OK.

154-604092. 171 Cairns. Further investigation required.
 Site should have been deleted 26/6/98 - insert SQL
 statement into archived site.

①
 3 sites updated

Pos → Pro 26/6/98 at 3pm by TB.
 p/purpose should have been changed
 to 3517. ✓ OK added to ENR 4/7/98.

AN.

③ are probable - should have had claim code.
 Converted to ENR as "PRO N-535"
 To be corrected on ENR.

② 3 POSB sites on as S34 not S35.

Should have been 'PRO'
 To be entered to ENR after commencement of ERA P19B. on 6 July 1998.
 ANM.

∴ Total 7 sites (4 Pro, 3 Pos) not converted.

RTI DL RELEASE - EHP

Subject: conversion**Date:** Mon, 29 Jun 1998 09:55:49 +1000**From:** Ariane.Milinovich@env.qld.gov.au (Ariane Milinovich)**Organization:** Department of Environment**To:** david.hill**CC:** tess.bignell

hi david

apart from the cairns 171 site we already knew about, some other sites didnt transfer to the emr because of data errors:

010-00125 lot 14 mph7940 mt isa
010-000096 lot 16 mph22064 mt isa
010-000095 lot 17 mph22064 mt isa

? → SCREEN DUMP SITES SHOULD BE PP35
PP 3517.

sch4p4(6) Signature

these 3 sites were changed to 'pro' on friday by tess, but the pp code wasnt changed to a valid one, so these sites have not been included in the conversion process!

03/07/98

SIGNING OFF
FROM CSR!

also there were 3 incorrect uxo/chem sites left:

133-000081 lot 41 nr1839
059-000143 lot 304 cwl3609
059-000142 lot 311 cwl3678

Pro
change
to 535

on as ~~post~~ 534 should have gone on as probable.
pro

could you please hold the letters for the first group, and get tess to pull out the paperwork for the last three, so we can decide what to do.
thanks ariane

Hi Kevern,

I am writing in reference to the attached properties as I am going through a process of validating sites on the Environmental Management Register (EMR) & Contaminated Land Register (CLR). In order to clarify this matter and determine the status of these sites, we are seeking information from council with regards to the land use (past/present) and any notifiable activities which may have occurred on the sites.

Thank you for your assistance. If you have any queries, please do not hesitate to call me.

It may contain privileged and confidential information and if you are not an intended recipient, you must not copy, distribute or take any action in reliance on it. If you have received this facsimile in error, please notify the sender.

Dear Mr Faulkner

To further our query regarding our fax sent to you dated 26 May 2000 from Anita Richards, Senior Environment Officer, Contaminated Sites Section, regarding the enclosed sites (see copy letter & map attached.)

As we have not yet received a reply to this query, and to keep our records updated and as accurate as possible I have restated the query below.

Please confirm whether any notifiable activities which may be taking place now or in the past on the base and which lot/plans they are taking place on. (see attached letter & list of Notifiable Activities). Can you also please clarify that the correct lot/plans which the base is situated upon have been provided by the Jondaryan Shire Council, and supply any additional lot/plan numbers if any have been omitted.

If multiple activities or multiple instances of one activity take place on a single lot please supply the EPA with a diagram showing as close as possible to the exact location of each activity.

Thank you for your assistance. If you have any queries regarding this matter, please do not hesitate to contact me on (07) 3227 7370.

Yours sincerely

Annemarie Dalton

Date: 26 May 1999

MESSAGE:

Mr Faulkner,

I have attached a copy of a map showing the sites listed below which have been notified to the Environmental Protection Agency by the Jondaryan Shire Council as the land which the Oakey Army base is situated upon.

Lots 1 & 2 on RP 176748 and Lot 1 on RP 120095 (now Lot 1 on CP 851106)

Lot 2 on RP 176748

Lot 4 on RP 88219

Lot 2 on RP 113524

Lot 2 on RP 88218

We understand there are no UXO issues for which these sites might be listed. However, under the Environmental Protection Act, Notifiable Activities (NA's) which might contaminate the land must be listed on the Contaminated Sites Register. The base will be listed on the EMR as a Defence Establishments or Training Area, however we require further detail as to any other activities which may be taking place on the base and which lot/plans they are taking place on. I have attached 3 pages of the description of NA's as listed in Schedule 3 of the Environmental Protection Act for your information, Please indicate which lot/plan each NA is situated on, if there are any. If multiple activities or multiple instances of one activity take place on a single lot please supply the EPA with a diagram showing as close as possible to the exact location of each activity.

