hesitate to contact me direct.

Attention Mr Ahsan Khan

Dear Sir

Surrender of Registration Certificate SR1291 – ERA 75(b)(i). Notification of Contaminated Land.

I refer to your notice, 'Decision to refuse surrender of Registration Certificate', dated 5 September 2006.

Please find enclosed:-

- Application form – Notification of Contaminated Land.
- Herbicide pit locations – List.
- Herbicide pit locations – Maps.

In regard to land tenure note that since restructure of DPI Forestry in April 2006 the pits are located on either *State Forest* or *State Plantation Forest* – refer List attached.

If you require further information please contact the undersigned on 3895 3367.

Yours faithfully

environmental licences and permits

Application form

Contaminated Land

Notification of Land

This form should be used by people providing notification to the Environmental Protection Agency, of contaminated land or land use for a notifiable activity in accordance with Schedule 2 of the *Environmental Protection Act 1994*. This form relates specifically to Sections 371 and 372 of the *Environmental Protection Act 1994*.

NOTE: You must complete all questions below and use a separate form for each lot.

1. Person making notification

NAME Colin Angwin	TELEPHONE 3895 3367
COMPANY/ORGANISATION Forestry Plantations Queensland	
POSTAL ADDRESS PO Box 3196 South Brisbane 4101	
EMAIL colin.angwin@fpq.qld.gov.au	FACSIMILE 3895 3382

2. Site details

2.1. Name by which the property is known locally?

Various locations on *State Forest & State Plantation Forest*— refer list attached.

2.2. Please provide details of the Lot on Plan to which the notification applies

Please note that a separate notification form must be used for each Lot on Plan.

FULL STREET ADDRESS OF THE SITE N/A (Pits located by GPS co-ordinates - refer list & maps attached)	
LOT(S)	PLAN(S)
LOCAL GOVERNMENT AUTHORITY	

2.3. Area of land parcel in square metres? Generally up to 10m² per herbicide pit. (Specified pit dimensions: length up to 10m, width up to 1m, depth up to 3m)

Application form – Part B
Notification of Land**2.4. Describe the notifiable activity/ies for which the land is or has been used and the source/s of the suspected contamination. List all notifiable activities that the land has been used for and provide details.**

If you require additional space attach the information on a separate sheet and make reference to that sheet here.

ERA 75(b)(i) - Disposal of regulated waste, viz neutralised or diluted herbicide waste & empty herbicide containers, at various sites on *State Forest* or *State Plantation Forest* as conditioned by Registration Certificate SR1291.

The waste was confined to degradable agricultural herbicides & triple rinsed containers when other methods of disposal were not available. The waste was only incidental to normal operations (eg accidental spillage, tank sludge, rinsate & wash down) & was in a neutralised (by lime) or diluted (by water) form.

Pits were located in isolated forest areas subject to specific guidelines away from public roads, water courses, apiary sites etc.

2.5. Has a map or locality plan been attached to this notification?

The processing of this information is greatly assisted by the inclusion of a map or locality plan that shows the respective Lot.

☐ NO

☒ YES
3. Details of land owner

NAME (State Government land – either <i>State Forest</i> or <i>State Plantation Forest</i>)	TELEPHONE
POSTAL ADDRESS	
EMAIL	FACSIMILE

4. Declaration

Please read the certification below before signing.

- I do solemnly and sincerely declare that the information provided is true and correct to the best of my knowledge and I make this solemn declaration conscientiously believing the same to be true and by virtue of the provisions of the *Oaths Act 1867*.
- I understand that all information supplied on or with this application form may be disclosed publicly in accordance with the *Freedom of Information Act 1992* and the *Evidence Act 1977*.

NOTIFYING PERSON'S SIGNATURE	DATE 29/01/07
------------------------------	---------------

You may apply for exemption from disclosing information contained in a document submitted, or proposed to be submitted with this notification (see Section 564 of the *Environment Protection Act 1994*)

5. Applicant checklist

To: Angwin, Colin
Subject: Notification of Land

Good afternoon Collin,

This is to confirm our telephone conversation of 8 February 2007.

Could you please add an extra column to the table attached to your notification clarifying the real property description (lot on plan description) that the GPS coordinate relate (your ref: FH-EM/LEGIS/ACTS/ENVIRON.00001.A). Also, are these GPS coordinates Lats and Longs or AMG corodinales?.

