Attention Gerard Kavney

Dear Mr Kavney

Re: Notifications to the Contaminated Sites Register

I refer to my previous letter dated 25 September 1996 and numerous discussions between Council and Department of Environment officers concerning Council's obligation under the *Contaminated Land Act 1991* to notify sites for inclusion into the Contaminated Sites Register.

Please find attached a list of sites currently held on the Contaminated Sites Register for Maroochy Shire. I am greatly concerned that the list may not be complete, and if so, that inaccurate information will be given out in response to public searches of the Register.

Could you please arrange to have the list of sites verified, and any additional notifications submitted for inclusion on the Register, as soon as possible. Once again, I assure you that notifications will be processed promptly, and officers of this Section are ready to provide Council with any assistance that may be required.

A Notification form which sets out the required information is attached to this letter, although any format may be used. A list of prescribed purpose codes and descriptions, and an 'Interpretation Guide' is also attached for your information.

If you have any queries, please do not hesitate to contact me on the above number.

Yours sincerely

Mr Geoff Adamson
The Chief Executive Officer
Maroochy Shire Council
PO Box 76
NAMBOUR QLD 4560

Attention Mr Stephen Kent

Dear Sir

Re: Notifications to the Contaminated Sites Register

I am writing in relation to previous correspondence and telephone conversations with Council officers concerning the Contaminated Sites Register (CSR).

The CSR is open to searches by the public and it is therefore vital that information held is accurate and complete. A situation where information held on the CSR may be incomplete or inaccurate potentially exposes State and Local Government to an unacceptable level of liability and places members of the public in a situation whereby they may be receiving and acting upon inaccurate advice. For these reasons the Department of Environment wishes to ensure that notifications of prescribed purpose sites, pursuant to Schedule 1 of the *Contaminated Land Regulation 1991*, have been addressed. Officers from the Contaminated Sites Section will be made available to promptly process any notifications supplied by Council and to assist Council officers in any way possible.

Please find enclosed a complete listing of sites currently held on the CSR for Maroochy Shire. It would be greatly appreciated if Council could verify the accuracy of these existing records. To assist you in this task, and in the identification of further sites, a list of Prescribed Purpose land uses and a Prescribed Purpose Activity Interpretation Guide are also enclosed.

.../2

As a general guideline, Council may provide notifications in any format, provided the following details are clear: prescribed purpose (past or present); current lot and plan and address; and owner details as indicated by the attached Notification form. Should Council prefer to notify sites by computer disk, the required data format is set out in the final attachment.

I hope this letter has addressed some of Council's concerns and I look forward to co-operating with you in this matter. Please do not hesitate to contact me if you have any questions.

Yours sincerely