Also can you please clarify that the correct lot/plans which the base is situated upon have been provided by the Jondaryan Shire Council, and supply any additional lot/plan numbers if any have been omitted. As I am going on leave in 2 weeks for an extended period, should you require any help after 11 June 1999, please contact Ms Judy Norton on 3227 6422 in the first instance or Ms Ariane Milinovich on 3225 1974.

Anita Richards
Senior Environmental Officer
Contaminated Sites Section

Release

Judy,

I have done a bit of leg work
to find out who we should
be talking to.

Changes in the Armys
structure means we should
be sending all correspondence
to either:

Mr John Parusal
Aso Property Officer

Ph: 3332 5111
Fax: 3354 2000 or

Mr Fred Faulkner
Accomd Property Off

Ph: 3332 7395 Fax: 11.

They deal with all property
issues South of Rockhampton

SCHEDULE 3

NOTIFIABLE ACTIVITIES

schedule 4, dictionary, definition "notifiable activity"

1. Abrasive blasting—carrying out abrasive blast cleaning (other than cleaning carried out in fully enclosed booths) or disposing of abrasive blasting material.
2. Aerial spraying—operating premises used for—
 - (a) filling and washing out tanks used for aerial spraying; or
 - (b) washing aircraft used for aerial spraying.
3. Asbestos manufacture or disposal—
 - (a) manufacturing asbestos products; or
 - (b) disposing of unbonded asbestos; or
 - (c) disposing of more than 5 t of bonded asbestos.
4. Asphalt or bitumen manufacture—manufacturing asphalt or bitumen, other than at a single-use site used by a mobile asphalt plant.
5. Battery manufacture or recycling—assembling, disassembling, manufacturing or recycling batteries (other than storing batteries for retail sale).
6. Chemical manufacture or formulation—manufacturing, blending, mixing or formulating chemicals if—
 - (a) the chemicals are designated dangerous goods under the dangerous goods code; and
 - (b) the facility used to manufacture, blend, mix or formulate the chemicals has a design production capacity of more than 1 t per week.
7. Chemical storage (other than petroleum products or oil under item 29)—storing more than 10 t of chemicals (other than compressed or liquefied gases) that are dangerous goods under the dangerous

SCHEDULE

goods code.

8. Coal fired power station—operating
9. Coal gas works—operating a c
10. Defence establishments or :
establishment or a training area

SCHED

- demolition waste).
21. Lime burner—manufacturing cement or lime from limestone material using a kiln and storing wastes from the manufacturing process.
 22. Livestock dip or spray race operations—operating a livestock dip or spray race facility.
 23. Metal treatment or coating—treating or coating metal including, for example, anodising, galvanising, pickling, electroplating, heat treatment using cyanide compounds and spray painting using more than 5 L of paint per week (other than spray painting within a fully enclosed booth).
 24. Mine wastes—
 - (a) storing hazardous mine or exploration wastes, including, for example, tailings dams, overburden or waste rock dumps containing hazardous contaminants; or
 - (b) exploring for, or mining or processing, minerals in a way that exposes faces, or releases groundwater, containing hazardous contaminants.
 25. Mineral processing—chemically or physically extracting or processing metalliferous ores.
 26. Paint manufacture or formulation—manufacturing or formulating paint where the design capacity of the plant used to manufacture or formulate the paint is more than 10 t per year.
 27. Pest control—commercially operating premises where—
 - (a) more than 200 L of pesticide are stored; and
 - (b) filling or washing of tanks used in pest control operations occurs.
 28. Petroleum or petrochemical industries including—
 - (a) operating a petrol depot, terminal or refinery; or
 - (b) operating a facility for the recovery, reprocessing or recycling of petroleum-based materials.
 29. Petroleum product or oil storage—storing petroleum products or oil—
 - (a) in underground tanks v
 - (b) in above ground tanks
 - (i) for petroleum p groups 1 and 2 c 2 500 L capacity;
 - (ii) for petroleum p groups 3 of the d capacity; or
 - (iii) for petroleum prc C1 or C2 in Aust handling of flamm by Standards Aus
 30. Pharmaceutical manufactu mixing or formulating pharm
 31. Printing—commercial print