For your information the EMR/CLR notification is tied to a real property description. The GPS coordinates will certainly assist in accurately describing the exact location of the sites on each real property description.

If you require any further clarification with regard to this matter, please do not hesitate to contact me direct.

Regards

Greg

10 December 2007

To: Annemarie Lewis
From: Paul Butcher
Subject: Notification – Forestry lots – herbicide pits – various locations

Hi Annemarie,

Can you please list the 24 lots attached for NA 37 – Wastage storage, treatment or disposal. Please request from the notifier maps or plans indicating the location of the herbicide pits on each of the Lots listed. This will facilitate assessment if any DA is referred to us because of the EMR listing. I think one file should suffice for all the Lots.

Thanks,

Paul

From: Angwin, Colin
Sent: Tuesday, 26 June 2007 1:42 PM
To: Annemarie Lewis
Cc: West, David
Subject: Surrender of Certificate SR1291 - Notification of Contaminated Land

Hello Annemarie

In reference to Greg Tkai's email below attached is an updated list of decommissioned 'herbicide pits'. The list has been updated to include comments from the local FPQ centres in regard to the pit contents. The information on pit contents is necessarily general as the Licence conditions did not require details of quantities & type of herbicides to be recorded.

I also add the following comments:

5/12/2007

- Herbicide waste was confined to degradable agricultural herbicides including (triple rinsed) containers.
- Quantities of waste were relatively small and were in a neutralised (by lime) or diluted (by water) form.
- The waste was not a regular process by product and was only incidental to normal operations. eg accidental spillage, periodic sludge build up in tanks or the result of hygienic practices eg wash down.
- Pits were located in isolated State Forest areas, subject to specific guidelines, in areas of suitable topography and soil type and in particular well away from public access roads, watercourses, houses, crops, apiary sites and the like.
- Pits were utilised until other disposal methods were established and/or readily available, eg re-use, re-cycling, Council waste disposal sites or collection by waste contractors.

I trust this is sufficient to enable the surrender process to be completed - please contact me if you require further clarification.

Subject: RE: Surrender of Cert SR1291

Hello Debbie,
I referred your query to the Manager of our Mapping & Geographic Information Section.
He advises the Lot on Plan identifiers listed are valid & the lots have not been subdivided.
However he did also say that most comprise multiple blocks, eg separated by dedicated roads. Is that the issue?

I did previously supply maps showing pit locations ... do you have those?

If you need anything further please let me know,

Cc: West, David

Subject: Surrender of Certificate SR1291 - Notification of Contaminated Land

Hello Annemarie

In reference to Greg Tkai's email below attached is an updated list of decommissioned 'herbicide pits'. The list has been updated to include comments from the local FPQ centres in regard to the pit contents. The information on pit contents is necessarily general as the Licence conditions did not require details of quantities & type of herbicides to be recorded.

I also add the following comments:

- Herbicide waste was confined to degradable agricultural herbicides including (triple rinsed) containers.
- Quantities of waste were relatively small and were in a neutralised (by lime) or diluted (by water) form.
- The waste was not a regular process by product and was only incidental to normal operations, eg accidental spillage, periodic sludge build up in tanks or the result of hygienic practices eg wash down.
- Pits were located in isolated State Forest areas, subject to specific guidelines, in areas of suitable topography and soil type and in particular well away from public access roads, watercourses, houses, crops, apiary sites and the like.
- Pits were utilised until other disposal methods were established and/or readily available, eg re-use, re-cycling, Council waste disposal sites or collection by waste contractors.

I trust this is sufficient to enable the surrender process to be completed - please contact me if you require further clarification.

Good afternoon Collin,

This is to confirm our telephone conversation of 8 February 2007.

Could you please add an extra column to the table attached to your notification clarifying the real property description (lot on plan description) that the GPS coordinate relate (your ref: FH-EM/LEGIS/ACTS/ENVIRON.00001.A). Also, are these GPS coordinates Lats and Longs or AMG corodinales?.

For your information the EMR/CLR notification is tied to a real property description. The GPS coordinates will certainly assist in accurately describing the exact location of the sites on each real property description.

If you require any further clarification with regard to this matter, please do not hesitate to contact me direct.

Regards