RE: Contaminated Sites Register (CSR) - Data Validation Project
Sites classified as "Possible" on the CSR
Lots 1 & 2 on Plan RP176748 and Lot 1 RP120095 (now Lot 1 on Plan CP851106)
Lot 2 Plan RP176748
Lot 4 RP88219
Lot 2 RP113524
Lot 2 RP88218

As discussed with you last week, the sites above form part of the Oakey Army Base. These sites have been notified by Council, and have been given an interim classification as "possible" contaminated sites because insufficient information has been provided for them to be classified as "probable" sites.

We understand there are no UXO issues for which the sites might be listed. However under the *Contaminated Land Act 1991*, Prescribed Purpose land uses which could produce chemical contamination and that might be on the base include fuel and chemical storage and workshop related activities such as abrasive blasting, metal treating, electroplating, spraypainting etc.

In July 1998 the *Contaminated Land Act 1991* will be repealed and its functions incorporated into the *Environmental Protection Act*. Prescribed Purposes land uses will be replaced by Notifiable Activities. Attached please find a list of these taken from the amendment legislation.

We need to clarify the status of these sites as quickly as possible. Please advise any Notifiable Activities on these sites with as much detail as possible. Due to a computer problem I am unable to supply a map of the land parcels at this time; I will forward a map ASAP for you to mark the position of any Notif. Activities.

Any information you can supply would be much appreciated. Please contact me on (07) 3227 6922 if you have any queries.

Regards

SCHEDULE 3

NOTIFIABLE ACTIVITIES

Schedule 4, dictionary, definition "notifiable activity"

1. **Abrasive blasting** - carrying out abrasive blast cleaning (other than cleaning carried out in fully enclosed booths) or disposing of abrasive blasting material.
2. Aerial spraying - operating premises used for -
 - (a) filling and washing out tanks used for aerial spraying,
 - (b) washing aircraft used for aerial spraying.
3. Asbestos manufacturing or disposal -
 - (a) manufacturing asbestos products; or
 - (b) disposing of unbounded asbestos; or
 - (c) disposing of more than 5 t of bonded asbestos.
4. Asphalt or bitumen manufacture - manufacturing asphalt or bitumen, other than at a single-use site used by a mobile asphalt plant.
5. **Battery manufacture or recycling** - assembling, disassembling, manufacturing or recycling batteries (other than storing batteries for retail sale).
6. **Chemical manufacture or formulation** - manufacturing, blending, mixing or formulating chemicals if -
 - (a) the chemicals are designated dangerous goods under the dangerous goods code; and
 - (b) the facility used to manufacture, blend, mix or formulate the chemicals has a design production capacity of more than 1t per week.

Release

7. **Chemical storage** (other than petroleum products or oil under item 29) - storing more than 10t of chemicals (other than compressed or liquefied gases) that are dangerous goods under the dangerous goods code.
8. **Coal fired power station** - operating a coal fired power station.
9. **Coal gas works** - operating a coal gas works.
10. **Defence establishments or training areas** - operating a defence establishment or a training area used for handling ammunition in a way that may have caused, or may cause, remnant unexploded ordnance.
11. **Drum reconditioning or recycling** - reconditioning or recycling of metal or plastic drums including storage drums.
12. **Dry cleaning** - operating a dry cleaning business where -
 (a) solvents are stored in underground tanks; or
 (b) more than 500 L of halogenated hydrocarbon are stored.
13. **Electrical transformers** - manufacturing, repairing or disposing of electrical transformers.
14. **Engine reconditioning works** - carrying out engine reconditioning work at a place where more than 500 L of the following are stored -
 (a) halogenated and non-halogenated hydrocarbon solvents;
 (b) dangerous goods in class 6.1 under the dangerous goods code;
 (c) industrial degreasing solutions.
15. **Explosives production or storage** - operating a factory under the *Explosives Act 1952*.
16. **Fertiliser manufacture** - manufacturing agriculture fertiliser (other than the blending, formulation or mixing of fertiliser).
17. **Foundry operations** - commercial production of metal products by injecting or pouring molten metal into moulds and associated activities in works having a design capacity of more than 10 t per year.

18. ~~Gun, pistol and rifle range~~ - operating a gun, pistol or rifle range.
19. Herbicide or pesticide manufacture - commercially manufacturing, blending, mixing or formulating herbicides or pesticides.
20. Landfill - disposing of waste (excluding inert construction and demolition waste).
21. Lime burner - manufacturing cement or lime from limestone material using a kiln and storing wastes from the manufacturing process.
22. Livestock dip or spray race operations - operating a livestock dip or spray race facility.
23. ~~Metal treatment or coating~~ - treating or coating metal including, for example, anodising, galvanising, pickling, electroplating, heat treatment using cyanide compounds and spray painting using more than 5 L of paint per week (other than spray painting within a fully enclosed booth).
24. Mine wastes -
- (a) storing hazardous mine or exploring wastes, including, for example, tailings dams, overburden or waste rock dumps containing hazardous contaminants;
 - or
 - (b) exploring for, or mining or processing, minerals in a way that exposes faces, or releases groundwater, containing hazardous contaminants.
25. Mineral processing - chemically or physically extracting or processing metalliferous ores.
26. Paint manufacture or formulation - manufacturing or formulating paint where the design capacity of the plant used to manufacture or formulate the paint is more than 10 t per year.
27. Pest control - commercially operating premises where -
- (a) more than 200L of pesticide are stored; and
 - (b) filling or washing of tanks used in pest control operations occurs.

28. Petroleum or petrochemical industries including -

- (a) operating a petrol depot, terminal or refinery; or
- (b) operating a facility for the recover, reprocessing or recycling of petroleum - based materials.

29. ~~Petroleum product or oil storage~~ - storing petroleum products or oil -

- (a) in underground tanks with more than 200 L capacity; or
- (b) in above ground tanks with -
 - (1) for petroleum products or oil in class 3 in packaging groups 1 and 2 of the dangerous goods code - more than 2 500 L capacity; or
 - (2) for petroleum products or oil in class 3 in packaging groups 3 of the dangerous goods code - more than 5 000 L capacity; or
 - (3) for petroleum products that are combustible liquids in class C1 or C2 in Australian Standard AS 1940, 'The storage and handling of flammable and combustible liquids' published by Standards Australia - more than 25000 L capacity.

30. Pharmaceutical manufacture - commercially manufacturing, blending, mixing or formulating pharmaceuticals.

31. Printing - commercial printing using -

- (a) type metal alloys; or
- (b) printing inks or pigments or etching solutions containing metal; or
- (c) cast lead drum plates; or
- (d) a linotype machine with a gas-fired lead melting pot attached; or
- (e) more than 500 L of halogenated and non-halogenated hydrocarbon solvents.

32. Railway yards - operating a railway yard including goods-handling yards, workshops and maintenance areas
33. Scrap yards - operating a railway yard including automotive dismantling or wrecking yard or scrap metal yard.
34. Service Stations - operating a commercial service station.
35. Smelting or refining - fusing or melting metalliferous metal or refining the metal.
36. Tannery, fellmongery or hide curing - operating a tannery or fellmongery or hide curing works or commercially finishing leather.
37. Waste storage, treatment or disposal - storing, treating, reprocessing or disposing of regulated waste (other than at the place it is generated, including operating a nightsoil disposal site or sewage treatment plant where the site or plant has a design capacity that is more than the equivalent of 50 000 persons having sludge drying beds or on-site disposal facilities.
38. Wood treatment and preservation - treating timber for its preservation using chemicals, including, for example, arsenic, borax, chromium, copper or creosote'.

Dear Bob

RE: Lot 118 on AG3796

I refer to the above site, which forms part of the Oakey Army Base. Can you please advise whether this site has been used, or is being used, for fuel or chemical storage. If so, can you please advise the types and amounts, and whether any of the fuel storage was located underground.

Your earliest response to this matter would be greatly appreciated.

If you have any queries regarding this matter, please do not hesitate to contact me on the above telephone number.

Importance: High

Hi Karen,

History attached. As discussed. The search matter is related to notifications of a land under section 371 and 372 of the EPAct in regards to alleged contamination admitted from the defence base. Attached is a ecomap of the base area. Unless you have received any notices under section 371 or 372 of the EPAct regarding contamination admitted from the defence base for offsite and on site then it may be a matter for the compliance team to look into. Please contact the Toowoomba compliance team for advice.

Hi Kelly,

The Oakey Army Base is located on a number of lots (please see attached ecomap and the plans taken from the PB investigation report attached). The only lot listed on the EMR is Lot 1 on CP851106 for DEFENCE ESTABLISHMENTS OR TRAINING AREAS (please see ecomap). This notifiable activity has since been removed from the Schedule 3 *Environmental Protection Act 1994*. No other lots are listed on the EMR. Also attached for your assistance is the PB assessment report, Tony's review of the report and two ESR alerts for background to AI

Subject: Oakey Army Base

Morning Allen

Please find attached the documents/corro that I have on the Oakey Army Aviation groundwater contamination issue.

As discussed, what I was looking for originally in January was if the Site should be on the EMR and what "tools" the department could use in the event of offsite impacts.

Defence wrote to the department on 8 May stating that AECOM have been engaged to undertake targeted water sampling off the base and they will get back to us with the details which is what this proposed meeting is for.

Any advice you can provide us would be greatly appreciated.

Kind Regards,
Dr Amanda Cleary | Principal Environmental Officer

Release

9 January 2014

ALERT CATEGORY:

- Environmental incident

ALERT NAME:

- Groundwater Contamination – Oakey Defence Base

CUSTOMER DETAILS:

- Department of Defence
- Army Aviation Centre, Oakey (AACO)

SUMMARY OF ISSUE/S:

- Groundwater monitoring in and around the AACO base (the Base) has detected contaminants namely Perfluorooctane Sulfonate (PFOS) and Perfluorooctanoic Acid (PFOA) from fire fighting foam used in training exercises between 1970 and 2005.
- A Human Health Risk Assessment undertaken on behalf of the Department of Defence (Defence) of offsite populations concluded that the levels of contaminants detected were below the tolerable threshold and exposure to offsite populations was unlikely.
- An Ecological Risk Assessment (ERA) however identified potential risks to aquatic organisms including the EPBC protected Murray Cod and birds if the groundwater migrates to the Oakey Creek located 7.2 km from the Base.
- Groundwater is used in the area primarily for irrigation. The ERA identified four threatened ecological communities and 41 species of flora/fauna that may be adversely affected by the contaminants.
- Defence has engaged a new consultant to undertake a higher level ERA which will include a detailed biodiversity assessment and confirm source-receptor pathways into the offsite ecological food chain.
- No details have been provided regarding the management of potentially contaminated soil from the Base or potential impact of contaminants onsite.
- The Base is a federal government site and is not listed on the Contaminated Land Register or Environmental Management Register.
- A community meeting was held on 10 December 2013 to inform concerned parties about the monitoring that had been undertaken in the previous 12 months. During this meeting potential health issues were raised by a local doctor.

POTENTIAL IMPACTS / RISKS:

- Contaminated groundwater potentially affecting water quality of Oakey Creek.
- Potential ecological impact on flora and fauna in and around the Base.
- Community concern about the potential impact on human health and local ecology.
- Unknown fate/management of contaminated soil at the Base.

CUSTOMER ACTIONS:

- Defence have engaged a new consultant to undertake additional groundwater monitoring and ERA of the area surrounding the Base.
- Defence offered to test individual groundwater bores at resident's request.

Release

DEPARTMENT ACTIONS:**[HISTORICAL ACTIONS]**

- EHP manager, James Mackenzie (JM) was informed by Defence of a potential contamination issue following the initial ground water monitoring in December 2012. JM advised EHP Contaminated Land unit of the potential issue.

[PLANNED ACTIONS]

- Formally request additional information from Defence regarding management/disposal of contaminated soil located on site; confirmation if the recommendations made in the report submitted to EHP are to be undertaken and in what timeframes.

LOCALITY DETAILS AND PHOTOGRAPHS:

- None

KEY COMMUNICATION MESSAGES:

- The department is aware of this issue and working with Defence to determine the extent of the problem.

CONTACT DETAILS:

- Name: James Mackenzie (Manager)
- Phone number: 4615 3472
- Division: ESR – Southern - West

This email is an initial alert in respect of this matter.

If further advice or action is required, it will be communicated via normal channels such as a briefing note.

Subject: RE: Army Aviation Centre Oakey - Groundwater Investigation

Hi Dave, some preliminary comments on the slides about Oakey groundwater investigations

Issue 1 - Assessment appears focussed only on PFOS and PFOA rather than total fluorinated compounds

The assessment appears to focus on PFOS and PFOA. These are a subset contaminants of potential concern. For example, the EHP published model operating conditions for landfills and the draft EHP policy on management of fire-fighting foams both require monitoring and assessment of total fluorinated compounds., not just PFOA and PFOS. The policy has the following definitions:

Fluorinated organic compounds

All organic compounds that contain the elements fluorine and carbon where the fluorine has replaced some or all of the hydrogen in the straight or branched organic carbon chain including perfluorinated or polyfluorinated compounds. This commonly includes, but is not limited to, PFOS, PFOA, fluorotelomers, fluorosurfactants and their breakdown products.

Fluorinated organics analyses

For the purposes of assessing the environmental risks of fluorinated organics in soil, water or concentrate samples analyses shall be done for at least PFOS, PFOA, 6:2FtS and 8:2 FtS (6:2 and 8:2 fluorotelomer sulphonates) content whether in derivatised or free form (i.e. total content) and total fluorinated organics.

<http://www.ehp.qld.gov.au/era/prescribed/model-operating-conditions-era60-em1211.pdf>

<http://www.amerex-aust.com.au/sites/default/files/web/Solberg/Policy-QLDFirefightingFoamsV3-0.pdf>

To assess contaminants of potential concern, a broader analysis suite would need to be undertaken/reported. This should be informed by the nature of the fluorinated foams used by the RAAF at Oakey.

Issue 2 – The Assessment does not take into account the possibility of contamination via stormwater discharges

The fluorinated contaminants were applied to the mock planes/ the land surface in fire fighting exercises. They have infiltrated to groundwater. However, it is highly likely that they have also discharged from the site via stormwater drainage. There is no relevant sampling presented e.g. of sediments to assess releases into the environment via this pathway, nor potential impacts. For example, in western Queensland, it is common to build earthen storages across drainage channels to retain water for various uses. This is also a more direct pathways to local creeks.

Issue 3 - The Parson and Brinkerhoff Risk Assessment did not assess potential impacts on crops or cattle from use of contaminated groundwater for irrigation and stock watering.

Overseas studies have shown uptake of fluorinated organics occurs in cattle and crops on pastures on which sewage bio-solids containing these compounds has taken place. EHP has not been provided with information assessing health risks to cattle, crops and human consumers of such irrigation. The latest presentation advises affected persons that continued use of contaminated groundwater for irrigation and stock watering is safe. The basis of this assessment is unknown.

Issue 4 – Environmental Impacts on surface waters are unknown

The fluorinated compound involved are persistent organic pollutants. These have potential to affect the aquatic ecosystem, as well as human uses of surface waters e.g. stock watering. These impacts are unknown.

Issue 5 – Fate of any contaminated soil

EHP has standards for landfill acceptance of soil contaminated with these substances. It is not known if any contaminated soil or tarmac has been disposed from the site and if so, whether it met leachate standards and went to a properly lined facility.

We should raise these issues with defence when we meet them.

Cheers Tony

Subject: FW: Army Aviation Centre Oakey - Groundwater Investigation

Hi All,

For your information.

Amanda, I will leave this issue for you. I am hoping that further information will be supplied, that is, a certified site investigation report.

My main concern is that Defence are recommending that the affected ground water can still be used for crops and livestock.

My view that this is a state issue and without proper scientific information the above state is a concern.

Regards

Dave

Subject: Army Aviation Centre Oakey - Groundwater Investigation

Dear David,

As requested in your email to Tim Hamilton on Friday, the related reporting information about the Oakey Groundwater Investigation can be downloaded from the project website here: <http://www.defence.gov.au/id/Oakey/Documents.asp> (most of the files are too large for email).

As per our phone conversation last Wednesday, I understand you are also seeking the results from recent groundwater testing. Please find preliminary findings within the PowerPoint presentation attached (not for distribution). More detailed

results are not available at this stage as the reporting process is still being finalised. Defence will keep you updated about the investigation, and will make contact when the draft report is available.

If you have any further enquiries, don't hesitate to contact the project team on 1800 136 129 or email defence.oakey.anz@aecom.com.

Regards,

Ellen
Defence Oakey project team
